

**MANONMANIAM SUNDARANAR UNIVERSITY
TIRUNELVELI – 12**

**M.Sc. NUTRITION AND DIETETICS WITH HOSPITALITY
MANAGEMENT**

**TAMILNADU STATE COUNCIL FOR HIGHER EDUCATION,
CHENNAI – 600 005**

FROM THE ACADEMIC YEAR 2026–2027 onwards

M.Sc. NUTRITION AND DIETETICS WITH HOSPITALITY MANAGEMENT

INTRODUCTION

Outcome- Based Education is incorporated into the curriculum based on the requirements of NAAC and UGC – Quality Mandate (2018). To fulfill these requirements, the Programme Educational Objectives (PEOs), Programme Outcomes (POs) and Programme Specific Outcomes (PSOs) and Course Outcomes (COs) were framed for all programmes in alignment with the Vision, Mission and Educational Objectives of the University.

VISIONANDMISSIONOFTHE UNIVERSITY:

VISION:

To provide quality education to reach the un-reached.

MISSION:

- To conduct research, teaching and outreach programmes to improve conditions of human living.
- To create an academic environment that glorify women and men of all races, caste, creed, cultures and all atmosphere that values intellectual curiosity, pursuit of knowledge , academic freedom and integrity.
- To offer a wide variety of campus educational and training programmes, including the use of information technology to individuals and groups.
- To develop partnership with industries and government so as to improve the quality of work place and to serve as catalyst for economic and cultural development.
- To provide quality/inclusive education especially for the rural and un-reached segments of economically down-trodden students including women, socially oppressed and differently abled.

PREAMBLE

- ❖ The postgraduate programme in this discipline has been designed to provide the students intensive and extensive theoretical and experiential learning. The programme allows flexibility in

the choices based credit systems. It is envisaged that the current of thrust areas, which students can select, based require trained professionals in areas such as Public Nutrition, Dietetics and Clinical Nutrition.

- ❖ Outcome Based Education (OBE) has emerged as an effective approach in higher education to ensure quality, skill oriented and learner centered education. The Choice Based Credit System (CBCS) provides flexibility in curriculum design enables students to acquire knowledge, skills and competencies according to their interests and career aspirations. The curriculum is designed to promote flexibility, critical thinking, problem solving ability and lifelong learning through effective teaching, learning, and assessment practices. The revised curriculum framework integrates Programme Educational Outcomes (PEOs), Programme Outcomes (POs), Programme Specific Outcomes (PSOs), and Course Outcomes (COs) in alignment with the Vision and Mission of the University. The adoption of Revised Bloom's Taxonomy (RBT) ensures effective attainment of knowledge, skills, ethical values, and employability among learners. The courses are systematically designed and mapped to ensure that the outcomes of all courses collectively contribute to the achievement of the programme outcomes and the holistic development of students.

PROGRAMME EDUCATIONAL OUTCOMES (PEO)

In alignment with the Vision and Mission of the University, the following have been defined as the PEO for the graduates.

PEO1: Developing strong positive attitude to learn independently the concepts in the field of study

PEO2: Ensuring confidence among the learners to apply the knowledge and skills gained to solve real life issues

PEO3: Habituating ethical values among the learners to succeed in personal and professional life

PROGRAMME OUTCOMES (PO)

Programme Outcomes for the Under Graduate and Post Graduate Degree Programmes of the University are articulated as under.

After the successful completion of Postgraduate Programme from the University, the learner should be able to

PO1: Comprehend the knowledge acquired and communicate the same to others.

PO2: Analyze and compare the factual data / situation to comprehend and to critically evaluate to find solution to the problem ahead.

PO3: Apply theories and philosophies learned in solving the problem in scientific manner.

PO4: Think reflectively on the earlier activities and attempt for self-directed lifelong learning process.

PO5: Understand multicultural existence and identify the means to prolong moral/ethical values in personal and professional life.

PO6: Explore through multiple sources and get exposed to the digital literacy and information explosion with latest technology.

PO7: Act as a responsible member in the varied teams with facilitating capability and formulate teams as a leader for defined purposes.

Program Specific Outcomes (PSOs)

On successful completion of Master of Nutrition & Dietetics programme, the student should be able to:

PSO1: Disciplinary Knowledge:

Understand the fundamental principles, concepts, and theories related to Nutrition & Dietetics Also, exhibit proficiency in performing experiments in the laboratory.

PSO2: Critical Thinking:

Analyze complex problems, evaluate information, synthesize information, apply theoretical concepts to practical situations, identify assumptions and biases, make informed decisions and communicate effectively.

PSO3: Problem Solving:

Employ theoretical concepts and critical reasoning ability with Nutrition & Dietetics and practical skills to solve problems, acquire data, analyze their physical significance and explore new scientific findings.

PSO4: Analytical & Scientific Reasoning:

Apply scientific methods, collect and analyze data, test hypotheses, evaluate evidence, apply statistical techniques and use computational models.

PSO5: Research related skills:

Formulate research questions, conduct literature reviews, design and execute research studies, communicate research findings and collaborate in research projects.

PSO6: Self-directed & Lifelong Learning:

Continuously update knowledge by lifelong learning and contribute to the growth and development of science and technology.

PSO7: Employability and Entrepreneurship

Develop skills for employability, entrepreneurship, and career readiness in industry, education, and technology-driven sectors.

PROGRAMME DETAILS

Programme Name: Master of Science (M.Sc.) in Nutrition and Dietetics with Hospitality Management

Duration: 2 Years (four Semesters)

Medium of Instruction: English

Eligibility Criteria

Candidates seeking admission to the M.Sc. Nutrition and Dietetics with Hospitality Management programme generally requires a Bachelor's degree in a relevant field (Nutrition, Home Science, Life Sciences, or Allied Health) with a minimum aggregate of 50% to 60%.

Programme Overview

The M.Sc. Nutrition and Dietetics with Hospitality Management programme is designed to provide students with a strong foundation in the science of nutrition, food, health, and diet therapy. The curriculum integrates theoretical knowledge with practical training to help students understand the relationship between food, nutrition, and human well-being.

5 | Page The programme covers various aspects of Nutrition, including human physiology, biochemistry, food science, community nutrition, therapeutic nutrition, food service management, and dietetics. Students gain hands-on experience through laboratory work, field visits, case studies, and internships, enabling them to apply nutritional principles in real-life situations.

EXAMINATION SCHEME

- M.Sc Nutrition & Dietetics with Hospitality Management curriculum is divided and studied in four semesters.

- The internal assessments and external examination are the two parts of evaluation scheme.
- The external theory and practical examinations will be conducted by the university at the end of each semester.
- There is a separate passing minimum of 40% for the external and overall components.

DISTRIBUTION OF MARKS BETWEEN INTERNAL AND EXTERNAL ASSESSMENT FOR CORE, SKILL ENHANCEMENT AND ELECTIVE COURSES

- * Theory Marks 25: 75
- * Practical Marks 50: 50
- Pass a minimum of 50% for external and overall components.

1. Internal Assessment.

- Internal Marks for Theory shall be allotted in the following manner

The average of the best two tests from three compulsory tests. Each test is for one hour duration	15 marks
Assignment	05 marks
Seminar	05 marks
Total	25 Marks

2. Marks for Practical / Major Project shall be allotted in the following manner

- Internal Marks: 50; External Marks: 50

3. External evaluation of Project;

Project report evaluation and Viva-Voce will be conducted by both the External examiner and the Guide at the end of the semester.

4. Internship

- Report for Internship / Industrial Visit / Research Institute Visit.
- Should be evaluated along with the project at the end of IVth semester.
- Students should submit a report for internship / industrial visit/field visit / Research institute visit/ knowledge updation activity at the end of the Third semester with attendance certificate from the

concerned organisation.

- The duration of the internship should be 60 hours.
- Internal: 50 marks; External: 50 marks

5. Extension Activity:

- The student should participate in any one of the programmes, like youth welfare activity, outreach programmes, Field Visit etc. the examination/report / evaluation will be conducted at the end of the fourth semester.

The question pattern for all theory courses shall be as follows.

6. Duration of Exam: 3 Hours

Section	Type of questions	Mark Distribution
Part A	Fifteen multiple-choice questions (Two question from each unit compulsory)	15 x1=15 Marks
Part B	Five Internal Choice questions (One question from each unit: either or choice)	5x4=20 marks
Part C	Five Internal Choice questions (One question from each unit: either or choice)	5x8=40 marks
Total		75 Marks

MODEL QUESTION PAPER

ADVANCED FOOD SCIENCE (For those who joined in July 2026 onwards)		
7 Page	Time: Three hours	Maximum: 75 marks
	Part-A (15×1=15 marks) Answer All questions	
1	Which of the following properties of colloids does not depend on the charge on particles? a) Coagulation Tyndall effect b) Electro-osmosis c) Electrophoresis d)	K1
2	Gelatinization is a process of a) Coagulation of proteins b) Swelling of starch by application of moist heat c) Preparing gelatin-based sweets d) Browning bread slices	K1

3	Wheat flour with water becomes a) Elastic and substance is called glutenb) Weak and substance is called lipid c) Hard and unable to cook d) Wet and difficult to cook	K1
4	Which of the following factors is not responsible for the denaturation of proteins? (a) Heatb) Charge c) pH change d) Organic solvents	K1
5	_____ is not a classified form of conjugated proteins. a) Lipoproteins b) Glycoproteins c) Metalloproteins d) Complete proteins	K1
6	. Enzyme complex involved in alcoholic fermentation is: a) Zymase b) Invertase c) Lipase d) Amylase	K1
7	The sweetest sugar is a) Sucrose b) fructosec) maltose d) glucose	K1
8	This is the function of dietary fat a) Signals cells b) forms part of cellular membranes c) provides energy to the body d) all of these	K1
9	Yellow color of milk fat is due to presence of? a)Vitamin D b) Carotenoids c) Calcium d)Folic Acid	K2
10	. What is the fat percentage of cow milk? a) 9% b) 10% c) 15% d) 4%	K2
11	What determines the color of an egg? a) Hen's egg b) Hen's diet c) Hen's size d) Hen's feather color	K2
12	The purpose of heat treatment on milk is _____ a) Kill pathogenic microorganism b)Heatmilk c) Evaporation d) Taste enhancement	K2
13	The sweetest sugar is a) Sucrose b) fructosec) maltose d) glucose	K2
14	What is the main function of preservatives in food? a) To improve the taste of food b) To increase the shelf life of food c) To enhance the color of food d) To reduce the fat content of food	K2
15	What is the main function of colorings in food? a) To improve the taste of food b) To increase the shelf life of food c) To enhance the appearance of food d) To reduce the fat content of food	K2
PART-B (5 X 4 = 20 Marks)		

16	(a) List the physical properties of food? Or b) Interpret on the factors affecting starch gelatinization?	K4
17	a) Detail on the functions of Proteins? Or b) Classify Enzymes?	K2
18	a)Detail on the health benefits of cooking oil? Or b)Explain about types of sugar?	K5
19	a)Enumerate on fermented milk products? Or b) Identify the factors affecting coagulation of egg proteins?	K4
20	a) What are Artificial Sweetening Agents? Or b) Discriminate on the types of flavorings?	K5
PART- C (5 X 8 = 40 Marks)		
21	a) What are the types of Colloids? Or b) Write about the types of starch?	K4
22	a) Brief on the classification of Proteins? Or b) Interpolate on the factors affecting Enzyme Activity?	K5
23	a)Detail on types of fats? Or b) Outline the properties of sugar?	K5
24	a) Discriminate the factors affecting the quality of egg? Or b) Illustrate the Non-Fermented products?	K3
25	a) Identify sugar related products and explain in detail Or b) Summarize on types of Food Additives	K4

10 | Page

MEASUREMENT OF ATTAINMENT OF COURSE OUTCOME

The Course Outcomes (COs) are measured through learners' performance using direct and indirect assessment methods for that particular course.

i. Internal Assessment (25 Marks)

Tests – 15 Marks

Seminar / Assignments/Attention (Participation) in Class – 10 Marks

ii. Semester End Examinations (75 Marks)

Written exams, Practical, Project report, and Comprehensive Viva Voce

Note: In both Internal and Semester End Examinations

Higher Order Thinking (K1, K2, & K3) – 60 % in each part

Lower Order Thinking (K4, K5, & K6) – 40 % in each part

PROGRAMME STRUCTURE

Nutrition and Dietetics with Hospitality Management

FIRST YEAR - SEMESTER I				
Part	Study Component	Course Title	Credits	No. of Hours
	Core-I	Advanced Food Science	5	6
	Core- II	Advanced Human Physiology	5	6
	Core- III	Hospital Administration	4	6
	Elective-I	Advanced Food Science Practical/ Advanced Human Physiology Practical	3	4
	Elective-II	Food Processing and Technology/ Principles of Menu Planning	3	4
	Skill Enhancement Course [SEC]-NME-1	Food Processing and Technology- Practical	2	4
			22	30
FIRST YEAR - SEMESTER II				
Part	Study Component	Course Title	Credits	No. of Hours
	Core-IV	Research Methods in Nutrition	5	6
	Core- V	Advanced Dietetics	5	6

	Core– VI	Advanced Dietetics-Practical	4	6
	Elective–III	Advanced Nutritional Biochemistry/ Computer in Nutrition Research	3	4
	Elective–IV	Perspectives of Home Science/Human Factors and Ergonomics	3	4
	Skill Enhancement Course [SEC]–NME-1	Food Preservation	2	4
			22	30

SECOND YEAR – SEMESTER- III

Part	Study Component	Course Title	Credits	No .of Hours
	Core– VII	Macronutrients	5	6
	Core– VIII	Resource Management	5	6
	Core– IX	Food Biotechnology	5	6
	Core(Industry Module)– X	Nutrition for Fitness	4	6
	Elective–V	Research Writing and Presentation/Pediatric Nutrition	3	3
	Skill Enhancement Course-II	Techniques in Food Analysis	2	3
		Internship/ Industrial Activity (Credit)	2	-
			26	30

SECOND YEAR- SEMESTER - IV

Part	Study Component	Course Title	Credits	No. of Hours
	Core – XI	Micronutrients	5	6
	Core – XII	Biochemical Techniques	5	6
	Project with VIVA VOCE	Project Work with Viva Voce	7	10
	Elective– VI (Industry Entrepreneurship)	Functional Foods and Health/Oncology Nutrition	3	4
	Skill Enhancement Course–III/Professional Competency Skill	Biochemical Techniques-Practical	2	4
	Extension Activity	Extension Activity	1	-
			23	30

Each Course has to address a minimum of 4 PSOs

Level of contribution of the Course towards attaining PSOs

0 – No Contribution 1 – Low Level 2 – Medium Level 3 – High Level

COURSE OUTCOMES (CO)

Four Course Outcomes (COs) for each course that can be achieved by the learners on completion of that particular course are as follows:

Considering outcomes related to

- i. K1 and K2 level of evaluation in all the Units as CO1
- ii. K3 level of evaluation in all the Units as CO2
- iii. K4 level of evaluation in all the Units as CO3
- iv. K5 and K6 level of evaluation in all the Units as CO4.

All the COs proposed in each of the courses should be mapped with POs based on the relevance.

Level of Correlation between COs and POs

0 – No Correlation 1 – Low 2 – Medium 3 – High

G. Mapping of Course Outcomes (COs) with Programme Outcomes (POs) and Programme Specific Outcomes (PSOs) can be carried out accordingly, assigning the appropriate level in the grids:

	POs							PSOs						
	1	2	3	4	5	6	7	1	2	3	4	5	6	7
CO1														
CO2														
CO3														
CO4														

YEAR I- SEMESTER I											
Subject Code	SubjectName	Category	L	T	P	S	Credits	Inst. Hours	Marks		
									CIA	External	Total
	ADVANCED FOOD SCIENCE	Core-I	4				4	15	25	75	100

Course Outcome

On completion of this course, Students will be able to

CO1 (K1 & K2 – Remembering and Understanding)

Overview the relationship between the chemical structure and the properties of the main components in food like starch, protein and lipids.

CO2 (K3 – Applying)

Understand the Composition and characteristics of various food commodities.

CO3 (K4 – Analyzing)

Explain the cooking quality of foods and apply food science knowledge in food industries.

CO4 (K5 & K6 – Evaluating and Creating)

Identify and understand the nutrients and functions of foods in maintaining health

Analyze the proper use of food colors and food additives in safe food preparation.

UNIT	Contents	No.of Hours
I	Properties of food- Food nutrients, solids, solutions and colloids, Solutions- Physical properties of solutions, classification of foods based on viscosity characteristics. Solutes- chemical properties, Food dispersion: Colloids- Types of colloid and properties of colloids and rheology of food dispersions; Structure, formation and stability of gels, sols, emulsion and foams. Starch- Sources, Structure and composition of starch; Properties and characteristics of food starches; Modified food starches- Structure and composition, Effect of heat on food starch properties, gluten formation in wheat flour, influencing factors [gluten], gelatinization, gelation and retrogradation, dextrinization and factors affecting gelatinization.	12

II	Proteins- Structure and composition, Classification and properties of proteins; Effect of heat on physio-chemical properties of proteins; Role of proteins in food products; Texturized vegetable protein, protein concentrates. Enzymes: Classification and its nature; Mechanism of action; Factors influencing enzyme activity; Role of enzymes in food products; Immobilized enzymes and its application in food industries.	12
III	Fats and oil -Structure, composition and properties of fats and oil; storage of fat, characteristics [shortening, plasticity, flavor, retention of moisture, melting point, optical activity, color, specific gravity], Hydrogenation, winterization, flavor reversion, smoking point, Rancidity-Types, Mechanism and prevention; Role of fat/oil in food products; Fat substitutes. Sugar and sugar products-Types of sugar, Types of granulated sugar, Physical and chemical properties, Sugar products -Types of honey, Jaggery, corn syrup, various forms of sugar used in cookery and Crystallization of sugar.	10
IV	Milk components- water, carbohydrate, milk fat, milk protein, minerals and other components in milk, Physiochemical properties of milk, Effect of physical and chemical factors on milk components [Effect of heat, protein, factors affecting coagulation, casein coagulation, minerals, Non-enzymatic browning], [Effects of acid], Effects of enzymes-renin, fermented and non-fermented milk products Egg -proteins in Egg, microscopic structure of egg, characteristics [colour, size], Nutritional qualities, quality check, functional properties- foaming, factors affecting foam formation.	12
V	Food additives- Definition, different food additives and Need for food additives. Flavour compounds in vegetables, fruits and spices; Effect of processing on food flavors; Role of colors and flavors in food products.	12

	ADVANCED HUMAN PHYSIOLOGY	Core-II	4				4	5	25	75	100
Course Outcome On completion of this course, Students will be able to CO1 (K1 & K2 – Remembering and Understanding) Explain the structure and functions of cells, tissues, blood, and cardiovascular system. CO2 (K3 – Applying) Describe the respiratory, endocrine, and immune systems and their physiological functions. CO3 (K4 – Analyzing) Apply the principles of gastrointestinal physiology and reproductive processes in human health. CO4 (K5 & K6 – Evaluating and Creating) Analyze the structure and functions of the nervous and excretory systems in maintaining homeostasis. Understand the structural and functional organization of Skin, Nervous and Excretory system Evaluate the role of skin, temperature regulation, and integrated physiological mechanisms in the human body.											
UNIT	Contents									No.of Hours	
I	Cell • Structure and Function. • Transportation across cell membrane. • Cell theory and Cycle. Difference between Meiotic and Mitotic cell. • Stem cells- types and functions. Tissue • Structure and Function.									12	
II	Blood • Composition & Functions • Blood Group – ABO system & Rh factor. • Blood Coagulation. Heart • Structure & Function of Heart and Blood Vessels. • Systemic & Pulmonary circulation • Cardiac cycle and Conduction. • Heart rate and Cardiac output. ECG.									12	

	• Blood pressure & their regulations.	
III	Respiratory System • Structure and function. Gas Laws pertaining to Gas Exchange (Meaning only)-Henry's Law of Partial Pressure, Boyle - Mariotte's Law of Volume and Pressure, Dalton's Law of Partial Pressure, Charles's Law of Ideal Gas Equation and Fick's Law of Diffusion. • Mechanism of respiration. • Circulation and Exchange of respiratory gases. • Internal and External Respiration. Chloride shift. • Definitions of Lung volumes and Lung capacities • Ventilation and Artificial Respiration. Immunity • Definition and types Innate and Acquired immunity. • Endocrine System • Hormones and its type. • Syndromes resulting from hypo and hyperactivity of Pituitary, Thyroid, Adrenals and Pancreas	12
IV	Gastro intestinal System • Structure and function of GI tract and its accessory organs. • Digestion and absorption of Carbohydrates, Proteins and Fats. Reproductive System • Role of hormones in reproduction and Lactation. • Menstrual Cycle and Menopause. • In vitro (IV) fertilization • Spermatogenesis. Egg -proteins in Egg, microscopic structure of egg, characteristics [colour, size], Nutritional qualities, quality check, functional properties- foaming, factors affecting foam formation.	12
V	Nervous System • Structure and Function of Neuron. Afferent and Efferent Nerves. • Conduction of Nerve Impulse -Synapses, Neurotransmitters, Summation and Action Potential. • Sympathetic and Parasympathetic nervous System. • Cerebrospinal fluid (CSF)-composition and function. • Blood-brain barrier (BBB). • Electroencephalogram(EEG) Excretory Systems Renal system • Organs in the Urinary System. • Structure and functions of Nephron. • Just aglomerular Cell.	10

	● Mechanism of formation of urine, ● Role of the kidney to regulate Blood pressure, Water, Electrolytes and Acid Base Balance. Skin ● Structure and function. Regulation of temperature of the body

Lecture, Power Point Presentation, Demonstration, Group Discussion, Assignment, Library Visits, Seminars and Oral & Written Revision

YEAR I- SEMESTER I											
Subject Code	SubjectName	Category	L	T	P	S	Credits	Inst. Hours	Marks		
									CIA	External	Total
	HOSPITAL ADMINISTRATION	Core-III	4				4	5	25	75	100

Course Outcome

On completion of this course, Students will be able to

CO1 (K1 & K2 – Remembering and Understanding)

Distinguish between the types of hospitals and the departments and their organizational structure.

CO2 (K3 – Applying)

Describe the code of ethics followed in hospitals and Explain the roles and responsibilities of health professionals

CO3 (K4 – Analyzing)

Recall legal laws and identify medical malpractices and Evaluate the quality and safety in hospitals through use of appropriate measures

CO4 (K5 & K6 – Evaluating and Creating)

Analyze the budgeting and fund flow management in hospitals.

Discuss the National Health policy and community based health development in rural areas.

UNIT	Contents	No.of Hours
I	Introduction to Hospital Administration: Concept of Hospitals, Different types of Hospitals, Problems and constraints in different types of Hospitals, History of Hospital Development, Department and organization structure of different types of hospitals.	12
II	Code of Ethics, Duties of Healthcare professionals - Doctors, Nurses, Nutritionists, and Dietitians (in brief) to their patients, professional large, profession in consultation, and to the community - Breach of ethics and code of conduct.	12
III	Legal framework in Hospitals, Patient's rights & provider's responsibility: Medical Malpractices, Disciplinary Action, Management of Hazard and Safety in a Hospital Setup, Bio-Medical Waste Management - Benefits of Health Insurance and Managing Health Care, Medical audit to meet legal requirements of Hospitals	12
IV	Accounting and financial Management in Hospitals: Principles, analysis and interpretation of financial reports, Preparation and use of budgets, Capital budgeting, Fund flow management, and budgetary control.	12
V	Health Planning & Management: National Health Policy, Provision of medical care, Primary healthcare, Health	10

for All, Encouragement of indigenous systems of medicine, Process of health planning in India.

Subject Code	SubjectName	Category	L	T	P	S	Credits	Inst. Hours	Marks		
									CIA	External	Total
	ADVANCED FOOD SCIENCE PRACTICAL	ELECTIVE-I	3				3	10	50	50	100

Course Outcome

On completion of this course, Students will be able to

CO1 (K1 & K2 – Remembering and Understanding)

Explain and perform sensory evaluation techniques and analyze the functional properties of starch and pulses.

CO2 (K3 – Applying)

Apply principles of food chemistry to evaluate fruits, vegetables, milk, sugars, fats, and oils.

CO3 (K4 – Analyzing)

Analyze the physical properties of foods using standard laboratory methods and interpret experimental results.

CO4 (K5 & K6 – Evaluating and Creating)

Evaluate food quality, detect adulteration, and recommend suitable quality control measures for food products.

UNIT	Contents	No.of Hours
I	SENSORY METHOD ➤ Analysis of taste sensitivity ➤ Threshold test ➤ Duo-Trio test ➤ Multiple sample difference	3
II	STARCH ➤ Microscopic structure and gelatinization ➤ Factors affecting gelatinization ➤ Sag test ➤ Gluten formation	3
III	PULSES ➤ Factors affecting cooking quality	3

IV	FRUIT ➤ Enzymatic browning ➤ Pectin test ➤ Firmness of gel	3
V	VEGETABLE ➤ Various methods of cooking ➤ Fat-soluble and water-soluble pigments	3
VI	MILK ➤ Detecting the presence of starch, soda, urea in milk sample ➤ pH of milk sample ➤ Effect of acid on milk ➤ Maillard reaction	
VII	SUGAR ➤ Relative sweetness of sugars: sucrose, maltose, lactose, fructose, dextrose, glucose, artificial sweeteners ➤ Stages of sugar cookery ➤ Effect of dextrose, jaggery, honey, and cream of tartar on sucrose	3
VIII	FATS AND OILS ➤ Smoking point of various oils: Ground nut oil, coconut oil, Gingelly oil, Olive oil, vanaspati, Ghee, Refined Sunflower oil, Rice bran oil ➤ Cooking temperature and fat absorption: Ground nut oil, coconut oil, Gingelly oil, Refined Sunflower oil, Rice bran oil	3
IX	PHYSICAL PROPERTIES ➤ Thousand-grain weight ➤ Thousand-grain volume ➤ Hydration capacity ➤ Hydration index ➤ Swelling capacity ➤ Specific gravity	3

	➤ Seed displacement test ➤ Viscosity: Line spread test, Viscometer	
	Food Adulteration

									CIA	External	Total
	ADVANCED HUMAN PHYSIOLOGY PRACTICAL	ELECTIVE-I	3				3	10	50	50	100

Course Outcome

On completion of this course, Students will be able to

CO1 (K1 & K2 – Remembering and Understanding)

Identify and explain microscopic structures and principles of physiological investigations.

CO2 (K3 – Applying)

Perform and apply laboratory and physiological assessment techniques.

CO3 (K4 – Analyzing)

Analyze microscopic features and physiological data for interpretation.

CO4 (K5 & K6 – Evaluating and Creating)

Evaluate results, prepare reports, and demonstrate competency in experimental procedures.

UNIT	Contents	No.of Hours
I	CELLS AND TISSUES Microscopic study of tissues-epithelial, connective and muscular.	3
II	BLOOD AND HEART • Microscopic structure of heart • Separation of blood components (Centrifugation). • Estimation of hemoglobin-Sahli's Acidhematin method. • Determination of Hematocrit (Wintrobe method). • Preparation and examination of stained blood smear (Wedge or glass slide method). • Determination of Erythrocyte Sedimentation Rate (Wintrobe method). • Determination of blood group. • Determination of bleeding time (Duke method) and coagulation time (Capillary tube method). • Platelet count (Rees Ecker method by hemocytometry). • Clinical examination of radial pulse (pulse rate).	3

III	RESPIRATORY SYSTEM AND ENDOCRINE SYSTEM • Measurement of blood pressure (Sphygmomanometer). • Effect of exercise on blood pressure and heart rate.	3
IV	GASTROINTESTINAL SYSTEM AND REPRODUCTIVE SYSTEM Microscopic structure of digestive system	3
V	NERVOUS SYSTEM AND EXCRETORY SYSTEM • Microscopic structure of kidney. • Microscopic structure of reproductive organs-ovary, uterus, mammary glands and testis. • Microscopic structure of endocrine glands-thyroid, pituitary and adrenal.	3

	FOOD PROCESSING AND TECHNOLOGY	ELECTIVE II	3				3	10	25	75	100

Course Outcome

On completion of this course, Students will be able to

CO1 (K1 & K2 – Remembering and Understanding)

Explain the principles of food processing, enzyme activity, and effects of processing on food components.

CO2 (K3 – Applying)

Apply cereal, pulse, nut, and oilseed processing technologies and analyze their impact on nutritional and physiochemical properties.

CO3 (K4 – Analyzing)

Analyze fruit, vegetable, milk, egg, meat, poultry, and fish processing techniques and evaluate quality changes during storage and preservation.

CO4 (K5 & K6 – Evaluating and Creating)

Evaluate post-harvest technologies and practices to reduce losses and enhance shelf life of agricultural produce.

UNIT	Contents	No.of Hours
I	Processing of foods: Primary, secondary and tertiary processing, historical perspective, traditional technologies used in food processing. Effects of processing on components, properties and nutritional value of foods. Enzymes in Food Processing: Enzyme- Review of classification, enzyme inhibitors, enzymatic browning.	12
II	Cereal Processing and Technology: Rice: parboiling, milling and pearling; Processing and milling of wheat, maize, barley, oats and rye. Millets: processing of millets; Cereal Products: Flours and its quality; processed products of rice, wheat and maize; By products utilization; breakfast cereals and extrusion; Effect of processing on nutritive value of cereals; changes in physiochemical properties of cereal starch and protein due to processing. Milling process: Complete milling process, break rolls, reduction rolls, milled products and their nutritive value and applications Pulse Processing and Technology: Dals, flours, protein concentrates, isolates and hydrolysates; Byproducts utilization; Effect of processing on nutritive value and physiochemical properties of pulses. Nuts and Oil Seeds Processing and Technology: Nuts Processing methods, Oil seeds processing: Oil extraction methods and	12

	refining process; byproducts utilization; Effect of processing on nutritive value and physiochemical properties of vegetable oils.	
III	Vegetables Processing and Technology: Pigments: Classification, effects on processing of vegetables; preliminary processing of vegetables; Vegetable products: Fermented and non-fermented and its shelf life; Vegetable waste utilization; Effect of processing on nutritive value and physiochemical properties of vegetable Fruits Processing and Technology: Concept of maturity, ripening and senescence; Methods of fruit processing technologies: traditional and new methods. Fruit products: fermented and non-fermented; Effect of processing on nutritive value and physiochemical properties of fruits; Browning reactions: types and mechanism; prevention methods; Fruit waste utilization. Milk Processing and Technology: Milk types, composition, physiochemical properties; Milk processing- Separation, centrifugal process, natural creaming, pasteurization, sterilization, homogenization. Milk storage; Effects of processing on nutritive value and physicochemical properties of milk	12
IV	Egg Processing and Technology: Egg processing and storage; Effect of processing on nutritive value and physiochemical properties of eggs; changes in egg quality during storage and preservation methods. Meat Processing and Technology: Meat processing and storage; Factors influencing meat quality; Ageing and tenderization of meat. Poultry: Processing and storage of poultry meat; Preservation methods for poultry. Fish: Processing and storage; Preservation methods for fish. Effect of processing on nutritive value and physiochemical properties of meat, poultry and fish.	12
V	Introduction of Post-Harvest Technology Introduction to post-harvest technology of agricultural produce; Status of Production, Losses, Need, Scope and Importance. Post-Harvest Loss- Definition, Factors contributing to Post-harvest Loss; and Technologies and Practices to reduce Post-harvest Losses.	10

YEAR I- SEMESTER I											
Subject Code	SubjectName	Category	L	T	P	S	Credits	Inst. Hours	Marks		
									CIA	External	Total
	PRINCIPLES OF MENU PLANNING	ELECTIVE II	3				3	10	25	75	100
Course Outcome On completion of this course, Students will be able to CO1 (K1 & K2 – Remembering and Understanding) Explain the concepts of RDA, energy expenditure, growth, and development across different stages of life. CO2 (K3 – Applying) Describe the nutritional requirements and dietary planning for infants, preschool children, school children, adolescents, and adults. CO3 (K4 – Analyzing) Apply principles of nutrition to pregnancy, lactation, and geriatric nutrition for promoting health and well-being. CO4 (K5 & K6 – Evaluating and Creating) Evaluate nutritional problems and formulate appropriate dietary recommendations for different age groups and physiological conditions.											
UNIT	Contents									No.of Hours	
I	UNIT-I: RECOMMENDED ALLOWANCES RDA for Indian basis for requirement, computation of allowance based on energy expenditure, components of energy expenditure. General concepts about growth and development through different stages of life.									12	
II	Preschool- Food habits and nutrient intake of preschool children. Dietary allowances and supplementary foods. School going age - , Nutritional status of school children, school lunch program, factors to be considered in planning a menu, food habits and nutritional requirement, packed lunch.									12	
III	Adolescence: Changes of growth characteristics of adolescents. Nutritional needs of the adolescents. Adults: Nutrition for adults. Basis for requirement Nutrition and work efficiency.									12	

IV	NUTRITION IN PREGNANCY ICMR Nutrient allowances, Dietary guidelines. Common nutrition related problem of pregnancy and Lactation.	12
V	Geriatric-Nutrition allowances- Dietary Guidelines—Psychosocial and economical factor, Affecting eating behavior. Infant- Rate of growth, weight as the indicator, Nutrition allowances for the infants. Breast feeding. Weaning foods suitable for infants. Premature infant and their feeding infant formulas.	10

	RESEARCH METHODS IN NUTRITION	Core-IV	5				5	15	25	75	100

Course Outcome

On completion of this course, Students will be able to

CO1 (K1 & K2 – Remembering and Understanding)

Demonstrate knowledge of the scientific method, purpose and approaches to research and Become a qualified researcher.

CO2 (K3 – Applying)

Identify and selection of the research sampling and scales of measurement

CO3 (K4 – Analyzing)

Understand the types of tools applicable to research problem and develop skills of preparing out line of research work and construct common data collection tools

CO4 (K5 & K6 – Evaluating and Creating)

Assess the numerical data for providing statistical evidences to support the research results and interpretation of data with the use of tables and pictorial representations

Present research data in a scientific manner and Understand the key elements of a research report and various applications of computer in Nutrition research.

UNIT	Contents	No.of Hours
I	Foundation of Nutrition Research - Meaning, Objectives and Classification of Research –Exploratory, Descriptive– Longitudinal and Cross sectional, Observation-Participant and Non-participant, Epidemiological Surveillance, Retrospective, INVIVO, INVITRO and Experimental – Pre-Experimental, Quasi Experimental, True Experimental and Statistical Experimental designs. - Need of Research in Food Science and Nutrition - Research Process- • Selection and Formulation of Research Problem • Objectives of Research: Explanation, Control and Prediction • Hypothesis: Definition, Importance, Types and Errors- I&II Deciding Variables	12
II	Sampling and Sample Design Sampling Process and Characteristics of good Sampling	12

	1. Classification of Sampling Techniques- Probability and Non Probability Sampling 2. Preparation of Laboratory Food Samples 3. Sampling and Non-Sampling Errors Measurements and Scaling- 1. Fundamental and Comparative Scales– Meaning and types • Nominal Scale • Ordinal Scale • Interval Scale • Ratio Scale 2. Non comparative Scales–Meaning and types 1. Continuous Rating Scale 2. Itemized Rating Scale • Likert Scale • Semantic Differential Scale • Stapel Scale	
III	Data Collection and Preparation Data Collection Tools-Primary Data 1. Interviews-structured and unstructured 2. Case studies 3. Questionnaire 4. Surveys–Pilot &KAP 5. Laboratory Experiments Secondary Data 1. Published Sources 2. Unpublished Sources 3. Reliability and Validity of Tools–Meaning 4. Data Preparation Process– • Editing • Coding • Classification Tabulation	12
IV	Statistical Methods 1. Parametric andNon-Parametric tests–Differenceand Applications • Data Analysis Process- 2. Descriptive Analysis- • Graphical and Diagrammatic Presentations • Central Tendency– Mean, Median &Mode • Dispersion-Standard Deviation 3. Statistical Inference–Tests of Hypothesis • t – test • ANOVA– One Way & Two Way • Chi-square test–Goodness of Fit &Test of Independence	12

V	Reporting the Findings and Computer Applications 1. Report Writing– • Importance • Types • Mechanics • Guidelines and Precautions • End Notes- Bibliography, Appendices, Footnotes and Glossary of terms 2. Computer applications in nutrition research-importance and uses 3. Applicable Statistical Analysis Software- • Literature Searching- PubMed • Data Analysis- Micro Soft Excel, SPSS, Minitab • Plagiarism Checker–Turnitin, Scribbr	10

YEAR I- SEMESTER I

Subject Code	SubjectName	Category	L	T	P	S	Credits	Inst. Hours	Marks		
									CIA	External	Total
	ADVANCED DIETETICS	Core-V	5				5	15	25	75	100

Course Outcome

On completion of this course, Students will be able to

CO1 (K1 & K2 – Remembering and Understanding)

Critique the Nutritional screening technique

CO2 (K3 – Applying)

Comprehend the current concepts of therapeutic diets and critically ill

CO3 (K4 – Analyzing)

Implement the dietary principles on various disorders.

CO4 (K5 & K6 – Evaluating and Creating)

Acquire the knowledge of diet counseling skills.

Apply the dietary principles to manage the lifestyle Disorders in the society

UNIT	Contents	No.of Hours
I	- Nutritional screening, Nutritional care process, Nutritional Assessment, Nutritional diagnosis, Nutritional Intervention, Monitoring and evaluation. - Basic concepts of diet therapy –Therapeutic adaptations of Normal diet, Principles and classification of therapeutic diets. Routine Hospital diets – Regular, soft, fluid diet - Nutritional Management in critical care -Nutritional screening and nutritional Status assessment of critically ill, Nutritional requirement according to the critical condition - Nutritional support systems: Enteral and parenteral nutrition support-Types, composition and complications.	12
II	Medical Nutrition therapy for gastrointestinal and liver disorders Upper Gastrointestinal tract Diseases – Nutritional care and diet therapy in Diseases of oesophagus- Oesophagitis, Gastroesophageal reflux disease [GERD] and Hiatushernia. - Disorders of stomach: Indigestion, Gastritis, Gastric and duodenal	12

	ulcers, and dumping syndrome • Lower gastrointestinal tract Diseases/Disorders-Common Symptoms of Intestinal dysfunction-Flatulence, constipation, haemorrhoids, diarrhoea, steatorrhoea, Diseases of the large intestine-Diverticular disease, Irritable bowel syndrome, inflammatory bowel disease • Diseases of Small intestine- Celiac disease, tropical sprue, intestinal brushborder enzyme deficiencies. • Diseases of the Liver- hepatitis, hepatic coma, cirrhosis, cholecystitis, cholelithiasis and pancreatitis, Zollinger Ellison syndrome and biliary dyskinesia.	
III	Medical Nutrition therapy for Pulmonary disease-Effect of Malnutrition on pulmonary system, effect of pulmonary disease on nutritional status, chronic pulmonary diseases-Asthma, cystic fibrosis, chronic obstructive pulmonary disease and Pneumonia- Pathophysiology and dietary management. Medical Nutrition therapy for Rheumatic disease- Etiology, Pathophysiology of Inflammation of Rheumatic diseases, Rheumatoid Arthritis, Osteoarthritis and Sjögren's syndrome. Nutritional management of physiological stress- Classification, Complications, Metabolic changes in protein and electrolytes and Dietary management of burns, dietary management of trauma and stress.	12
IV	• Nutritional Management on Weight imbalance -Regulation of food intake and pathogenesis of obesity and malnutrition and starvation; Weight Imbalance: prevalence and classification. • Underweight-Etiology and Dietary management; Obesity-Etiology, classification, Energy balance, dietary modifications and Bariatric surgery-types and dietary modifications of pre and post bariatric surgery. • Nutritional Management in metabolic disorders- Prevalence, Etiology, risk factors, complications and dietary modifications of diabetes mellitus.	12
V	• Nutritional management of cardiovascular diseases-etiology, risk factors,	10

	clinical features and dietary modifications of Dyslipidemias, Atherosclerosis, Hypertension, Ischemic heart disease, Congestive cardiac failure. • Nutrition Management of Renal Disease -Etiology, Clinical and metabolic manifestations, Diagnostic tests, Types-Glomerulonephritis, Nephrotic syndrome, Renal Failure: Acute and chronic, ESRD, Nephrolithiasis and Dietary modifications. • Nutritional management in cancer- Pathogenesis and progression of cancer, types, Symptoms and Dietary management.

Subject Code	SubjectName	Category	L	T	P	S	Credits	Inst. Hours	Marks		
									CIA	External	Total
	ADVANCED DIETETICS PRACTICAL	CORE VI	4				4	15	50	50	100
Course Outcome On completion of this course, Students will be able to CO1 (K1 & K2 – Remembering and Understanding) Evaluate various therapeutic diets CO2 (K3 – Applying) Identify the requirements for disease conditions and critically ill patients. CO3 (K4 – Analyzing) Assess and plan the diets for various disease conditions. CO4 (K5 & K6 – Evaluating and Creating) Create Knowledge in nutrient calculations and dietary principles. Design the personalized diets for different individuals in the society											
UNIT		Contents									
		1. Routine hospital diet: Regular diet, clear liquid, soft diet, Full liquid diet and Planning and preparing Enteral feed plan [8 hrs]. 2. Assessing requirements and planning diet for obese and underweight individual [6 hrs] 3. Planning and preparing diet for Diabetes Mellitus [IDDM and NIDDM] [6hrs]. 4. Planning and preparation of diet for Atherosclerosis with hypertension [6hrs] 5. Assessing and planning diets for the following conditions [13hrs] - Celiac disease - Lactose intolerance. - GERD - Peptic ulcer - Hepatitis - Cirrhosis 6. Planning and preparing diet for Pneumonia [6 hrs] 7. Planning and preparing diet for Rheumatic arthritis [6hrs] 8. Planning and preparation of diet for Glomerulo nephritis [6hrs] 9. Planning and preparation of diet for cancer according to the condition. [6 hrs] 10. Planning and Preparing diet for pre and post Bariatric surgery patients. [6									

	hrs] 11. Assessment and planning diet for post burn condition. [6 hrs]. 3

YEAR I- SEMESTER II											
Subject Code	SubjectName	Category	L	T	P	S	Credits	Inst. Hours	Marks		
									CIA	External	Total
	ADVANCED NUTRITIONAL BIOCHEMISTRY	ELECTIVE (GENERIC/ DISCIPLINE CENTRIC) - III	3				3	10	25	75	100

Course Outcome

On completion of this course, Students will be able to

CO1 (K1 & K2 – Remembering and Understanding)

Understand the role of enzymes and coenzymes in biological oxidation.

CO2 (K3 – Applying)

Gain knowledge on metabolism and regulation of carbohydrate.

CO3 (K4 – Analyzing)

Understand the concept to metabolism and bioenergetics of lipids.

CO4 (K5 & K6 – Evaluating and Creating)

Discuss the classification, structure, organization and metabolic pathway of protein.

Comprehend the biological metabolism and functions of nucleic acid and understand recent concepts in biochemistry.

UNIT	Contents	No.of Hours
I	Biological oxidation and enzymes - Biological oxidation, Electron transport chain and Oxidative Phosphorylation. Enzymes – Definition, Types, mechanism of action, factors affecting enzyme activity, coenzyme, Role of B vitamin as coenzyme. - Free radicals – definition, formation in biological systems. Antioxidants – definition, Role of antioxidants in prevention of degenerative disorders	12
II	Metabolism of Carbohydrates: Glycolysis, The Citric Acid Cycle, Glycogenesis, glycogenolysis, gluconeogenesis, The Hexose Monophosphate Shunt and Bioenergetics. Hormonal regulations of blood glucose homeostasis	12
III	Protein and amino acid metabolism Classification of amino acids, Oxidative Deamination, decarboxylation, transamination and trans methylation of amino acids, urea cycle, biosynthesis of non-essential amino acids, catabolism of essential amino acids. Protein biosynthesis.	12

IV	Metabolism of Lipids: Classification of fatty acid, Biosynthesis of fatty acids, beta oxidation of fatty acids and ketone bodies. Essential fatty acids – types and functions. Metabolism of phospholipids, and cholesterol. Lipoproteins – classification and function.	12
V	• Overview of intermediary metabolism of carbohydrates, protein and lipid. Hormonal regulation of carbohydrate protein and fat metabolism • Structural components and functions of nucleic acid, Structure of DNA, DNA Replication, RNA synthesis – types and functions and metabolism, translation. • Recombinant DNA technology, Metabolism of Xenobiotics, Nutrigenomics	10

	COMPUTER IN NUTRITION RESEARCH	ELECTIVE (GENERIC/ DISCIPLINE CENTRIC) - III	3				3	10	25	75	100

Course Outcome

On completion of this course, Students will be able to

CO1 (K1 & K2 – Remembering and Understanding)

The student will gain knowledge on computer applications.

CO2 (K3 – Applying)

The knowledge on Operating system and MSOffice will be enhanced.

CO3 (K4–Analyzing)

Acquire knowledge on computer networks.

CO4 (K5 & K6 – Evaluating and Creating)

To gain knowledge on computer networking system and apply in the field of food science, nutrition and research.

UNIT	Contents	No.of Hours
I	Introduction to Computers, History of Development of Computers, Main Frame, Minis, Micros and Super Computer Systems, Binary numbers, Bits, Bytes, CPU, Input and Output Devices, Recent software in Food and Nutrition.	6
II	Operating Systems and MS Office Introduction to Operating Systems, Windows Applications MSWord, MS Excel. MS Access and MS Power Point.	6

III	Nutrition software and websites, e-journals in Food Science and Nutrition, Use of SPSS.	6
IV	Application of Computers in Food Science and Nutrition-Power Point presentation, nutrient and diet calculations, nutrition education and counseling	6
V	Research Problem: defining a research problem, selecting the problem, and technique involved in defining a problem. Thrust areas in research in Food Science.	6

	HUMAN FACTORS AND ERGONOMICS	ELECTIVE (GENERIC/DISCIPLINE CNTRIC)-IV	3				3	10	25	75	100

Course Outcome

On completion of this course, Students will be able to

CO1 (K1 & K2 – Remembering and Understanding)

Explain the concepts, principles, scope, and physiological foundations of ergonomics, job analysis, work physiology, posture, workload, and cardio-respiratory fitness.

CO2 (K3 – Applying)

Apply ergonomic principles, anthropometric measurements, posture assessment techniques, fitness evaluation methods, and workload assessment tools in occupational and household work settings.

CO3 (K4 – Analyzing)

Analyze work situations, postures, physiological responses, energy expenditure, workload, and fitness parameters to assess occupational efficiency and health outcomes.

CO4 (K5 & K6 – Evaluating and Creating)

Evaluate ergonomic conditions and physiological performance, and design appropriate interventions, workstations, tools, and work practices to improve occupational health, safety, and productivity.

UNIT	Contents	No. of Hours
I	Introduction to Ergonomics - Definition, History and evolution. Scope of Ergonomics in home and other occupations, Nature of work in household and other occupations, Human Body and Work: Physiology of Neuro-muscular function in relation to occupational ergonomics; Physiological factors in muscle work; Physical work capacity; Energy requirement for muscular work; Energy expenditure for different activities; Endurance and muscular strength.	
II	Job Analysis - Significance of job analysis for occupational ergonomics, Fundamental elements of job analysis. Anthropometry in relation to occupational ergonomics. Postures-Definition and Scope.	

III	Application of Ergonomic Principles in: Tool Evaluation and Design; Work Station Evaluation and Design; Maintenance of Postures. Identifying types of postures assumed during work, analysis and interpretation, Effect of wrong postures on cardio-vascular and muscular skeletal system, Correct techniques of lifting and carrying weights	
IV	Physiological Aspects of Work, Structure and Function of the muscles, Biochemistry of muscle work. Physiological factors involved in muscular work. Carbohydrates, fats and protein, Oxygen, Cardio-Vascular and Respiratory system, Thermo- regulatory system, Endurance and muscular strength, Skill, Maximal work, Speed, Factors affecting physiological reactions doing work, Workload and posture	
V	Cardio-Respiratory Fitness- Anthropometric measurements and Physical Fitness Index, Body composition - body fat % , Body surface area, lean body mass by skin fold method and Somato typing. Maximum aerobic capacity using modified Harvard test (Queens college test), Determination of workload using heart rate and oxygen consumption-Tread mill, steps tool, Heart rate and oxygen consumption, Pulserate, Time and motion study. Energy cost. Assessment of Physical work capacity(PWC)

	FOOD PRESERVATION	SKILL ENHANCEMENT COURSE SEC NME-1	2				2	2	25	75	100
Course Outcome On completion of this course, Students will be able to CO1 (K1 & K2 – Remembering and Understanding) Describe the basic concepts and principles of Food Preservation CO2 (K3 – Applying) Identify the best methods of storage of different foods based on their shelf life. Recommend appropriate postharvest technology procedures that increase shelf life of food CO3 (K4 – Analyzing) Analyze the use of low and high temperature to preserve food and identify the appropriate method to preserve different foods CO4 (K5 & K6 – Evaluating and Creating) - Discuss the use and effects of different preservatives on the quality of foods. - Appreciate the use of modern technology in food preservation and managing food wastage.											
UNIT	Contents									No.of Hours	
I	Introduction to Food Preservation Concept, the importance of food preservation, Common terms used in food preservation. Different methods and Principles of preservation.									6	
II	Preservation by Low Temperature Use of Cold and Refrigerated Storage, Use of Freezing temperatures: Slow and fast freezing of foods and Cryogenic freezing of foods, dehydrofreezing, Frozen storage and thawing of foods.									6	
III	Preservation by High Temperature Preservation of foods by high temperatures. Blanching, Pasteurization and Sterilization of foods. General process of canning of foods									6	

IV	- Preservation by Drying Principles and application of drying and dehydration of foods Different types of drying and dryers.	6
V	Preservation by Chemical Methods - Preservation by Chemical Methods: Use of preservatives (e.g., salts, sugars, acids) and chemical additives in food preservation. - Application of chemical preservatives in different types of foods.	6
