Accounts of Insurance companies: Life Insurance and General Insurance – Preparation of various schedules and final accounts. Simple problems.

Unit V : Double Accounting & Accounts of Holding Companies:

Double Accounting – Accounts of Electric supply companies (including railways and public utilities). Replacement of assets – preparation of final accounts. **Accounts of Holding companies:** steps involved in preparation of consolidated balance sheet – legal provisions – simple problems.

ADVANCED CORPORATE ACCOUNTING

UNIT-I

ALTERATION OF SHARE CAPITAL & AMALGAMATION, ABSORPTION AND RECONSTRUCTION

Internal Reconstruction or Capital Reduction - Meaning

Reconstruction refers to reorganization of the capital structure of a company. The claims of both the shareholders and creditors against a company with a bad or sinking financial position necessitate a scheme of capital reconstruction which is called as Internal Reconstruction.

This arrangement made for the following purposes:

- i) Reduction of share capital
- ii) To differentiate the rights of different types of shareholders, debenture holders and creditors.
- iii) To write off the accumulated losses of the company.
- iv) To reduce the overvaluation of assets of the company.

Alteration of Share Capital

Alteration of share capital can be done under the provision of Sections 94 to 97 of the Companies Act 1956. This includes the following:

- i) Increasing the share capital by issue of fresh shares.
- ii) Consolidation of shares means conversion of all or part of existing shares of smaller amounts into shares of larger amounts.
- iii) Sub-division of Shares means dividing all or part of the existing shares of larger amounts into shares of smaller amounts.
- iv) Conversion of fully paid up shares into stock and vice-versa.
- v) Cancellation of unissued Shares

Reduction of Share Capital

Reduction of capital means cancellation of any paid-up share capital which is lost or unrepresented by available assets.

Different ways of Capital Reduction

There are three ways of capital reduction :

- i) Reducing or extinguishing the uncalled liability of shareholders.
- ii) Reducing by returning the excess paid-up capital of the company which is found to be in surplus of the needs of the company.
- iii) Reducing or cancelling or writing off paid up capital which is lost and not represented by assets.

Procedure for Reducing share capital

- i) The Articles of Association of the company should permit such reduction.
- ii) A special resolution should be passed at shareholders meeting.
- iii) Confirmation of the court for capital reduction must be obtained.
- iv) A copy of the resolution to reduce capital and the court's order of confirmation should be filed with the Registrar of Joint Stock Companies.

Internal Reconstruction (capital Reduction) Journal Entries:-

1. For reducing the equity capital without reducing the liability

Equity Share Capital a/c Dr
 To Capital Reduction a/c
(Being the paid-up equity share capital reduced)

2. For reducing the face value and paid up value of equity capital

Eq. Share Capital a/c Dr
(Old share with full value)
 To Eq. Share Capital a/c
 (New share with reduced value)
 To Capital Reduction a/c
(Being the face value and paid up value of Eq. share capital reduced)

3. For reducing the Preference share

-% Pref. share capital a/c Dr
(Old share with old value)
 To -% Pref. Share Capital
 (New share with reduced value)
 To Capital Reduction
(Being reduction of paid up value of P.share)

4. On sacrifice by the debenture holders / creditors

Debenture holders a/c Dr
Creditors a/c Dr
 To Capital Reduction a/c
(Being the claim of debenture holder & creditors reduced)

5. For eliminating past losses and writing down the value of assets

Capital Reduction a/c
 To Profit & Loss a/c
 To Preliminary expenses a/c
 To Goodwill a/c
 To Discount on Debentures a/c
 To Patents a/c
 To Plant & Machinery
 To Others
(Being various losses written off and assets written down)

6. For transferring the capital reduction a/c balance, if any

Capital Reduction a/c Dr
 To Capital Reserve a/c
(Being the balance of capital reduction a/c transferred to capital reserve a/c)

SOLVED PROBLEMS

Problem No.1

Moon Ltd., having a share capital of Rs.3,00,000 divided into 3,000 shares of Rs.100 each, resolves to sub-divide the shares into 30,000 shares of Rs.10 each. Pass the necessary journal entry.

Books of Moon Ltd.

Journal Entry

Date	Particulars	L.F	Dr.	Cr.
	Share Capital (Rs.100) A/c Dr To Share Capital (Rs.10) A/c (Being 3,000 shares of Rs.100 each sub-divided into 30,000 shares of Rs.10 each as per Board's resolution dated)		3,00,000	3,00,000

Problem No.2

The following is the Balance Sheet of Star Ltd on 31.03.2021

Liabilities	Rs.	Assets	Rs.
1,00,000 equity shares of Rs.10 each		Land	1,00,000
	10,00,000	Plant & Machinery	2,30,000
Sundry Creditors	1,73,000	Furniture & Fittings	68,000
		Stock	1,50,000
		Debtors	70,000
		Cash at Bank	5,000
		P & La/c	5,50,000
	11,73,000		11,73,000

Scheme of Capital Reduction was:

- a) The equity shares to be reduced to Rs.4 per share.
- b) Plant and Machinery to be written down to Rs.1,50,000.
- c) Stock to be revalued at Rs.1,40,000.
- d) The provision on debtors for doubtful debts to be created Rs.2,000.
- e) Land to be revalued at Rs. 1,42,000.

Pass journal entries to give effect to the above arrangement and also prepare reconstruction a/c.

Solution:

Journal Entries

Date	Particulars	L.F.	Debit Rs.	Credit Rs.
	Equity Share Capital a/c (Rs.10) Dr.		10,00,000	
	To Equity Share Capital a/c (Rs.4)			4,00,000
	To Capital Reduction a/c			6,00,000
	(Being the Rs. 10 equity shares converted into Rs. 4 equity share and the balance transferred to capital reduction a/c)			
	Land a/c Dr.		42,000	
	To Capital Reduction a/c			42,000
	(Being the appreciation of Land taken for capital reduction)			
	Capital Reduction a/c Dr.		6,42,000	
	To Profit & Loss a/c			5,50,000
	To Plant & Machinery a/c			80,000
	To Stock a/c			10,000
	To Provision for Doubtful Debts a/c			2,000
	(Being the accumulated loss written off and the assets were reduced)			

Capital Reduction a/c

Particulars	Rs.	Particulars	Rs.
To Plant and Machinery a/c	80,000	By Equity Share Capital a/c	6,00,000
To Stock a/c	10,000	By Land a/c	42,000
To Provision for Doubtful debts a/c	2,000		
To Profit & Loss a/c	5,50,000		
	6,42,000		6,42,000

Problem No.3

The Balance sheet of Anbu Ltd on 31.12.2019 was as follows.

Liabilities	Rs.	Assets	Rs.
Authorized capital 20,000 shares of Rs.100 each	20,00,000	Land and Buildings	1,00,000
Subscribed capital 19,000 Share of Rs.10 each	19,00,000	Machinery	2,60,000
Creditors	1,00,000	Furniture	20,000
Due to Raju & Co.,	1,00,000	Stock	3,70,000
		Debtors	1,80,000
		Goodwill	2,00,000
		Profit & Loss a/c	9,70,000
	21,00,000		21,00,000

The following scheme of reconstruction was followed

- The 19000 shares of Rs.100 each are to be reduced to an equal number of fully paid shares of Rs.40 each.
- The amount Rs.1,00,000 due to Raju & Co., was also to be reduced the remaining 1000 unissued shares being issued to them as fully paid up shares of Rs.40 each in full settlement of the amount due to them.
- The amount available by the above reduction is to be utilized in writing off the goodwill, profit and Loss a/c and in writing down the value machinery.

Pass necessary journal entries and prepare the Balance sheet.

Solution:

1. 19,000 shares are reduced to Rs.40 each

Old Equity share capital a/c Dr	19,00,000(19000x100)
To New Equity share capital a/c	7,60,000(19000x40)
To capital Reduction a/c	11,40,000(19000x60)

2. Raju & Co., a/c settled by issuing 1000 shares of Rs.40 each

Raju & Co., a/c Dr	100000	
To Equity share capital (1000sharesxRs.40)		40,000
To Capital reduction a/c(1000hsaresxRs.60)		60,000

3. Utilisation of capital Reduction account:-

Capital Reduction a/c Dr	12,00,000	
To Goodwill a/c		2,00,000
To profit & Loss a/c		9,70,000
To Machinery a/c		30,000

Balance sheet (and Reduced)

Liabilities	Rs.	Assets	Rs.
Authorised capital			
20,000shares of	<u>8,00,000</u>	Land & Building	1,00,000
Rs.40each		Machinery	2,30,000
Subscribed capital:		Furniture	20,000
20,000 share of	8,00,000	Stock	3,70,000
Rs.40 each		Debtors	1,80,000
Creditors	<u>1,00,000</u>		
	<u>9,00,000</u>		<u>9,00,000</u>

Amalgamation - Meaning

When two or more existing companies doing similar business go into liquidation and form a new company is called amalgamation.

Example: Hero + Honda = Hero Honda, Maruti + Suzuki = Maruti Suzuki

Absorption - Meaning

When one existing company takes over the business of one or more existing companies it is called absorption. Here no new company formed.

Example: Hutch + Vodafone = Vodafone

Reconstruction

The reconstruction is needed when a company has financially suffered due to heavy accumulated losses. For this purpose the company reorganized their financial structure it is called Reconstruction. Reconstruction may be two types.

i) External Reconstruction:

External reconstruction means the winding up of an existing company goes into liquidation and a new company is formed to taken over the business of the liquidated company which is similarly named and owned by the same shareholders.

ii) Internal Reconstruction:

It is neither liquidation nor formation of a new company. It means reduction of share capital and rearrangement of share capital and reorganization. In this case the capital structure of company is being reorganized. Thus internal reconstruction means reduction of capital to cancel any paid up share capital which is lost or unrepresented by available assets.

Purchase consideration:

Purchase consideration means the amount paid by the purchasing company to the liquidators of the selling company. The purchasing company may pay purchase amount in the form of cash, shares and debentures of a company.

Methods of Computing Purchase Consideration

The following are the different methods for calculating the amount of purchase consideration.

i) Lump Sum Method

Under this method, the purchase consideration is the agreed amount paid in lump sum.

ii) Net Payment Method

Under this method, the purchase consideration is calculated by adding the various payments made by the purchasing company in the form of cash, shares and debenture.

iii) Net assets method:

Under this method, the purchase consideration is calculated by adding the value of all assets taken over and deduct there from the amount of liabilities taken over by the purchasing company.

iv) Intrinsic value method or Value of share method or Shares exchanged method

Under this method, the purchase consideration is calculated on the basis of the ratio in which the shares of purchasing company are exchanged for the shares of selling company.

$$\text{Intrinsic value} = \frac{\text{Assets available for equity shareholders}}{\text{Number of equity share}}$$

Types of Amalgamation

According to AS – 14 amalgamations can be classified into two main categories.

- i) Amalgamation in the nature of merger and
- ii) Amalgamation in the nature of the purchase

i) Amalgamation in the nature of merger

An amalgamation should be considered to be an amalgamation in the nature of merger when all the following conditions are satisfied:

1. All the assets and liabilities of the transferor company become, after amalgamation, the assets and liabilities of the transferee company.
2. Shareholders holding not less than 90% of the face value of the equity shares of the transferor company (other than equity shares already hold by the transferee company or its subsidiaries or their nominees) become equity shareholders of the transferee company by virtue of the amalgamation.
3. The consideration for the amalgamation receivable by those equity shareholders of the transferor company who agree to become equity shareholders of the transferee company is discharged by the transferee company wholly by the issue of equity share in the transferee company, except that cash may be paid in respect of any fractional shares.
4. The business of the transferor company is intended to be carried on, after amalgamation, by the transferee company.
5. No adjustment is intended to be made to the book values of the assets and liabilities of the

transferor company when they are incorporated in the financial statements of the transferee company except to ensure uniformity of accounting policies.

ii) Amalgamation in the nature of purchase

Amalgamations which do not satisfy one or more conditions specified for amalgamations in the nature of merger should be treated as 'Amalgamations in the nature of purchase'.

Methods of Accounting for Amalgamation

There are two main methods of accounting for amalgamation.

- i) The pooling of interest method and
- ii) The purchase method.

Internal Reconstruction Vs External Reconstruction

Internal Reconstruction	External Reconstruction
A company is to reorganize its capital structure or reduction of share.	One company goes into liquidation (closed).
No new company is formed	New company is formed
Capital is reduced due to construction.	Share capital is not reduced due to reconstruction.
Internal arrangement	External arrangement
It does not take over other company assets and liabilities	It takes over other company assets and liabilities

Preliminary expenses A/c Dr

To Bank A/c

[Being formation expenses paid]

6. For payment of any Debentures of transferor company

Debentures (Transferor Co.,) A/c Dr

To Debentures A/c

To Bank A/c

[Being payment made to debenture holders of Transferor Co., as per agreement]

7. For payment to creditors of Transferor Co.

Creditors (Transferor Co.,) A/c Dr

To Bank A/c

[Being payment as per agreement]

(II) In case of Amalgamation in the nature of purchase, under Purchase Method:

1. For Purchase consideration payable

Business purchase A/c Dr

To Liquidator of Transferor Co.,

[Being purchase price payable]

2. For Assets and Liabilities taken over

Sundry Assets A/c

(Each asset separately) Dr

Goodwill A/c Dr

To Sundry Liabilities A/c

(Each liability separately)

To Business purchase A/c

To Capital Reserve A/c

[Being assets and liabilities taken over and goodwill/capital reserve there on]

Note: In the above entry, either goodwill or capital reserve will be the Balancing figure.

3. For Payment of Purchase price

Liquidator of Selling Co. A/c Dr
 To Bank A/c
 To Share Capital A/c
 To Securities Premium A/c
 To Debentures A/c

[Being purchase price paid in the form of cash, shares and debentures]

4. For expenses of Liquidation agreed to be paid by Transferee Co.

Goodwill A/c Dr
 To Bank A/c

[Being expenses agreed to be paid]

5. For Formation expenses of Transferee Co.,

Preliminary expenses A/c Dr
 To Bank A/c

[Being formation expenses paid]

6. For statutory reserves of the Transferor Co. to be continued

Amalgamation adjustment A/c Dr
 To Statutory Reserves A/c

[Being reserves to be continued]

7. For settlement of Debentures holders or creditors of Transferor Co.,

Debentures (transferor co.) A/c Dr
 Creditors (transferor co.) A/c Dr
 To Debentures A/c
 To Bank A/c

[Being settlement of Transferor company's liabilities as per agreement]

Problem No.4

A Co.Ltd. agreed to acquire the assets excluding cash as on 31st December 2020 of B Co.Ltd. The balance sheet of B Ltd. as on that date was:

Liabilities	Rs.	Assets	Rs.
Equity capital Rs.10each	3,00,000	Goodwill	60,000
General reserve	60,000	Land & Building	1,20,000
Debentures	50,000	Plant & Machinery	2,00,000
Creditors	10,000	Stock	80,000
Profit & Loss	80,000	Debtors	30,000
		Bank	10,000
	5,00,000		5,00,000

The consideration was as follows:

- a) A cash payment of Rs.4 for every shares of B Ltd.
- b) The issues of one share of Rs.10 each (Market value Rs.12.50) in the A Co. Ltd. For every share in B Co.Ltd.
- c) The issue of 1100 debentures of Rs.50 each in A Co.Ltd.to enables B Ltd to discharge its debentures at a premium of 10%.
- d) The expenses of liquidation of B Ltd. Amounting to Rs.4000 were to be met by themselves.

Give the journal entries in the books of both the companies.

Problem No.6

White Ltd agreed to acquire the business to Green Ltd as an 31st December 2020,
The Balance sheet of Green Ltd on that date was as follows:

Liabilities	Rs.	Assets	Rs.
Share capital in fully paid shares of Rs.10	6,00,000	Goodwill	1,00,000
General Reserve	1,70,000	Land and Buildings	3,00,000
Profit & Loss a/c	1,10,000	Plant	3,40,000
6% Debentures	1,00,000	Stock	1,68,000
Creditors	20,000	Debtors	36,000
		Cash	56,000
	10,00,000		10,00,000

The consideration payable by White Ltd was agreed as follows

- a) A cash payment equivalent to Rs.2.50 for every Rs.10 shares in Green Ltd.
- b) The issue of Rs. 90,000 Rs.10 shares fully paid in white Ltd having an agreed value of Rs.12.50pershare.
- c) The issue of such an amount of fully paid 5% Debenture of white Ltd at 96% as is sufficient to discharge the 6% Debentures of Green Ltd at a premium of 20%.The directors of white Ltd valued Land and Buildings at Rs.4,00,000 and created 5% provision on debtors. Expenses of Liquidation Rs.6,000 were paid by white Ltd.

Give journal entries to close the books of Green Ltd. and to record the acquisition of business in the books ofwhite Ltd.

Solution:

Calculation of purchase consideration:

Form	Amounts
1) Cash 60,000 shares x Rs.2.50	= 1,50,000
2) Equity shares 90,000 shares xRs.12.50	= 11,25,000
3) 5% Debentures1,00,000x20/100	= <u>1,20,000</u>
Purchase consideration	= <u>13,95,000</u>

Journal entries:

In the books of Green Ltd (Liquidator of Vendor company)

1) Assets taken over by white Ltd (Book value)

Realisation a/c Dr	10,00,000	
To Good will a/c		1,00,000
To Land and Building a/c		6,40,000
To Stock a/c		1,68,000

Unit –II

Valuation of Goodwill & Liquidation of Companies

Valuation of Goodwill

Meaning of Goodwill

Goodwill means the ‘good name’ or the ‘reputation’ of the business house. It is an Intangible asset. It helps to earn more profits in future.

Definition of Goodwill

“Goodwill is the present value of a firm’s anticipated excess earnings”.

- Dr.Canning

“The capacity of a business to earn profits in future is basically what is meant by the term goodwill”.

- J.O.Magee

Factors determining the value of Goodwill

The following are the main factors which affect the value of the goodwill of the firm.

1. Profitability:

The term profitability refers to the profit which the firm’s expected to earn in future. The profit earning capacity of the business depends upon

- i) Nature of business and goods
- ii) Location of business
- iii) Efficiency of management and employees.

2. Normal rate of return

It refers to the rate of earnings which investors in general expect on their investment in a particular type of industry.

3. Capital employed

The term capital employed represents the equity shareholders funds in the company along with long term borrowings.

1. Other factors

Some other factors are also determining the value of goodwill. They are

- i) Market conditions
- ii) Competition
- iii) Better financial relationship
- iv) Risk in business

Methods of valuation of goodwill

The following methods are followed for valuing goodwill

1. Average profit method
2. Super profit method
3. Capitalisation method

1. Average profit method.

This method is adopted by sole traders and partnership firm. Under this method goodwill is valued on the basis of an agreed number of year's purchase of the average maintainable profit.

$$\text{Average profit} = \frac{\text{Total Profits for all the years}}{\text{Number of years}}$$

$$\text{Value of goodwill} = \text{Average Profit} \times \text{No. of year's purchase}$$

2. Super profit method:-

Super profit is the difference between average profits and normal profits.

$$\text{a) Super profit} = \text{Average profit} - \text{Normal profit}$$

$$\text{b) Goodwill} = \text{Super profit} \times \text{Number of year's purchase}$$

$$\text{i) Normal profit} = \text{Average capital employed} \times \text{Normal rate of return}$$

$$\text{ii) Average capital employed} = \text{Opening (or) Closing Capital employed} + \frac{1}{2} \text{ of the profit}$$

3. Capitalisation Method:

Under this method the goodwill will be the difference between the total value of the business and its net assets.

$$\text{Capitalised value of profit} = \frac{\text{Average maintainable profit} \times 100}{\text{Normal rate of return}}$$

$$\text{Value of goodwill} = \text{Capitalised value of profit} - \text{Net Tangible Assets}$$

$$\text{Note: Net Tangible Assets} = \text{Total assets (excluding goodwill)} - \text{Liabilities}$$

Problem No.1

Calculate the amount of goodwill on the basis of 3 years purchase of the last five years' average profits. The profits for the last five years are: 8,200; 10,500; 5,100; 7,700; 12,000.

Years	Rs.
I year	8,200
II year	10,500
III year	5,100
IV year	7,700
V year	12,000
Total	43,500

Solution:

Calculation of Average Profit

$$\begin{aligned}\text{Average profit} &= \frac{\text{Total Profits for all the years}}{\text{Number of years}} \\ &= 43,500/5 = \text{Rs.}8,700\end{aligned}$$

$$\begin{aligned}\text{Value of goodwill} &= \text{Average Profit} \times \text{No.of years' purchase} \\ &= \text{Rs.}8,700 \times 3 = \text{Rs.}26,100.\end{aligned}$$

Problem No.2

Goodwill is to be valued at 2 years purchase of five years' average profits. The profits for the last five years of the firm were:

2014 – Rs.24,000;

2015 – Rs.30,000;

2016 – Rs.34,000;

2017 – Rs.32,000;

2018 – Rs.40,000.

Calculate the amount of goodwill.

Solution:

Calculation of Average Profit

Years	Rs.
2014	24,000
2015	30,000
2016	34,000
2017	32,000
2018	40,000
Total	1,60,000

$$\begin{aligned} \text{Average profit} &= \frac{\text{Total Profits for all the years}}{\text{Number of years}} \\ &= 1,60,000/5 = \text{Rs.}32,000 \end{aligned}$$

$$\begin{aligned} \text{Value of goodwill} &= \text{Average Profit} \times \text{No.of years' purchase} \\ &= \text{Rs.}32,000 \times 2 = \text{Rs.}64,000. \end{aligned}$$

Problem No.3

A firm earned net profits during the last three years as follows:

I year	Rs.36,000
II year	Rs.40,000
III year	Rs.44,000

The capital investment of the firm is Rs.1,00,000.

A fair return on the capital, having regard to the risk involved is 10%.

Calculate the value of goodwill on the basis of 3 years' purchase of super profit.

Solution:

i) Calculation of average profit

I year	36,000
II year	40,000
III year	44,000

$$\begin{aligned} &===== \\ \text{Total profit} & 1,20,000 \\ &===== \end{aligned}$$

$$\begin{aligned} \text{Average profit} &= \frac{\text{Total Profits for all the years}}{\text{Number of years}} \\ &= 1,20,000/3 = \text{Rs.}40,000. \end{aligned}$$

ii) Calculation of normal profit

$$\begin{aligned} \text{Normal profit} &= \text{Capital employed} \times \text{Normal rate of return} \\ &= 1,00,000 \times 10\% \\ &= \text{Rs.}10,000. \end{aligned}$$

iii) Calculation of super profits

$$\begin{aligned}\text{Super profit} &= \text{Average profit} - \text{Normal profit} \\ &= \text{Rs.40,000} - \text{Rs.10,000} \\ &= \text{Rs.30,000.}\end{aligned}$$

iv) Calculation of value of goodwill

$$\begin{aligned}\text{Goodwill} &= \text{Super profits} \times \text{No.of years' purchase} \\ &= \text{Rs.30,000} \times 3 \\ &= \text{Rs.90,000.}\end{aligned}$$

Problem No.4

From the following information calculate the value of goodwill according to super profit basis at five years purchase.

Average capital employed in the business Rs.5,00,000. Net trading profits of the concern for the past four years:

Rs.1,00,000; Rs.1,20,000; Rs.1,40,000; Rs.1,60,000.

Rate of interest expected from capital having regard to the risk involved 15%. Fair remuneration to the proprietor for services Rs.30,000 per annum.

Solution:

i) Calculation of average profit

I year	1,00,000
II year	1,20,000
III year	1,40,000
IV year	1,60,000

$$\begin{aligned}& \text{=====} \\ \text{Total profit} & \text{ 5,20,000} \\ & \text{=====}\end{aligned}$$

$$\begin{aligned}\text{Average profit} &= \frac{\text{Total Profits for all the years}}{\text{Number of years}} \\ &= 5,20,000/4 = \text{Rs.1,30,000.}\end{aligned}$$

Less: Remuneration to proprietor 30,000

$$\begin{aligned}& \text{=====} \\ \text{Average adjusted profit} & \text{ 1,00,000} \\ & \text{=====}\end{aligned}$$

ii) Calculation of normal profit

$$\begin{aligned}\text{Normal profit} &= \text{Capital employed} \times \text{Normal rate of return} \\ &= 5,00,000 \times 15\% \\ &= \text{Rs.75,000.}\end{aligned}$$

iii) Calculation of super profits

$$\begin{aligned}\text{Super profit} &= \text{Average profit} - \text{Normal profit} \\ &= \text{Rs.1,00,000} - \text{Rs.75,000} \\ &= \text{Rs.25,000.}\end{aligned}$$

iv) Calculation of value of goodwill

$$\begin{aligned}\text{Goodwill} &= \text{Super profits} \times \text{No.of years' purchase} \\ &= \text{Rs.25,000} \times 5 \\ &= \text{Rs.1,25,000.}\end{aligned}$$

Problem No.5

From the following information, calculate the value of goodwill:

- i) Average capital employed in the business Rs.70,000.
- ii) Trading profit of the firm for the past three years Rs. 14,760, Rs. 14,810 and Rs.15,200.
- iii) Normal rate of the return expected-18%.
- iv) Fair remuneration to the partners for their services Rs.1,200 per annum.
- v) Sundry assets (excluding goodwill) of the firm – Rs. 75,475
sundry liabilities–Rs.3,133.

Solution:

i) Average Profit Method

$$\begin{aligned}\text{Goodwill} &= \text{Average profit} \times \text{Number of years of purchase} \\ &= 13,723 \times 3 \\ &= \text{Rs.41,169}\end{aligned}$$

ii) Super Profit Method

$$\begin{aligned}\text{Goodwill} &= \text{Super Profit} \times \text{Number of years of Purchase} \\ \text{Super Profit} &= \text{Average Profit} - \text{Normal Profit} \\ \text{Normal Profit} &= \text{Normal rate of return} \times \text{capital employed} \\ &= 70,000 \times 18/100 \\ &= \text{Rs.12,600} \\ \text{Super Profit} &= 13,723 - 12,600 \\ &= \text{Rs.1,123} \\ \text{Goodwill} &= 1,123 \times 3 \\ &= \text{Rs.3,369}\end{aligned}$$

iii) Capitalisation of super profit method

$$\begin{aligned}\text{Goodwill} &= \text{Super Profit} / \text{Normal rate of return} \\ &= 1,123 \times 100/18 \\ &= \text{Rs.6,239}\end{aligned}$$

iv) Capitalisation Method

$$\begin{aligned}\text{Goodwill} &= \text{Total value of business} - \text{Net assets} \\ \text{Total value of business} &= \text{Average Profit} \times 100 / \text{Normal rate of return} \\ \text{Net assets} &= \text{Total assets} - \text{Liabilities} \\ &= 75,476 - 3,133 \\ &= \text{Rs.72,343} \\ \text{Value of business} &= 3,723 \times 100/18 \\ &= \text{Rs.76,239} \\ \text{Goodwill} &= 76,239 - 72,343 \\ &= \text{Rs.3,896}\end{aligned}$$

Valuation of shares

Every business will have its own capital. Like this a company will have its own Capital. The share capital of a company is divided into units of small denomination. Each unit of such small denomination is called a share. As per Sec. 2 (46) of the Companies Act, 1956, Share means one of the parts of capital of the company that is divided among several people and includes stock except where a distinction between stock and share is expressed or implied. Valuation of shares involves the use of financial and accounting data based on the objective and subjective consideration for a specific purpose.

Value of shares may be of the following types:

- | | |
|----------------------|---------------------|
| i) Par value | ii) Book value |
| iii) Market value | iv) Purchase value |
| v) Capitalized value | vi) Intrinsic value |
| vii) Fair value | |

Need and Importance of valuation of shares

Shares must be valued due to the following reasons:-

1. For the purpose of purchase and sale of business in private companies
2. For estate duty and wealth tax purpose
3. For the purpose of Amalgamation and Absorption of companies
4. For the purpose of issuing bonus shares or making rights issue.
5. For the purpose of transfer of shares.
6. Holding company purpose.
7. When shares are pledged as a security against loan
8. Unquoted shares in the stock exchange market.
9. When shares of one class are converted into another class.
10. For the purpose of assessing the value of assets of finance and government trusts.

Factors affecting the valuation of shares

- a) Profitability
- b) Yield Expected by the Investors
- c) Capital employed
- d) Other factors [political, economical and social conditions, Govt. policies etc.,

Methods of valuation of shares

The following are the various methods for valuation of shares

- i) Net assets (or) intrinsic value method
- ii) Yield method
- iii) Earning capacity method
- iv) Fair value method.

i) Net Asset Method [Intrinsic value or breakup value method]

Under this method net assets of the company are divided by the number of share to arrive at the net asset value of each share.

$$\text{Net assets value} = \frac{\text{Net value of assets} - \text{Liabilities} - \text{Preference shareholders claims}}{\text{Number of Equity shares}}$$

ii) Yield Method or Income method or market value method

Yield an effective rate of return from similar types of securities. The yield as prevailing in the industry is known as normal rate of return and is considered as a base while ascertaining the market value of shares.

$$\text{Value per share} = \frac{\text{Expected rate of return} \times \text{Paid up value per equity share}}{\text{Normal rate of return}}$$

$$\text{Expected Rate} = \frac{\text{Profit available to equity shareholders}}{\text{Paid up equity share capital}} \times 100$$

iii) Earning Capacity method:

Under this method the value of share is found out by comparing the company's earning capacity and the normal rate of return on capital employed.

$$\text{Value per share} = \frac{\text{Rate of Earnings}}{\text{Normal rate of return}} \times \text{Paid up value per equity share}$$

$$\text{Rate of earnings} = \frac{\text{Profit earned}}{\text{Capital employed}} \times 100$$

Expected profits may be calculated as follows:

Average Profit	xxx
Less:Tax	<u>xxx</u>
Profit after tax	xxx
Less: Transfer to Reserve	xxx
Preference dividend	<u>xxx</u>
Profit available to equity shareholders	<u>xxx</u>

iv) Fair value method

Fair value of share is the simple average of net assets value and yield value.

$$\text{Fair value} = \frac{\text{Net asset method} + \text{yield method}}{2}$$

2

Problem No.6

On 31st December 2016 the Balance Sheet of a limited company disclosed the following position:

Liabilities	Rs.	Assets	Rs.
Issued capital:		Fixed Assets	10,00,000
Shares of Rs.10 each	8,00,000	Current assets	4,00,000
Reserves	1,80,000	Goodwill	80,000
Profit & Loss a/c	40,000		
10% Debentures	2,00,000		
Current liabilities	2,60,000		
	14,80,000		14,80,000

On 31st December 2016 the fixed assets were independently valued at Rs.7,00,000 and goodwill at Rs.1,00,000. Net profit for the three years are:

2014 – Rs.1,03,200

2015 – Rs.1,04,000

2016 – Rs.1,03,300

Of these 20% are placed to reserve. This proportion was considered reasonable in the industry in which the company is engaged. Fair investment return may be taken at 10%.

Compute company's share value by

- Net Assets method and
- Yield method.

Solution:

1. Net Assets Method

$$\begin{aligned} \text{Net asset value of each share} &= \frac{\text{Net assets available for equity shareholder}}{\text{Number of equity shares}} \\ &= \frac{7,40,000}{80,000} = \text{Rs.9.30} \end{aligned}$$

Calculation of net assets available to equity shareholders:

Fixed assets	7,00,000	
Goodwill	1,00,000	
Current assets	<u>4,00,000</u>	
Total assets		12,00,000
Less: Liabilities		
10% Debentures	2,00,000	
Current liabilities	<u>2,60,000</u>	<u>4,60,000</u>
Net Assets		<u>7,40,000</u>

2. Yield Method

$$\text{Value per Share} = \frac{\text{Expected rate of return}}{\text{Normal rate of return}} \times \text{Paid up value per Share}$$

$$= \frac{10.35}{10} \times 10$$

$$= \text{Rs. 10.35}$$

$$\text{Expected Rate of Return} = \frac{82,800}{8,00,000}$$

$$= 10.35 \%$$

Problem No.7

Following is the Balance sheet of Mohan Ltd as on 31.12.2021

Liabilities		Assets	
Equity share capital		Fixed assets	45,00,000
Share of Rs.100 each	50,00,000	Current assets	24,50,000
Reserves	14,00,000	Goodwill	<u>10,00,000</u>
Profit & Loss a/c	1,00,000		
5% Debentures	12,00,000		
Current Liabilities	<u>2,50,000</u>		
	<u>79,50,000</u>		<u>79,50,000</u>

The fixed Assets were valued at rs.40,00,000 and good will Rs.2,00,000 the net profits for the past three years were Rs. 1,50,000 Rs.2,10,000 andRs.3,40,000respectively. Fair Return On Investments May be taken as 14% for companies engaged in similar business compute the Value of shares by a] Net asset method b] Yield method.

Solution:

1] Valuation of Equity share according to Net asset method (Asset at market value):

Fixed assets	=	40,00,000
Current assets	=	24,50,000.
Goodwill	=	<u>2,00,000</u>
Total Assets	=	66,50,000

Less:Liabilities

5% Debentures	=	12,00,000
Current Liabilities	=	<u>2,50,000</u>
Amount available toequity shareholders		<u>52,00,000</u>

Value per Equity share = $\frac{\text{Amount available to Equity shareholders}}{\text{Number of Equity shares}}$

$$\begin{aligned} &= \frac{\text{Rs. } \underline{52,00,000}}{50,000 \text{ shares}} = \text{Rs. } 104 \\ &= \frac{\text{Rs. } \underline{50,00,000}}{100 \text{ per share}} = 50,000 \text{ shares} \end{aligned}$$

2] Valuation of Equity share according to yield method value per Equity share:

$$= \frac{\text{Expected rate of return}}{\text{Normal rate of return}} \times \text{Paid up value per share}$$

Normal rate of return

To calculate expected rate of return:

$$= \frac{\text{Profit available to Equity shareholders} \times 100}{\text{Paid up Equity share capital}}$$

Net Profits for the past three years	1,50,000
	2,10,000
	3,40,000
	<hr/>
	7,00,000
Average profit	$\frac{7,00,000}{3} = \text{Rs.} 2,33,333$

Profit available to Equity shareholders = Rs. 2,33,333/-

$$\text{Expected rate of return} = \frac{2,33,333 \times 100}{50,00,000} = 4.66$$

50,00,000

$$\text{Value per share} = \frac{\text{Expected rate} \times \text{paid up per share}}{\text{Normal rate of return}}$$

$$= \frac{4.66 \times 100}{14} = \text{Rs.} 33.33$$

14

3) Fair value per share

= Value as per Net assets method + Value as per yield method

$$= \frac{\text{Rs.} 104}{2} + \frac{33.33}{2} = \frac{137}{2} = \text{Rs.} 68.66$$

2

2

Problem No. 8

From the following information calculate value of Equity shares.

1. 4,000 8% preference shares of Rs.100 each Rs.4,00,000
2. 5,000 equity shares of Rs.20 each at Rs.16 per share paid up Rs.8,00,000
3. Expected profits for the year before tax Rs.5,00,000
4. Rate of tax 50%
5. Transfer to General reserve 20% of the profits
6. Normal rate of earnings (Return) 14%

Solution:

Calculation of profit available to Equity shareholders

Expected profits		Rs.5,00,000
Less: 50% Income tax		Rs. <u>2,50,000</u>
Profit after tax		Rs.2,50,000
Less: 20% Transfer to General reserve Rs.2,50,000 x $\frac{20}{100}$		Rs. 50,000
		<hr/>
		Rs.2,00,000
Less: Preference dividend 4,00,000x $\frac{8}{100}$ =		<hr/>
		32,000
Profit available to Equity shareholders		<u>1,68,000</u>

Expected Rate of Return

$$\begin{aligned} &= \frac{\text{Profit available to Equity shareholders}}{\text{Paid up equity capital}} \times 100 \\ &= \frac{1,68,000}{8,00,000} \times 100 = 21\% \\ &= 8,00,000 \end{aligned}$$

Value per equity share as per yield method.

Value per equity share = $\frac{\text{Expected rate of return}}{\text{Normal rate of return}} \times \text{Paid up value per share}$

$$\begin{aligned} &= \frac{21}{14} \times 16 \\ &= \text{Rs.24} \end{aligned}$$

Problem No.9

Babu Ltd has 10000 equity shares of Rs.10 each (Rs.8 paid) and 1,00,000/- 6% preference shares of RS.10 each fully paid. The company has a practice of transferring 20% of the profit to general reserve every year. If the expected profit before tax is Rs.2,00,000/- and the rate of tax is 50% calculate the value of equity shares (Normal rate of dividend is 20%)

Solution:

Profit available to Equity shareholders

Expected profits	2,00,000
Less:50% tax(2,00,000x50/100)	<u>1,00,000</u>
Profit after tax	1,00,000
Less:20%Profit transferred to general reserve	<u>20,000</u>
(1,00,000x20/100)	80,000
Less: Dividend paid to preference shareholders	<u>60,000</u>
Profit available to Equity shareholders	<u>20,000</u>

Calculation of Expected rate of return

$$\text{Expected rate} = \frac{\text{Profit available}}{\text{Paid up Equity capital}} \times 100$$

$$\begin{aligned} \text{Paid up Equity capital} &= 10,000 \text{/-shares} \times \text{Rs.8} = \text{Rs.80,000} \\ &= \frac{20,000}{80,000} \times 100 = \text{Rs.10} \end{aligned}$$

Value per Equity share as per yield method

$$\begin{aligned} \text{Value per Equity share} &= \frac{\text{Expected rate of return}}{\text{Normal rate of return}} \times \text{paid up value per share} \\ &= \frac{25}{20} \times \text{Rs.8} \\ &= \text{Rs.10.} \end{aligned}$$

Liquidator's Final Statement of Accounts

Meaning of Liquidation:-

Liquidation (or) winding up is the legal procedure by which the company comes to an end. It is a process by which a company is dissolved and its assets realized and applied in paying off the liabilities of the company.

Modes of winding up (Liquidation)

A company can be liquidated in any of the following three ways:

1. Compulsory winding up by the court
2. Voluntary winding up by the
 - i) Members voluntary winding up
 - ii) Creditors voluntary winding up
3. Winding up under the supervision of the court

Liquidator-meaning

Liquidator is a person appointed by the court or by the members or by the creditors to perform liquidation work of the company.

Liquidator's final statement of account:

It is the duty of the liquidator to realise the assets and settle the claim of the company. For this purpose he prepares a cash book for recording receipts and payments and submit the same to the court or members or creditors of the company as the case may be. He is required to prepare a statement which shows total cash received and amount distributed to creditors, debenture holders and shareholders of the company.

Such a statement is known as Liquidator's final statement of account.

Liquidator final statement of account (specimen)
Specimen form of Liquidator final statement of account

Receipts		Payments	
To Balance b/d			
To Opening balance of cash in hand	xx	By Secured Creditors	xx

		By Equity shareholders	xx
	xx		xx

Contributory

Contributory is a member who is liable to pay amount of the company at the time of liquidation of a company. He may be present members or past members.

Preferential creditors

Preferential creditors are those creditors having priority of claims over other unsecured creditors. They are 1) any amount due to Government 2) Salary payable employees.3) All sums due to compensation under the workmen compensation act 4) All sums due to an employee from provident fund, pension fund.

Liquidator's Final Statement of Account

Problem No.10

The following particulars relate to a limited company which has gone into voluntary liquidation. Prepare the liquidator's final account allowing for his remuneration at 2% on the amount realized and 2% on the amount distributed among unsecured creditors other than preferential creditors.

	Rs.
Preferential creditors	10,000
Unsecured creditors	32,000
Debentures	10,000

The assets realized the following sums:

Building	20,000
Machinery	18,650
Furniture	1,000

The Liquidation expenses amount to Rs.1000

Solution:

Liquidator's final statement of Account

Receipts	Rs	Payments	Rs
Building	20,000	By Liquidation expenses	1,000
Machinery	18,650	By Liquidator's Remuneration	
Furniture	1,000	By 2% on amount realized	
		$39650 \times 2 / 100 =$ 793	
		By 2% on amount paid to	
		Unsecured creditors* <u>350</u>	1,143
		By Debenture holders	10,000
		By Preferential creditors	10,000
		By Unsecured creditors**	17,507
	=====		=====
	39,650		39,650

Calculation of amount paid to unsecured creditors:

Amount available to unsecured creditors:

Total Receipts		39,650
Less: Payments Liquidation expenses	1,000	
Liquidator's Remuneration amount realised	793	
Debenture holder-paid	10,000	
Preferential creditors-paid	<u>10,000</u>	<u>21,793</u>
Amount available to unsecured creditors		17,857

Calculation of Liquidators remuneration 2% on amount distributed among unsecured creditor:

Commission=Amount Availablex 2/102

$$17857 \times 2/102 = 350$$

Amount paid to unsecured creditors $17857 - 350 = 17507^{**}$

Problem No.11

Krishnan Ltd was liquidated on 31-12-2021. The Balance sheet as on 31-12-2021.

Liabilities	Rs.	Assets	Rs.
Share capital	1,00,000	Land and Building	60,000
8% Debenture	1,00,000	Plant and Machinery	60,000
Mortgage Loan (Secured loan on Building)	50,000	Stock	60,000
Sundry Creditors	80,000	Debtors	70,000
		Cash in hand	5,000
		Profit and Loss a/c	75,000
	3,30,000		3,30,000

Assets realized as follows:

- Land and Building Rs.55,000
- Stock Rs.20,000

- c) Plant & Machinery Rs.25,000
 d) Half of the debtors were bad and the balance realized 60% book value.
 e) Liquidator was entitled to a commission of 3% on amount realized other than cash and 2% on the amount paid to unsecured creditors.
 f) Preferential creditors amount to Rs.10000(included in sundry creditors)
 g) Liquidation expenses amount to Rs.970. Prepare liquidator's final statement of account.

Solution:

Liquidator's final statement of Accounts

Liabilities		Rs.	Assets		Rs.
To Cash in hand		5,000	By Secured creditors (mortgage Loan)		50,000
To Assets Realised:			Liquidation expenses		970
Land & Building	55,000		Liquidator's Remuneration 3% on amount realized except cash $121000 \times 3/100$		3,630
Stock	20,000		Amount paid to debenture holders		61,200
Plant & Machinery	25,000		Payment to preferential creditors		10,200
Debtors	21,000	1,21,000			
		1,26,000			1,26,000

Note: 1) Debtors Realised:

Debtors	70000
Less: 50% Bad	35000

Balance 60% realised	35000

$$35000 \times 60/100 = 21000^*$$

Illustration:11

The following particulars relate to a company which has gone into liquidation. You are required to prepare the liquidator's final statement of account allowing for his remuneration of 3% as amounts paid to unsecured creditor other than preferential creditors.

Preferential creditor Rs.12,000

Unsecured creditor Rs.40,000

Debentures Rs.14,000

Assets realized Rs.40,000 and liquidation expenses amounted Rs.4,000.

Solution:**Liquidator's final statement of account**

Receipts	Rs.	Payments	Rs.
Assets realised	40000	Liquidation expenses	4,000
		Liquidator's Remuneration 3%	291
		amount paid to unsecured creditors	14,000
		Debentures	12,000
		Preferential creditors	9709
		Unsecured creditors	
	40,000		40,000

Calculation of Commission Payable to Liquidator

Commission = Amount available x3/103

Amount available:

Total Receipts		40,000
Less: Payments liquidation expenses	4,000	
Debentures	14,000	
Preferential creditors	<u>12,000</u>	<u>30,000</u>
		10,000
10000x3/103=291*		

ii) Amount payable to unsecured creditors

Amount available	10000
Less:Commission	291

	9709*

Unit- III Accounts of Banking Companies

Meaning of Bank

Bank is a place for accepting money from the public, lending money to the public and keeping valuables safely, the amount being paid out on the customer's order, that is cheque.

Definition of Banking

The Banking Regulation Act 1949 defines banking as “accepting, for the purpose of lending or investment, of deposits of money from the public repayable on demand or otherwise and withdrawable by cheque, draft, order or otherwise”.

Legal Requirements

1. Prescribed form

As per sec 29 to 33 of the Banking Regulation Act every banking company is required to prepare a Balance sheet in accordance with form A set out in the Third Schedule and a profit & loss account in accordance with form B set out in the Third schedule.

2. Accounting year

A Banking company closes its accounts on 31st March every year.

3. Prohibition of Trading

A banking company cannot directly or indirectly deal with buying (or) selling (or) bartering of goods.

4. Non-Banking assets

A banking company can not hold any immovable property except certain assets charged due to failure of debtor repay loan on time. It can be disposed off by the banking company within 7 years of its purchase. It is termed as non-Banking assets.

5. Share capital

Minimum capital of Rs.20 lakhs if the bank has a place of business in Mumbai or Kolkatta city and if the bank has a place of business other than Mumbai or Kolkatta city is Rs.15 Lakhs.

6. Reserve fund

It is obligator for a banking company in India to create a reserve fund and 25% of its profits. Statutory Reserve is created 25% of its annual profits.

7. Payment of commission, Brokerage

A banking company can pay any commission, brokerage, discount or remuneration in respect of shares by it not exceeding 2 ½ % paid up value of the shares.

8. Charge on uncalled capital:

A banking company cannot create any charge upon its uncalled capital and any such charge shall be void.

9. Payment of Dividend:

A Banking company cannot pay dividend on its shares until all its capitalized expenses (preliminary expenses) have been completely written off.

10. Cash Reserve: -

Every scheduled Bank has to maintain a sum equal to at least 3% of its time and demand liabilities as cash reserve with Reserve Bank of India.

11. Statutory Reserve:-

It is compulsory for every banking company to create a statutory Reserve fund of 25% of its annual profits.

12. Statutory Liquidity Ratio (SLR)

In addition to the cash reserve every banking company is required to maintain in India in cash, Gold and unencumbered securities an amount which shall not be less than 25% of its time and demand Liabilities. It is known as statutory liquidity Reserve.

13. Loans and advances:-

As per Banking Regulation Act 1949, imposes certain restriction on loans granted by banks to the following persons any of its directors – any firm – any company, It cannot lend on the security of its own shares.

Rebate on Bills Discounted

When a bill is discounted, it credits the full amount of discounts on all bills to discount account.

Journal entry

Bill Discounted a/c(full amount) Dr	xx	
To Customer a/c (face value–(Discount)		xx
To Discount a/c (discount)		xx

Sometimes the discounted bills may not be maturing by the end of the year. The discount relating to the unexpired portion of the bill is strictly not earned for the current year hence it should be carried forward to the next year. All such discount relating to unexpired time of such bill is debited to discount onbill a/c and credited to rebate on bills discounted account.

Entry :-

Discount a/c Dr	xx	
To Rebate on Bills discounted a/c		xx

It is an Income received in advance and it should be shown schedule 5 under the head other liabilities of the Balance sheet. It is known as Rebate on Bills discounted.

Non - performing assets (NPA)

A Bank earns interest from customers through term loans, cash credit and overdrafts. If the interest or instalment of principal or both from customer is delayed and not received before the specified time it is called as Non - performing assets. The specified time to receive Interest or principal is 180 days in case of term loan, cash credit and overdraft.

Assets classification and provisions for Doubtful debts:

Banks are required to classify the advances into four categories.

i) Standard Assets:

A standard asset is one which **is not a non-performing** asset which does not show any problem. The banks have to make general provisions of 0.25% on standard assets.

ii) Sub-standard Assets:

It is a non-performing asset for a period not exceeding 18 months for this a provision of 10% of total outstanding is made.

iii) Doubtful Assets:

It is a non performing asset for a period exceeding 12 months.

A Provision for doubtful debts against such advances has to be created as follows:

- a) First year: 100% of unsecured portion + 20% of secured portion.
- b) Second and Third year: 100% of unsecured portion + 30% of secured portion.
- c) Beyond 3 years: 100% of unsecured portion + 50% of secured portion.

iv) Loss assets:

These assets are not controllable for this purpose the entire assets should be written off or 100% provision should be made.

Licensing of banking companies:-

Every banking can function in India only after obtain license from Reserve Bank of India. Even to open branches in India or overseas.

Problem No.4

Calculate Rebate on Bills discounted as on 31-03-2018

Bill Date	Amount	Period	Rate of Discount
15-01-2018	25,000	5 Months	8%
10-02-2018	15,000	4 Months	7%
25-02-2018	20,000	4 Months	7%
20-03-2018	30,000	3 Months	9%

Solution:

Calculation of Rebate on Bills discounted

Bill Date	Amount	Due Date	No.of days	Rate	Amount
15-01-2018	25,000	18-06-18	79	8%	433
10-02-2018	15,000	13-06-18	74	7%	213
25-02-2018	20,000	28-06-18	89	7%	341
20-03-2018	30,000	23-06-18	84	9%	621
Rebate on Bills discounted Amount					1,608

Note: add 3 days as grace entry:

Problem No.5

On 31st March, 2020 Indus Bank Ltd had the following unmeasured Bills.

Date of Bill	Amount	Term Months	Discount(pa)
12-01-2017	30,000	6	12%
07-02-2017	70,000	4	11%
02-03-2017	20,000	3	10%

Calculate the Rebate on Bills discounted and record necessary entry on 31st March 2017.

Solution:

Calculation of Rebate on Bills Discounted

Date of Bill	Due date	No.of days after 31 st March	Amount	Rebate on Bill
12-01-2017	15-07-2017	106	30,000	1045.48
07-02-2017	10-06-2017	71	70,000	1497.81
02-03-2017	15-06-2017	66	20,000	361.44
			Total	2904.73

Entry:

Discount a/c Dr 2904.73

To Rebate on Bills discounted a/c 2904.73

Problem No.6

On 31st March 2020, South India Bank Ltd., finds its advances classified as follows:

	Rs.
Standard assets	14,91,300
Sub – Standard assets	92,800
Doubtful assets (secured)	
Doubtful for one year	25,660
Doubtful for one year to 3 years	15,640
Doubtful for more than 3 years	6,580
Loss assets	10,350

Calculate the amount of provisions to be made by the bank against the above mentioned advances.

Solution:

Particulars	Amount (Rs.)	% required as provision	Provision (Rs.)
Standard assets	14,91,300	0.25	3,728
Sub – Standard assets	92,800	10	9,280
Doubtful assets (secured)			
Doubtful for one year	25,660	20	5,132
Doubtful for one year to 3 years	15,640	30	4,692
Doubtful for more than 3 years	6,580	50	3,290
Loss assets	10,350	100	10,350
Total provision required			36,472

Problem No.7

While closing its books of accounts, a commercial bank has its advances classified as follows:

	Rs.
Standard assets	16,000
Sub – Standard assets	1,300
Doubtful assets (secured)	
Doubtful for one year	700
Doubtful for one year to 3 years	400
Doubtful for more than 3 years	200
Loss assets	500

You are required to calculate the amount of provisions to be made by the bank against the above mentioned advances.

Solution:

Particulars	Amount (Rs.)	% required as provision	Provision (Rs.)
Standard assets	16,000	0.25	40
Sub – Standard assets	1,300	10	130
Doubtful assets (secured)			
Doubtful for one year	700	20	140
Doubtful for one year to 3 years	400	30	120
Doubtful for more than 3 years	200	50	100
Loss assets	500	100	500
Total provision required			1,030

Problem No.8

While closing its books of accounts, a commercial bank has its advances classified as follows:

	Rs.
Standard assets	48,000
Sub – Standard assets	2,400
Doubtful assets (unsecured)	
Doubtful for one year	1,600
Doubtful for one year to 3 years	1,200
Doubtful for more than 3 years	800
Loss assets	1,800

You are required to calculate the amount of provisions to be made by the bank against the above mentioned advances.

Solution:

Particulars	Amount (Rs.)	% required as provision	Provision (Rs.)
Standard assets	48,000	0.25	120
Sub – Standard assets	2,400	10	240
Doubtful assets (secured)			
Doubtful for one year	1,600	100	1,600
Doubtful for one year to 3 years	1,200	100	1,200
Doubtful for more than 3 years	800	100	800
Loss assets	1,800	100	1,800
Total provision required			5,760

Unit - IV

Accounts of Insurance Companies

Insurance - Meaning

Insurance is a contract whereby insurers agree to compensate for specific loss to the insured, who in consideration, agrees to pay regularly a sum of money called premium. The insurance company agrees to pay compensation is known as insurer and the person who is taking policy from the insurance company is known as policy holder or insured.

Definition of Insurance

“Insurance is a contract in which a sum of money is paid to the insured in consideration of insurers incurring the risk of paying a large sum upon a given contingency”–Justice Tindle.

Kinds of Insurance:

There are three types of Insurance

1. Life Insurance
2. General Insurance
3. Social Insurance

1. Life Insurance:

It is a contract between the insured and the Insurance Company in which the insurance company agrees to pay the policy amount on the death of the insured or maturity of policy whichever is earlier .Hence the policy holder agrees to pay amount is called premium.

The following are the main varieties of life insurance policies

- i) Whole life policy
- ii) Endowment policy
- iii) With profit policy
- iv) Without profit policy
- v) Annuity policy

2. General Insurance: All insurance contracts other than Life insurance are known as General insurance. Example: Fire Insurance, Marine Insurance, Liability insurance, Motor vehicle, Theft, Fidelity and Accident insurance. It is governed by General Insurance Act 1972.

3. Social Insurance

It is to provide protection to the weaker section of the society who are unable to pay the premium for adequate insurance. Example: Pension plans, Disability benefits, sickness insurance and industrial insurance.

Difference between Life Insurance and General Insurance

	Life Insurance	General Insurance
1)	It is a contract of certainty	It is a contract of Indemnity.
2)	It is a long term Contract	It is one year contract
3)	It is governed by LIC Act	It is Governed by GIC Act
4)	Life policy can be assigned to others	It cannot be assigned to others
5)	It comprises of Investment and Protection	It consists of only protection
6)	Insurable Interest must exist at the time of proposal.	It must exist from the date of Proposal to the end of contract.
7)	Surrender value is possible	No surrender value
8)	Policy amount will be received in the event of death or maturity date Whichever is earlier.	Policy amount will be received in the event of risk or loss occurred.

Final Accounts of life Insurance companies

Some Important Terms:

1) Claims:

When the insured makes a statement for the loss on the date of happening of an event or on the date of maturity of the policy to the insurer the statement is known as claims.

2) Premium:

It means the consideration received by Insurance Company in Consideration of the risk undertaken by it. It should be shown in revenue account.

3) Bonus:

It is a share of profit which a policy holder gets from the LIC.

4) Reinsurance:

It means transferring the whole or a part of the risk undertaken by insurer to another Insurer.

5) Commission on Reinsurance ceded:

It is a gain to the insurance company. Insurance Companies earn commission from other insurance companies for giving them business under Reinsurance contract.

6) Commission on Reinsurance Accepted:

It is an expense to the Insurance Company. Insurance Companies paid commission to other insurance companies for giving them business under Reinsurance contract.

Reserve for unexpired Risk:

It is a reserve created to meet the risk which is associated with all such policies. In fire Insurance 50% net premium is transferred and in marine Insurance 100% of Net Premium is too transferred to Reserve for unexpired Risk.

Problem No.1

The life assurance fund of SBI life assurance company ltd. Shows a balance of Rs.9,00,000 on 31.03.2021. It was later observed that the following had not been taken into account.

- i) Bonus utilized in reduction on premium Rs.90,000
 - ii) Outstanding premium Rs.2,00,000
 - iii) Interest accrued on investments less income tax Rs.50,000
 - iv) Claim intimated but not yet admitted Rs.30,000
 - v) Claims covered under reinsurance Rs.10,000
- Compute the balance of Life Assurance Fund.

Double Accounting System & Accounts of Holding Companies

Double Account System

Double account is a system of accounting and presenting annual accounts by public utility undertakings like Gas companies, Electricity, Railway Companies, Tram ways which operate under special Acts of parliament. They are rendering service to the society at a reasonable price. These companies require a large amount of fixed capital invested in fixed assets.

Under Double account system the balance sheet is divided into two parts.

- i) Receipts and payments on capital account.
- ii) General Balance sheet

And also prepare Revenue account and Net Revenue account.

Features of Double account system:-

1. Double accounting system is a system of presenting final accounts.
2. These systems are adopted by Railways, Electricity, Gas Companies formed under special Act of parliament.
3. In this system Revenue A/c, Net Revenue A/c , Capital A/c and General Balance sheet are prepared.
4. Its main object is to show the amount of fixed capital raised from the public and the manner in which fixed capital has been used in the purchase of fixed assets.
5. A revenue account prepared to show income and expenses of the company.
6. A Net revenue A/c is prepared to show the net profit of the company.
7. Under this system fixed assets are shown in the capital a/c at original cost.
8. Discount and premium on issue of shares and Debenture is deducted from shares and debentures and Net amount is shown in capital a/c.
9. Loans and debentures are treated as capital and shown in the credit side of the capital a/c.
10. General reserve, investment fluctuation reserves are shown in the general Balance sheet on the liabilities side.

Merits (Advantages) of Double Account system:-

- 1) This accounting system will be easy to understand by shareholders and debenture holder's capital a/c shows the total amount of receipts by way of shares, Debentures and Loans and expenses incurred for purchasing fixed assets.
- 2) Creation of appreciation fund will be useful to replace fixed assets.
- 3) Public utility companies render better services to the public at a reasonable price.
- 4) Revenue and Net revenue accounts are shown pure operating results of the company.
- 5) It helps in preparation of various statistical returns in a quick manner.
- 6) It helps in comparison of floating assets and floating liabilities.
- 7) In this system the Government exercises necessary control over Public Utility Company.
- 8) Under Double accounting system fixed assets are shown as original cost under capital accounts and current assets are shown in General Balance sheet.

Demerits (Disadvantages):

1. In this system interest paid (or) received is not included in revenue a/c. Hence revenue a/c does not show true and fair view of operating results.
2. It is very difficult to understand by general public.
3. Capital a/c does not show true position.
4. In this system fixed assets are shown at cost price in capital a/c. Hence Balance sheet does not show true and fair view of the financial position of the company.
5. It is very difficult to decide whether the expenditure is capital or revenue nature.

Difference between Double entry system and Double account system:-

S.No	Double entry system	Double Account system
1)	It is a method of book keeping	It is a method of presenting final accounts.
2)	Fixed assets are shown at cost less depreciation in the balance sheet.	Fixed assets are shown at cost price in capital a/c and Depreciation fund is shown in Balance sheet.
3)	Interest is charged to P&L a/c	Interest is charged to Net Revenue a/c.
4)	It consists of P&L A/c, P&L Appropriation a/c and Balance sheet.	It consists of Revenue a/c, Net Revenue a/c, capital a/c and General Balance sheet.
5)	Fixed assets and fixed liabilities are shown in the Balance sheet.	Only fixed assets and fixed liabilities are Shown in the capital a/c.

Difference between Double account and single account system:

S.No	Double A/c system	Single A/c System
1)	It is used by only public utility undertakings	It is used by all the companies.
2)	It consists of revenue a/c, Net Revenue a/c, Capital a/c and general Balance sheet	It consists of P&L a/c, P&L Appropriation a/c and Balance sheet.
3)	Balance sheet is presented into two parts: Capital a/c and general Balance sheet.	Only one Balance sheet is Presented.
4)	Share capital, Debentures will appear in Capital a/c	They are appear in Balance Sheet.
5)	Fixed assets are shown at cost price.	It is shown at cost less Depreciation.
6)	Its purpose is to how the capital is raised and how the same has been invested in fixed Assets.	Its purpose is to show the financial position of the Company.

			4,04,400				4,04,400

General Balance sheet as on 31-03-2018

Liabilities	Rs.	Assets	Rs.
Total Capital Receipts	2,99,600	Total capital Expenses	4,04,400
Creditors	400	Sundry Debtors	16,000
Depreciation fund a/c	1,00,000	Other debtors	200
Net Revenue a/c	22,600	Cash	2,000
	4,22,600		4,22,600

Replacement of Asset

Replacement of asset means old asset is replaced and new asset is purchased.

Journal entries

1. For the amount spent on new works

New works a/c (amount to be capitalized)	Dr	xxx	
Replacement a/c (amount to be w/off to revenue)	Dr	xxx	
To Bank (Actual amount spent)			xxx

2. For the sale of old materials:

Bank a/c	Dr	xxx	
To Replacement a/c			xxx

3. For the value of old material used in the construction

New works a/c	Dr	xxx	
To Replacement a/c			xxx

(Being old materials used in new works)

4. For the balance in the Replacement a/c

Revenue a/c	Dr	xxx	
To Replacement a/c			xxx

(Being old materials sold)

5. For amount spent on new construction

New works a/c	Dr	xxx	
To Bank a/c			xxx

Problem No: 2

A Railway station had to be replaced by a new station. The cost of new station is Rs.8,00,000. The old one had cost Rs.2,10,000 labour forming 3/10 of total expenditure and material accounting for the rest. Prices of raw materials have doubled and wage rates have gone by 250% materials of the old station Rs.38,000 were used in the new station and the sale proceeds of the old station materials were Rs.11,000. These materials were obtained by pulling down the old station. **Pass Journal entries.**

Solution

1) New works A/c Dr.	2,85,500	
Replacement a/c Dr.	5,14,500	
To Bank a/c		8,00,000
2) New works a/c Dr	38,000	
To Replacement a/c		38,000
(Being old materials used in New works)		
3) Bank a/c Dr	11,000	
To Replacement a/c		11,000
(Being old materials sold)		
4) Revenue a/c Dr	4,65,500	
To Replacement a/c	4,65,500	
(Being Replacement a/c transferred)		

Working notes: Amount to be capitalized:

Cost of New works	8,00,000
Less: Estimated Replacement cost	<u>6,14,500</u>
Capitalized amount	<u>2,85,500</u>

Problem:3

The Southern Gas company rebuilt of their works with double the capacity at a cost of Rs.8,00,000/-.The cost of the part of old works was Rs.3,50,000. In working new works old materials of Rs.15,000 was reused and Material Rs.25,000 was sold away. The cost of Labour and Materials are 50% higher now than when the old works were built. Pass Journal entries.

Solution:

1) New works a/c Dr.	2,75,000	
Replacement a/c Dr.	5,25,000	
To Bank		8,00,000
(Being amount paid for replacement)		
2) New works a/c Dr	15,000	
To Replacement a/c		15,000
(Being old materials used)		

3) Bank a/c Dr	25,000
To Replacement a/c	25,000

4) Revenue a/c Dr	4,85,000
To Replacement a/c	4,85,000

(Being balance transferred to Revenue a/c)

Workings

Cost of new works	-	8,00,000
Less: Estimated Cost	-	5,25,000

Amount to be capitalized		<u>2,75,000</u>

Accounts of Holding Companies

Meaning:

A Company which controls one or more other companies by means of holds either the whole of the share capital or majority of the shares of another company. The controlling company is called as the holding company and the company so controlled is called as a subsidiary company.

Definition:

Section 4 of the companies Act 1956 defines a company shall be deemed to be the holding company of another, if that other is its subsidiary”.

1. By holding more than 50% of the face value of the equity shares of the other company.
2. By controlling the composition of Board of directors of the other company.
3. By controlling a holding company which controls another subsidiary company.

For example:

If X Ltd is a subsidiary of Y Ltd and Y Ltd is a subsidiary of Z Ltd, then X Ltd is also considered to be subsidiary of Z Ltd.

Advantages of Holding company:

- 1) The object of holding companies is to promote combination movement and eliminate competition.
- 2) Enjoying economics in production and management may be secured.
- 3) Subsidiary companies retain their identities. Hence no liquidation is possible.
- 4) Holding companies getting advantages existing of goodwill of is possible subsidiary companies and also control is exercised on the affairs of subsidiary companies.

Disadvantages:

Manipulation of accounts, Manipulation of Intercompany transactions, oppression of minority shareholders, and exploitation of subsidiary companies by holding company are possible in the system of holding companies formation.

Procedure for preparing consolidated balance sheet, and consolidated profit & loss a/c:

Consolidated financial statement include consolidated balance sheet profit & loss account. This statement is to show the financial position and trading results of both holding & subsidiary companies. In consolidated Balance sheet in which assets and liabilities of all the subsidiaries are given along with the assets and liabilities of holding company in one single Balance sheet.

Steps to be taken for preparation of Consolidated Balance sheet

Step1: Wholly owned/ partly owned subsidiary company:

The share of the subsidiary company held by the holding company is treated as Investment. The Investment of the holding company in the subsidiary company is replaced by Net assets of subsidiary company.

Step 2: Calculation of Capital Profits and Revenue Profits

The profits of the subsidiary company can be divided into two namely capital profit and revenue profit.

Capital Profit

The profits earned by the subsidiary company up to the date of purchase (or) acquisition of shares by the holding company are called capital profit. These profits are

shared by the outsiders and holding company according to their proportionate shares held by them. Capital profits of the holding company are shown as capital reserve in the consolidated Balance sheet and share of capital profit belonging to minority interest is added to be amount of minority interest.

Revenue Profit

The profits earned by the subsidiary company after the date of purchase (or) acquisition of shares by the holding company are called capital profit. Holding company's share is added to the profits of the holding company and a share of such profit belonging to the minority interest is added to the amount of minority interest.

Step 3: Calculation of Goodwill or Capital Reserve

When the holding company purchases the shares of the subsidiary company at a price above the face value, the excess amount paid represents the payment of goodwill. On the other hand, if the price paid for the purchase of shares is less than the paid up value, the difference is called capital reserve.

The goodwill / capital reserve is calculated as under:

Particulars	Rs.	Rs.
Paid up value of the equity held by the holding company		xxx
Add: Proportionate share in the capital profit	xxx	
Proportionate share in the capital reserve	xxx	xxx

		xxx
Less: Proportionate share in the capital loss		xxx

Total value		xxx
Less: Cost of equity (or) price paid for the investment		xxx
Goodwill / Capital reserve		----- xxx -----

Step 4: Calculation of Minority Interest

When some of the shares of the subsidiary company are held by outside shareholders, they will have a right to get a proportionate share in the assets and liabilities of that company their interest known as minority interest. The share of the outsiders in the subsidiary company is called minority interest. The Amount of minority is shown on the liabilities side of the balance sheet of the holding company.

Calculation of minority interest:

Paid up value of shares held by outsiders		xxx	
Add: Proportionate share in the capital profit and reserve	xxx		
Proportionate share in the revenue profit	xxx		
Proportionate share in the increase in the value Of the assets of the subsidiary		<u>xxx</u>	xxx
Less: Proportionate share in the capital losses	xxx		
Proportionate share in the revenue losses	xxx		
Proportionate share in the decrease in the value Of the assets of the subsidiary		<u>xxx</u>	
Value of minority interest			<u>xxx</u>

Step 5: Preparation of Consolidated Balance sheet

Consolidation is to aggregate the assets and liabilities of both holding and subsidiary company or companies after adjusting and eliminating different items such as intercompany investments, intercompany owings, unrealized profits and so on.

Step 6: Elimination of common transactions:

While preparing consolidated Balance sheet, some common transactions appearing in both Balance sheet of holding company and subsidiary company should be eliminated.

Example: 1) Goods sold on credit by the holding company to the subsidiary company and vice versa.

2) Bill drawn by one company and accepted by another company.

3) Loan advanced by holding company to subsidiary company and vice

versa. 4) Debentures issued by one company and held by another company.

Step 7 Treatment of unrealized profits

If the goods sold at a profit by H to S company or S to H Company remains unsold at end of the year, profit charged by the company on unused goods remain unrealized. In this connection stock reserve is created and profit is reduced by unrealized profit. Further stock reserve is also reduced by share of minority interest. Stock reserve will be reduced on the liability side.

E.g. H Ltd purchased from S Ltd goods of the value of Rs.40000 on which S Ltd had charged a profit 20% on cost and goods worth Rs.12000 remained unsold at the end of the year.

$$\text{Unrealized profit} = 12000 \times 20/100 = \text{Rs.2,000}$$

Suppose H Ltd holds 75% equity shares of the subsidiary company

Stock reserve = $2000 \times 75/100 = 1500$. 1500 will be deducted from stock on asset side and 1,500 will be deducted from P&L a/c on the liabilities side.

Step 8 Treatments of Contingent Liabilities:

Contingent liability is that liability which arises or may not arise. Its payment depends on the occurrence of a future transaction which is not certain. Such a liability is shown by way of a footnote in the Balance sheet.

Example:

- i) Arrears of dividend on cumulative preference shares.
- ii) Claims against the company not acknowledged debt as yet.
- iii) Bills discounted likely to be dishonoured.
- iv) Amount uncalled on partly paid shares held.

Step 9 Revaluations of Assets and Liabilities:

If assets and liabilities of subsidiary company are revalued at the time of purchase of shares in the subsidiary company, profit or loss on account of such revaluation is treated as capital profit or capital loss and shared by minority shareholders and holding company according to the proportions of shares held by them. Holding company's share of capital profit is transferred to capital reserve, deducted from cost of control if there is loss on revaluation. Share of profit of minority shareholders is added to minority interest

and deduction is made from the minority interest if there is a loss on revaluation.

Step10 Bonus Shares:

Bonus shares may be issued out of capital profits or revenue profits or reserves of the subsidiary company. There are two methods of issuing Bonus shares. They are:

a) Treatment of Issue of Bonus shares out of capital profit:

Issue of Bonus shares out of capital profits (Pre-acquisition profits) will have no effect on the consolidated Balance sheet.

b) Treatment of Issue of Bonus shares out of Revenue profits

Issue of Bonus shares out of revenue profits will have effect on the consolidated Balance sheet. The share of revenue profit earned by the holding company will be reduced and paid up value of shares held by the holding company will increase.

Problem No.1

From the following Balance sheet of holding company and subsidiary company prepare a consolidated balance sheet of holding company and its subsidiary company.

Balance sheet as on 31st March, 2020

Particulars	H Rs.	S Rs.	Particulars	H Rs.	S Rs.
Share Capital in Re.1 shares	20,000	10,000	Sundry Assets	25,000	12,000
Sundry Liabilities	15,000	2,000	Investments: 10,000 shares of Re.1 each in S Ltd	10,000	----
	35,000	12,000		35,000	12,000

Solution:**Consolidated Balance sheet as on 31st March, 2020**

Liabilities	Rs.	Rs.	Assets	Rs.	Rs.
Share capital of H Company		20,000	Sundry Assets		
Sundry liabilities			H	25,000	
H	15,000		S	<u>12,000</u>	37,000
S	<u>2,000</u>	17,000			
		<u>37,000</u>			<u>37,000</u>

ProblemNo.2

The Balance Sheets of Anbu Ltd and Babu Ltd as on 31st December, 2017 were as follows:

Liabilities	Anbu Ltd	Babu Ltd	Assets	Anbu Ltd	Babu Ltd
Share capital in Rs.10 fully paid			Fixed Assets	10,000	6,000
Shares	12,000	5,000	Current Assets	11,500	2,000
Equity shares	4,000	1,000	Cash at Bank	7,000	1,000
Preference shares	2,500	1,000			
Profit and Loss A/c	10,000	2,000			
Creditors					
	<u>28,500</u>	<u>9,000</u>		<u>28,500</u>	<u>9,000</u>

On 1st January, 2018, Anbu Ltd acquired 90% of share capital of Babu Ltd at 15 per share. Prepare the consolidated Balance Sheet as on 1st Jan,2018.

Solution:**Consolidated Balance Sheet of A Ltd and its subsidiary B Ltd as on 1st January 2018**

Liabilities	Rs.	Assets	Rs.
Share capital (Rs.10 fully paid)	12,000	Cost of control	1,350
Preference share	4,000	Fixed Assets	
Profit and Loss A/c	2,500	Anbu Ltd 10,000	
Minority interest	1,600	Babu Ltd <u>6,000</u>	16,000
Creditors		Current Assets	
Anbu 10,000		Anbu Ltd 11,500	
Babu <u>2,000</u>	12,000	Babu Ltd <u>2,000</u>	13,500
		Cash at Bank	
		Anbu Ltd 250	
		Babu Ltd <u>1,000</u>	<u>1,250</u>
	<u>32,100</u>		<u>32,100</u>

(1) Ascertainment of cost of control

Investment A/c.(450 shares at Rs.15)		6,750
Less: Paid up value of 450 share	Rs.4,500	
90% of pre-acquisition Profits i.e.90% of 1,000	<u>900</u>	5,400
Cost of control		1,350

(2) Minority Interest:

Paid up value of 50 Equity shares @ Rs. 10	500
Paid up Value of preference shares	1,000
10% of Profits and Loss A/c balances	100
Minority Interest	<u>1,600</u>

Problem No.3

The following Balance sheet as on 31st March, 2017 is given:

Liabilities	H	S	Assets	H	S
Share Capital in Re.1 fully paid shares	12,000	6,000	Sundry Assets	20,000	12,000
Reserve	3,000	2,000	Investments 6,000 shares in S Ltd	7,500	----
Profit and Loss A/c	2,000	1,000			
Sundry liabilities	10,500	3,000			
	27,500	12,000		27,500	12,000

H Ltd. has acquired shares in S Ltd on 31st March, 2017. Prepare consolidated Balance Sheet as on 31.03.2017.

Solution:

Calculation of capital reserves:

Equity purchased in the subsidiary

Share Capital	6,000
Reserve	2,000
Profit and Loss A/c	<u>1,000</u>
Total	9,000
Less: Price paid for investment	<u>7,500</u>
Capital Reserve	<u>1,500</u>

Consolidated Balance sheet as on 31st March 2017

Share capital		Sundry assets	
Re.1 fully paid shares	12,000	H	20,000
Capital reserve	1,500	S	<u>12,000</u>
Reserve (H Ltd)	3,000		32,000
Profit & Loss A/c (H Ltd)	2,000		
Sundry Liabilities			
H	10,500		
S	3,000		
	<u>13,500</u>		
	<u>32,000</u>		<u>32,000</u>

Problem No. 4

Consolidate the following Balance sheet

Liabilities	H Ltd	S Ltd	Assets	H Ltd	S Ltd
Share Capital in Re. 1 fully paid shares	14,000	10,000	900 shares in S Ltd at cost	12,000	----
Creditors	---	5,000	Sundry Assets	2,000	18,000
Profit and Loss A/c	---	3,000			
	14,000	18,000		14,000	18,000

When H Ltd acquired the shares in S Ltd., the profit and loss account in the latter had a credit balance of Rs.2,000.

Solution:

Share of Holding company and minority shareholdings

= 900: 100 (or) 9:1

i) Calculation of Capital profit

Balance of profit on the date of acquisition Rs.2,000.

Holding company $2,000 \times \frac{9}{10} = \text{Rs.}1,800$

Minority Shareholders $2,000 \times \frac{1}{10} = \text{Rs.}200$

ii) Calculation of Revenue Profit

Balance in Profit & Loss a/c 3,000

Less: Capital profit 2,000

Revenue profit earned during the year 1,000

Holding company $1,000 \times \frac{9}{10} = \text{Rs.}900$

Minority Shareholders $1,000 \times \frac{1}{10} = \text{Rs.}100$

iii) Calculation of Goodwill (or) Capital Reserve

Paid up value of equity capital	9,000	
Add: Share of Capital profit	1,800	

	10,800	
Less: Price paid for investment	12,000	

Goodwill	1,200	=====

iv) Calculation of Minority Interest

Paid up value of equity capital		1,000
Add: Share of capital profit	200	
Share of revenue profit	<u>100</u>	<u>300</u>
Total		<u>1,300</u>

Consolidated Balance sheet

Liabilities	Rs.	Assets	Rs.
Share Capital	14,000	Sundry Assets	20,000
Creditors	5,000	Goodwill	1,200
Profit and Loss A/c	900		
Minority interest	1,300		
	21,200		21,200

Problem No. 5

Consolidate the following Balance sheet

Liabilities	H Ltd	S Ltd	Assets	H Ltd	S Ltd
Share Capital Rs.10 shares	2,400	1,600	Sundry Assets	1,400	1,950
Creditors	---	300	128 shares in S Ltd	1,000	----
Profit and Loss A/c	---	50			
	2,400	1,950		2,400	1,950

On the date of acquisition, S Ltd had a debit balance of Rs.100 on profit and loss a/c.

Solution:

Share of Holding company and minority shareholdings

$$=128 : 32 \text{ (or) } 4:1$$

i) Calculation of Capital Loss

Loss on the date of acquisition Rs.100

Holding company $100 \times \frac{4}{5} = \text{Rs.}80$

Minority Shareholders $100 \times \frac{1}{5} = \text{Rs.}20$

ii) Calculation of Revenue Profit

Balance in Profit & Loss a/c 50

Add: Loss written off 100

Revenue profit earned during the year 150

=====

Holding company $150 \times \frac{4}{5} = \text{Rs.}120$

Minority Shareholders $150 \times \frac{1}{5} = \text{Rs.}30$

iii) Calculation of Goodwill (or) Capital Reserve

Paid up value of equity capital (128 x 10)	1,280
Less: Share of Capital loss	80

	1,200
Less: Price paid for investment	1,000

Capital Reserve	200
	=====

iv) Calculation of Minority Interest

Paid up value of equity capital (32 x 10)	320
Less: Share of capital loss	<u>20</u>
	300
Add: Share of Revenue profit	<u>30</u>
Total	<u>330</u>

Consolidated Balance sheet

Liabilities	Rs.	Assets	Rs.
Share Capital	2,400	Sundry Assets	
		H Ltd 1,400	
		S Ltd <u>1,950</u>	3,350
Creditors (S Ltd)	300		
Profit and Loss A/c (S Ltd)	120		
Minority interest	330		
Capital Reserve	200		
	3,350		3,350
