### INTRODUCTION

Over the centuries, accounting has remained confined to the financial record-keeping functions of the accountant. But, today's rapidly changing business environment has forced the accountants to reassess their roles and functions both within the organisation and the society. The role of an accountant has now shifted from that of a mere recorder of transactions to that of the member providing relevant information to the decision-making team. Broadly speaking, accounting today is much more than just bookkeeping and the preparation of financial reports. Accountants are now capable of working in exciting new growth areas such as: forensic accounting (solving crimes such as computer hacking and the theft of large amounts of money on the internet); ecommerce (designing web-based payment system); financial planning, environmental accounting, etc. This realisation came due to the fact that accounting is capable of providing the kind of information that managers and other

interested persons need in order to make better decisions. This aspect of accounting gradually assumed so much importance that it has now been raised to the level of an information system. As an information system, it collects data and communicates economic information about the organisation to a wide variety of users whose decisions and actions are related to its performance. This introductory chapter therefore, deals with the nature, need and scope of accounting in this context.

### **Need and Importance of Accounting**

When a person starts a business, whether large or small, his main aim is to earn profit. He receives money from certain sources like sale of goods, interest on bank deposits etc . He has to spend money on certain items like purchase of goods, salary, rent, etc. These activities take place during the normal course of his business. He would naturally be anxious at the year end, to know the progress of his business. Business transactions are numerous, that it is not possible to recall his memory as to how the money had been earned and spent. At the same time, if he had noted down his incomes and expenditures, he can readily get the required information. Hence, the details of the business transactions have to be recorded in a clear and systematic manner to get answers easily and accurately for the following questions at any time he likes

- i. What has happened to his investment?
- ii. What is the result of the business transactions?
- iii. What are the earnings and expenses?
- iv. How much amount is receivable from customers to whom goods have been sold on credit?
- v. How much amount is payable to suppliers on account of credit purchases?
- vi. What are the nature and value of assets possessed by the business concern?
- vii. What are the nature and value of liabilities of the business concern?

### **Meaning**

Accounting is a means of communicating the results of business operations to various parties interested in or connected with the business viz., the owners, creditors, investors, banks and financial institutions, Government and other agencies. Hence, it is rightly called as the language of business.

### **Definition**

The American Institute of Certified Public Accountants has defined accounting as “the art of **recording, classifying and summarizing** in a significant manner and in terms of money transactions and events which are, in part at least, of financial character, and interpreting the results thereof.”

### **OBJECTIVES OF ACCOUNTING**

The main objectives of accounting are

- i. to maintain accounting records.
- ii. to calculate the result of operations.
- iii. to ascertain the financial position.
- iv. to communicate the information to users.

### **Process**

The process of accounting as per the above definition is given below:

In order to accomplish its main objective of communicating information to the users, accounting embraces the following functions.

**i. Identifying:** Identifying the business transactions from the source documents embraces the following functions.

**i. Identifying:** Identifying the business transactions from the source documents.

**ii. Recording:** The next function of accounting is to keep a systematic record of all business transactions, which are identified in an orderly manner, soon after their occurrence in the journal Or subsidiary books.

**iii. Classifying:** This is concerned with the classification of the recorded business transactions so as to group the transactions of similar type at one place. i.e., in ledger accounts. In order to verify the arithmetical accuracy of the accounts, trial balance is prepared

**iv. Summarising :** The classified information available from the trial balance are used to prepare Profit and loss account and balance sheet in a manner useful to the users of accounting information.

**v. Analysing:** It establishes the relationship between the items of the profit and loss account and the balance sheet. The purpose of analysing is to identify the financial strength and weakness of the business. It provides the basis for interpretation.

**vi. Interpreting:** It is concerned with explaining the meaning and significance of the relationship so established by the analysis. Interpretation should be useful to the users, so as to enable them to take correct decisions

**vii. Communicating:** The results obtained from the summarised, analysed and interpreted information are communicated to the interested parties.

## USERS OF ACCOUNTING INFORMATION

The basic objective of accounting is to provide information which is useful for persons and groups inside and outside the organization.

**I. Internal Users:** Internal users are those individuals or groups who are within the organisation like owners, management, employees and trade unions.

**Owners:** To know the profitability and financial soundness of the business.

**Management:** To take prompt decisions to manage the business efficiently.

**Employees and Trade unions:** To form judgement about the earning capacity of the Business since their remuneration and bonus depend on it.

**II. External Users:** External users are those individuals or groups who are outside the organisation like creditors, investors, banks and other lending institutions, present and potential investors, Government, tax authorities, regulatory agencies and researchers.

**Creditors, banks and other:** To determine whether the principal and lending institutions the interest there of will be paid in when due.

**Present investors:** To know the position, progress and prosperity of the business in order

to ensure the safety of their investment.

**Potential investors:** To decide whether to invest in the business or not.

**Government and Tax :** To know the earnings in order to assess authorities the tax liabilities of the business.

**Regulatory agencies:** To evaluate the business operation under the regulatory legislation.

**Researchers:** To use in their research work.

## **BRANCHES OF ACCOUNTING**

The economic development and technological advancements have resulted in an increase in the scale of operations and the advent of the company form of business organisation. This has made the management function more and more complex and increased the importance of accounting information. This gave rise to special branches of accounting.

These are briefly explained below:

1. Financial accounting: The purpose of this branch of accounting is to keep a record of all financial transactions so that:

- (a) The profit earned or loss sustained by the business during an accounting period can be worked out,
- (b) The financial position of the business as at the end of the accounting period can be ascertained, and
- (c) The financial information required by the management and other interested parties can be provided.

2. Cost Accounting: The purpose of cost accounting is to analyse the expenditure so as to ascertain the cost of various products manufactured by the firm and fix the prices. It also helps in controlling the costs and providing necessary costing information to management for decision-making.

3. Management Accounting: The purpose of management accounting is to assist the management in taking rational policy decisions and to evaluate the impact of its decisions and actions.

## **CONCEPTUAL FRAME WORK OF ACCOUNTING**

### **I. BASIC ASSUMPTIONS**

The basic assumptions of accounting are like the foundation pillars on which the structure of accounting is based. The four basic assumptions are as follows:

#### **i. Accounting Entity Assumption**

According to this assumption, business is treated as a unit or entity apart from its owners, creditors and others. In other words, the proprietor of a business concern is always considered to be separate and distinct from the business which he controls. All the business transactions are recorded in the books of accounts from the view point of the business. Even the proprietor is treated as a creditor to the extent of his capital.

#### **iii. Money Measurement Assumption**

In accounting, only those business transactions and events which are of financial nature are recorded. For example, when Sales Manager is not on good terms with Production Manager, the business is bound to suffer. This fact will not be recorded, because it cannot be measured in terms of money.

### **iii. Accounting Period Assumption**

The users of financial statements need periodical reports to know the operational result and the financial position of the business concern. Hence it becomes necessary to close the accounts at regular intervals. Usually a period of 365 days or 52 weeks or 1 year is considered as the accounting period.

### **iv. Going Concern Assumption**

As per this assumption, the business will exist for a long period and transactions are recorded from this point of view. There is neither the intention nor the necessity to wind up the business in the foreseeable future.

## **II. BASIC CONCEPTS OF ACCOUNTING**

These concepts guide how business transactions are reported. On the basis of the above four assumptions the following concepts (principles) of accounting have been developed.

### **i. Dual Aspect Concept**

Dual aspect principle is the basis for Double Entry System of book-keeping. All business transactions recorded in accounts have two aspects - receiving benefit and giving benefit. For example, when a business acquires an asset (receiving of benefit) it must pay cash (giving of benefit).

### **ii. Revenue Realisation Concept**

According to this concept, revenue is considered as the income earned on the date when it is realised. Unearned or unrealised revenue should not be taken into account. The realisation concept is vital for determining income pertaining to an accounting period. It avoids the possibility of inflating incomes and profits.

### **iii. Historical Cost Concept**

Under this concept, assets are recorded at the price paid to acquire them and this cost is the basis for all subsequent accounting for the asset. For example, if a piece of land is purchased for Rs.5,00,000 and its market value is Rs.8,00,000 at the time of preparing final accounts the land value is recorded only for Rs.5,00,000. Thus, the balance sheet does not indicate the price at which the asset could be sold for.

### **iv. Matching Concept**

Matching the revenues earned during an accounting period with the cost associated with the period to ascertain the result of the business concern is called the matching concept. It is the basis for finding accurate profit for a period which can be safely distributed to the owners.

### **v. Full Disclosure Concept**

Accounting statements should disclose fully and completely all the significant information. Based on this, decisions can be taken by various interested parties. It involves proper classification and explanations of accounting information which are published in the financial statements. vi. Verifiable and Objective Evidence Concept This principle requires that each recorded business transactions in the books of accounts should have an adequate evidence to support it. For example, cash receipt for payments made. The documentary evidence of transactions should be free from any bias. As accounting records are based on documentary evidence which are capable of verification, it is universally acceptable.

## **III. MODIFYING PRINCIPLES**

To make the accounting information useful to various interested parties, the basic assumptions and concepts discussed earlier have been modified. These modifying principles are as under.

#### **i. Cost Benefit Principle**

This modifying principle states that the cost of applying a principle should not be more than the benefit derived from it. If the cost is more than the benefit then that principle should be modified.

#### **ii. Materiality Principle**

The materiality principle requires all relatively relevant information should be disclosed in the financial statements. Unimportant and immaterial information are either left out or merged with other items.

#### **iii. Consistency Principle**

The aim of consistency principle is to preserve the comparability of financial statements. The rules, practices, concepts and principles used in accounting should be continuously observed and applied year after year. Comparisons of financial results of the business among different accounting period can be significant and meaningful only when consistent practices were followed in ascertaining them. For example, depreciation of assets can be provided under different methods, whichever method is followed, it should be followed regularly.

#### **iv. Prudence (Conservatism) Principle**

Prudence principle takes into consideration all prospective losses but leaves all prospective profits. The essence of this principle is “anticipate no profit and provide for all possible losses”. For example, while valuing stock in trade, market price or cost price whichever is less is considered.

### **DOUBLE ENTRY SYSTEM**

There are numerous transactions in a business concern. Each transaction, when closely analysed, reveals two aspects. One aspect will be “receiving aspect” or “incoming aspect” or “expenses/loss aspect”. This is termed as the “Debit aspect”. The other aspect will be “giving aspect” or “outgoing aspect” or “income/gain aspect”. This is termed as the “Credit aspect”. These two aspects namely “Debit aspect” and “Credit aspect” form the basis of Double Entry System. The double entry system is so named since it records both the aspects of a transaction. In short, the basic principle of this system is, for every debit, there must be a corresponding credit of equal amount and for every credit, there must be a corresponding debit of equal amount.

#### **Definition of Double Entry System**

According to J.R.Batliboi “Every business transaction has a two-fold effect and that it affects two accounts in opposite directions and if a complete record were to be made of each such transaction, it would be necessary to debit one account and credit another account. It is this recording of the two fold effect of every transaction that has given rise to the term Double Entry System”.

### **FEATURES OF DOUBLE ENTRY SYSTEM**

- i Every business transaction affects two accounts.
- ii Each transaction has two aspects, i.e., debit and credit.

iii It is based upon accounting assumptions concepts and principles.

iv. Helps in preparing trial balance which is a test of arithmetical accuracy in accounting.

v. Preparation of

**Form of Journal**

**Approaches of**

Date	Particulars	Ledger Folio( LF )	Debit Amount	Credit Amount

There are two approaches

I. Accounting I

II. Traditional

**1. Accounting**

This approach

is recorded based on the

accounting equation

, i.e., Assets = Liabilities + Capital

**II. Traditional Approach**

This approach is also called as the British Approach. Recording of business transactions under this method are formed on the basis of the existence of two aspects (debit and credit) in each of the transactions. All the business transactions are recorded in the books of accounts under the ‘Double Entry System’.

**Accounting Rules**

**Personal Accounts (Natural person or Company)**

- Debit the receiver
- Credit the giver

**Real Accounts (cash, property or asset)**

- Debit what comes in
- Credit what goes out

**Nominal Accounts (Business expenses or losses and income or gains )**

- Debit all expenses and losses
- Credit all income and gains

**JOURNAL**

A journal may be defined as the book or original or prime entry containing a chronological record of the transactions from which posting is done to the ledger. The transactions are recorded first in the journal in the order in which they occur.

**Explanation:**

**1. Date:** In the first column, the date of the transaction is entered. The year and the month is written only once, till they change. The sequence of the dates and months should be strictly maintained.

**2. Particulars:** Each transaction affects two accounts, out of which one account is debited and the other account is credited. The name of the account to be debited is written first, very near to the line of particulars column and the word Dr. is also written at the end of the particulars column. In the second line, the name of the account to be credited is written, starts with the word ‘To’, a few space away from the margin in the particulars column to the make it distinct from the

**3. Narration:** After each entry, a brief explanation of the transaction together with necessary details is given in the particulars column with in brackets called narration. The words 'For' or 'Being' are used before starting to write down narration. Now, it is not necessary to use the word 'For' or 'Being'.

**4. Ledger Folio (L.F):** All entries from the journal are later posted into the ledger accounts. The page number or folio number of the Ledger, where the posting has been made from the Journal is recorded in the L.F column of the Journal. Till such time, this column remains blank.

**5. Debit Amount:** In this column, the amount of the account being debited is written

**6. Credit Amount:** In this column, the amount of the account being credited is written.

### STEPS IN JOURNALISING

The process of analysing the business transactions under the heads of debit and credit and recording them in the Journal is called Journalising. An entry made in the journal is called a '**Journal Entry**'.

**Step 1** Determine the two accounts which are involved in the transaction.

**Step 2** Classify the above two accounts under Personal, Real or Nominal.

**Step 3** Find out the rules of debit and credit for the above two accounts.

**Step 4** Identify which account is to be debited and which account is to be credited.

**Step 5** Record the date of transaction in the date column. The year and month is written once, till they change. The sequence of the dates and months should be strictly maintained.

**Step 6** Enter the name of the account to be debited in the particulars column very close to the left hand side of the particulars column followed by the abbreviation Dr. in the same line. Against this, the amount to be debited is written in the debit amount column in the same line.

**Step 7** Write the name of the account to be credited in the second line starts with the word 'To' a few space away from the margin in the particulars column. Against this, the amount to be credited is written in the credit amount column in the same line.

**Step 8** Write the narration within brackets in the next line in the particulars column.

**Step 9** Draw a line across the entire particulars column to separate one journal entry from the other.

Example 1: January 1, 2004 – Saravanan started business with Rs. 1, 00,000

Step1	Determine the two accounts involved in the transaction.		Cash Account	Capital Account			
Step2	Classify the account sunder personal, real or nominal.		Real Account	Personal Account			
Step3	Find out the rules of debit and credit.		2(a)Debit what comes in.	1(b)Credit the giver			
Step4	Date	Particulars	LF	Debit Rs	Credit p.	Rs	p.
	2004 Jan1	Cash A/C TO Capital A/C	Dr 12 45	100000	-	100000	-

**Journal**

Example	(The Amount invested in the Business)					
---------	---------------------------------------	--	--	--	--	--

2 On 1st June 2016 goods sold for Rs. 2000  
 On 2nd June 2016 goods purchase from XYZ ltd for Rs.5000

						7,000	-		

**Example 3**  
 Journalise the following transactions in the books of Amar and post them in the Journal:- 2004  
 March 1 Bought goods for cash Rs. 25,000  
 2 Sold goods for cash Rs. 50,000  
 3 Bought goods for credit from Gopi Rs.19,000  
 5 Sold goods on credit to Robert Rs.8,000  
 7 Received from Robert Rs. 6,000  
 9 Paid to Gopi Rs.5,000  
 20 Bought furniture for cash Rs. 7,000

Example 4

Mr. Normal has the following transactions in the month of April. Write Journal Entries for the transactions.

- 10<sup>th</sup> April: Commenced business with a capital of 1,00,000
- 11<sup>th</sup> April: Purchased goods from Veeru for 20,000
- 13<sup>th</sup> April: Purchased Goods from Cash 15000
- 14<sup>th</sup> April: Purchased Goods from Abhiram for cash 9,000
- 16<sup>th</sup> April: Bought Goods from Sham on credit 12,000
- 17<sup>th</sup> April: Sold goods worth 15,000 to Tarun
- 19<sup>th</sup> April: Sold goods for cash 20,000
- 20<sup>th</sup> April: Sold goods to Utsav for cash 6,000
- 21<sup>st</sup> April: Sold goods to Pranav on credit 17,000
- 22<sup>nd</sup> April: Returned goods to Veeru 3,000
- 23<sup>rd</sup> April: Goods returned from Tarun 1,000
- 25<sup>th</sup> April: Goods taken by the proprietor for personal use 1,000
- 26<sup>th</sup> April: Bought Land for 50,000
- 27<sup>th</sup> April: Purchased machinery for cash 45,000
- 28<sup>th</sup> April: Bought computer from Intel Computers for 25,000
- 28<sup>th</sup> April: Cash sales 15,000
- 29<sup>th</sup> April: Cash purchases 22,000
- 30<sup>th</sup> April: Bought furniture for proprietor's residence and paid cash 10,000

**Journal in the books of Mr. Nirmal for the period from 1<sup>st</sup> to 30<sup>th</sup> April**

## LEDGER

Collection of an entire group of similar accounts in double-entry bookkeeping. Also called book of final entry, a ledger records classified and summarized financial information from journals.

A Ledger is a book which contains all the accounts whether personal, real or nominal, which are first entered in journal or special purpose subsidiary books. According to **L.C. Cropper**, 'the book which contains a classified and permanent record of all the transactions of a business is called the Ledger'.

## Form

**Name of the Account**

- i. Each ledger account is divided into two parts. The left hand side is known as the debit side and the right hand side is known as the credit side. The words 'Dr.' and 'Cr.' are used to denote Debit and Credit.
- ii. The name of the account is mentioned in the top (middle) of the account.
- iii. The date of the transaction is recorded in the date column.
- iv. The word 'To' is used before the accounts which appear on the debit side of an account in the particulars column. Similarly, the word 'By' is used before the accounts which appear on the credit side of an account in the particulars column.
- v. The name of the other account which is affected by the transaction is written either in the debit side or credit side in the particulars column.
- vi. The page number and the date of the transaction are recorded in the Journal Folio (J.F) column.
- vii. The amount pert

**TRIAL BALANCE**

Trial balance is a statement which shows debit balances and credit balances of all accounts in the ledger. The total of the debit balances and credit balances should tally (agree).

In case, there is a difference, one has to check the correctness of the balances brought forward from the respective accounts. Trial balance can be prepared in any date provided accounts are balanced.

## Definition

Trial balance is a statement, prepared with the debit and credit balances of ledger accounts to test the arithmetical accuracy of the books” – J.R. Batliboi.

## Objectives

- i. To check the arithmetical accuracy of the ledger accounts.
- ii. To locate the errors.
- iii. To facilitate the preparation of final accounts.

## Methods

A trial balance can be prepared in the following methods.

- i. **The Total Method :** According to this method, the total amount of the debit side of the ledger accounts and the total amount of the credit side of the ledger accounts are recorded.
- ii. **The Balance Method :** In this method, only the balances of an account either debit or credit, as the case may be, are recorded against their respective accounts.

The balance method is more widely used, as it supplies ready figures for preparing the final accounts.

## Format

Trial Balance of ABC Ltd.  
as on .....

SlNo	Name of Account	L.F	Debit Rs.	Credit Rs.

## Format of Trail Balance

- i) a debit balance is either an asset or loss or expense; and
- ii) a credit balance is either a liability or income or gain.

**Format for Trial Balance:**

Particulars (Debit side)	Rs.	Particulars (Credit side)	Rs.
All Assets	XXX	All Liabilities	XXX
All Expenses and Losses	XXX	All Income and gain	XXX
Opening Balance	XXX	Closing Balance	XXX
Drawings	XXX	Loan	XXX
Purchase	XXX	Sales	XXX
Sales Return	XXX	Purchase Return	XXX
<b>Total</b>	<b>XXX</b>	<b>Total</b>	<b>XXX</b>

**Example 1**

Prepare a Trial Balance with the following information:

Sr. No	Name of Account	Balance (₹)	Sr. No	Name of Account	Balance (₹)
(i)	Capital	2,00,000	(ii)	Stock	70,000
(iii)	Cash	1,80,000	(iv)	Debtors	3,00,000
(v)	Creditors	1,00,000	(vi)	Bank Loan	1,50,000
(vii)	Sales	3,00,000	(viii)	Purchases	2,00,000

Solution 1

**Trial Balance**

S. No.	Account Title	Debit Balance (Rs)	Credit Balance (Rs)
(i)	Capital		2,00,000
(ii)	Stock	70,000	
(iii)	Cash	1,80,000	
(iv)	Debtors	3,00,000	
(v)	Creditors		1,00,000
(vi)	Bank Loan		1,50,000
(vii)	Sales		3,00,000
(viii)	Purchases	2,00,000	
		7,50,000	7,50,000

Example 2

Journalise the following transactions , post them into Ledger and prepare a Trial Balance :

		(₹)			(₹)
2018			2018		
Apr. 1	Mohan commenced business with cash	1,00,000	Apr. 20	Received cash from Gopal	3,950
Apr. 3	Bought goods	5,000		Discount Allowed	50
Apr. 4	Sold goods to Gopal	4,000	Apr. 25	Paid Wages	700
Apr. 10	Bought goods from Ram	8,000	Apr. 27	Paid to Ram in full settlement	7,700
Apr. 15	Paid trade expenses	2,000	Apr. 30	Paid rent	1,500

Solution 2

**Books of Mohan  
Journal**

Date	Particular	L.F.	Debit Amount (Rs)	Credit Amount (Rs)
2018 April 01	Cash A/c To Capital A/c (Commenced business with Cash)	Dr.	1,00,000	1,00,000

**Objective Type Questions:**

1. Accounting mainly deals with:

- a) Recording financial transactions
- b) Marketing activities
- c) Production planning
- d) Human resource planning

**Answer: a**

2. The concept that assumes business will continue for a long time is:

- a) Money measurement
- b) Going concern
- c) Cost concept
- d) Dual aspect

**Answer: b**

3. Double entry system was introduced by:

- a) Adam Smith
- b) Luca Pacioli
- c) Keynes
- d) Marshall

**Answer: b**

4. The first step in accounting is:

- a) Ledger
- b) Journal
- c) Trial Balance
- d) Balance Sheet

**Answer: b**

5. Trial balance is prepared to:

- a) Detect errors
- b) Know profit
- c) Prepare journal
- d) Calculate tax

**Answer: a**

6. Ledger is also known as:

- a) Principal book
- b) Secondary book

- c) Cash book
- d) Journal book

**Answer: a**

7. Business transaction must involve:

- a) Two accounts
- b) One account
- c) Three accounts
- d) Four accounts

**Answer: a**

8. Debit means:

- a) Increase in liability
- b) Left side of account
- c) Right side of account
- d) Profit

**Answer: b**

9. Trial balance is prepared from:

- a) Ledger accounts
- b) Journal
- c) Cash book
- d) Sales book

**Answer: a**

10. Accounting records transactions in terms of:

- a) Goods
- b) Money
- c) Services
- d) Assets

**Answer: b**

## Unit II

### SUBSIDIARY BOOKS

Subsidiary books, also known as special journals or daybooks, are books of original entry used in accounting to record similar, repetitive transactions in chronological order. They divide the main journal to streamline bookkeeping for high-volume transactions, such as credit purchases and sales.

Main Types of Subsidiary Books:

1. **Cash Book:** Records all cash receipts and payments.
2. **Purchase Day Book:** Records only credit purchases of goods.
3. **Sales Day Book:** Records only credit sales of goods.
4. **Purchase Return Book (Return Outward):** Records goods returned to suppliers.
5. **Sales Return Book (Return Inward):** Records goods returned by customers.
6. **Bills Receivable Book:** Records all bills of exchange received.
7. **Bills Payable Book:** Records all bills of exchange accepted.
8. **Journal Proper:** Records transactions that do not fit into any other specialized book.

### CASH BOOK

A **cash book** is a special journal which is used to record all cash receipts and cash payments. The cash book is a book of original entry or prime entry since transactions are recorded for the first time from the source documents. The cash book is a ledger in the sense that it is designed in the form of a cash account and records cash receipts on the debit side and cash payments on the credit side.

#### **Advantages:**

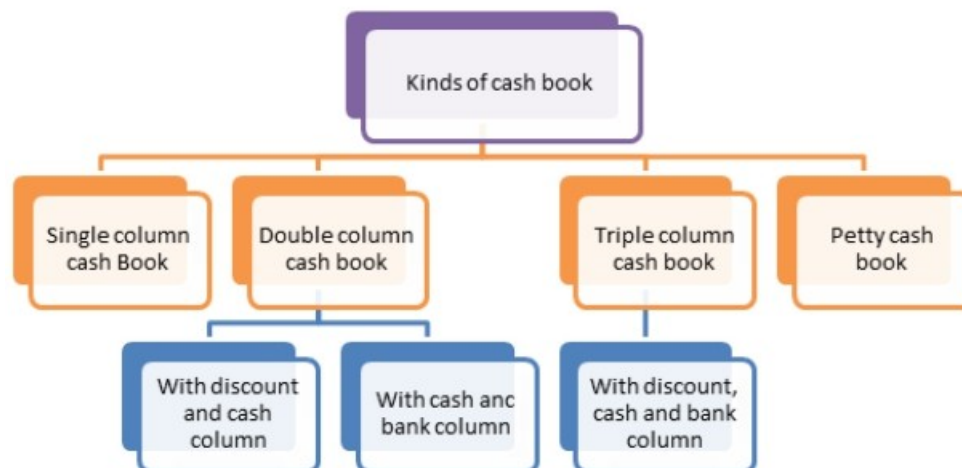

1. **Saves time and labour:** When cash transactions are recorded in the journal a lot of time and labour will be involved. To avoid this all cash transactions are straight away recorded in the cash book which is in the form of a ledger.
2. **To know cash and bank balance:** It helps the proprietor to know the cash and bank balance at any point of time.
3. **Mistakes and frauds can be prevented:** Regular balancing of cash book reveals the balance of cash in hand. In case the cash book is maintained by business concern, it can avoid frauds. Discrepancies if any, can be identified and rectified.

4. **Effective cash management:** Cash book provides all information regarding total receipts and payments of the business concern at a particular period. So that, effective policy of cash management can be formulated.

### Types of Cash Book:

1. **Single Column Cash Book:** A single column Cash Book contains one column of amount on both sides, i.e., one in the debit side and other in the credit side. In the single column Cash Book, only cash transactions are recorded. In the debit side of the Cash Book, all cash receipts are recorded, while in the credit side all cash payments are recorded.
2. **Double Column Cash Book:** A double column Cash Book contains two columns of amount, namely cash column and bank column on both sides. In the cash column of Cash Book, all cash receipts and payments are recorded, according to the rule of Real Accounts. All deposits either in cash or through cheques into the bank account of the business are debited in the bank column and all withdrawals of cash and payments through cheques are credited in the bank column.
3. **Triple Column Cash Book:** In a triple column Cash Book, there are three columns of amount namely, cash, bank and discount. Discount allowed and discount received are recorded in the discount column. While in the debit side, discount allowed is recorded along with the receipts, either in cash or through cheque; whereas, in the credit side, discount received is recorded, along with the payments made either in cash or by issuing cheques.
4. **Petty Cash Book:** This book is used for recording payment of petty expenses, which are of smaller denominations like, postage, stationery, conveyance, refreshment, etc. is known as Petty Cash Book.

Following is the format of the single column cash book:

**Explanation:**

- i. **Date:** This column appears in both the debit and credit side. It records the date of receiving cash at debit side and paying cash at credit side.
  
- ii. **Particulars:** This column is used at both debit and credit side. It records the names of parties (personal account), heads (nominal account) and items (real account) from whom payment has been received and to whom payment has been made.
- iii. **Receipt Number (R.N):** This refers to the serial number of the cash receipt.
- iv. **Voucher Number (V.N) :** This refers to the serial number of the voucher for which payment is made.
- v. **Ledger Folio (L.F):** This column is used in both the debit and credit side of cash book. The ledger page (folio) of every account in the cash book is recorded against it.
- vi. **Amount:** This column appears in both sides of the cash book. The actual amount of cash receipt is recorded on the debit side. The actual payments are entered on the credit side.

**Balancing:**

The cash book is balanced like any other account. The total of the receipt (debit side) column will always be greater than the total of the payment column (credit side). The difference will be written on the credit side as “By Balance c/d”. In the beginning of the next period, to show the cash balance in hand, the balance amount is recorded in the debit side as “To balance b/d”.

**Example:1**

Write the following transactions in the simple cash book and post into the ledger:

1991		
Jan. 1	Cash in hand	15,000
" 6	Purchased goods for cash	2,000
" 16	Received from Akbar	3,000
" 18	Paid to Babar	1,000
" 20	Cash sales	4,000
" 25	Paid for stationary	60
" 30	Paid for salaries	1,000
" 31	Purchased office furniture	2,000

Solution:1

**Cash Book**

Date	Particulars	L.F.	Amount	Date	Particulars	L.F.	Amount
1991							
Jan. 1	To Balance b/d		15,000	Jan. 6	By Purchases a/c		2,000
16	To Akbar		3,000	18	By Babar		1,000
20	To sales a/c		4,000	25	By stationary		60
				30	By Salaries a/c		1,000
				31	By Furniture a/c		2,000
					By Balance c/d		15,940
			22,000				22,000
	To Balance b/d		15,940				

Example:2

Enter the following transactions in a simple cash book for December 2016:

		<b>Rs</b>
01	Cash in hand	12,000
05	Cash received from Bhanu	4,000
07	Rent Paid	2,000
10	Purchased goods Murari for cash	6,000
15	Sold goods for cash	9,000
18	Purchase stationery	300
22	Cash paid to Rahul on account	2,000
28	Paid salary	1,000
30	Paid rent	500

Solution;2

**Cash Book**

**Dr.**

**Cr.**

Date	Particulars	L.F.	Amount Rs	Date	Particulars	L.F.	Amount Rs
2016				2016			
Dec.01	Balance b/d		12,000	Dec.07	Rent		2,000
Dec.05	Bhanu		4,000	Dec.10	Purchases		6,000
Dec.15	Sales		9,000	Dec.18	Stationery		300
				Dec.22	Rahul		2,000
				Dec.28	Salaries		1,000
				Dec.30	Rent		500
				Dec.31	Balance		13,200
			25,000		c/d		25,000

**Example 3**

Record the following transaction in simple cash book for November 2016:

	<b>Rs</b>
01 Cash in hand	12,500
04 Cash paid to Hari	600
07 Purchased goods	800
12 Cash received from Amit	1,960
16 Sold goods for cash	800
20 Paid to Manish	590
25 Paid cartage	100
31 Paid salary	1,000

**Solution:**

**Cash Book**

<b>Dr.</b>				<b>Cr.</b>			
Date	Particulars	L.F.	Amount Rs	Date	Particulars	L.F.	Amount Rs
2016				2016			
Nov.01	Balance b/d		12,500	Nov.04	Hari		600
Nov.12	Amit		1,960	Nov.07	Purchases		800
Nov.16	Sales		800	Nov.20	Manish		590
				Nov.25	Cartage		100
				Nov.30*	Salaries		1,000
				Nov.30*	Balance c/d		12,170
			15,260				15,260

**Note:** There is a misprint in the question as there is a transaction on November 31, which is not possible as there are only 30 days in the month of November.

**Example 4**

Enter the following transaction in Simple cash book for December 2017:

	<b>Rs</b>
01 Cash in hand	7,750
06 Paid to Sonu	45
08 Purchased goods	600
15 Received cash from Parkash	960
20 Cash sales	500
25 Paid to S. Kumar	1,200
30 Paid rent	600

**Solution: 4**

**Cash Book**

Dec.20	Sales		500	Dec.25	S. Kumar		1,200
				Dec.30	Rent		600
				Dec.31	Balance c/d		6,765
			9,210				9,210

**Format of the Double Column Cash Book:**

A **double column cash book** or **two column cash** book is one which consists of two separate columns on the debit side as well as credit side for recording cash and discount. In many concerns it is customary for the trader to allow or to receive small allowance off or against the dues. These allowances are made for prompt settlement of accounts. In certain business almost all receipts or payments are accompanied by such discounts and in order to avoid unnecessary postings separate columns in the cash book are introduced to record the discounts received or allowed. These discount columns are memorandum columns only. They do not form the discount account. The discount column on the debit side of the cash book will record discounts allowed and that on the credit side discounts received.

Debit Side

Credit Side

Date	Particulars	V.N.L.F.	Discount	Cash	Date	Particulars	V.N.L.F.	Discount	Cash

### Example 5

From the following transactions write up a two column cash book and post into ledger:

1991

- Jan. 1 Cash in hand \$2,000
- " 7 Received from Riaz & Co. \$200; discount allowed \$10
- " 12 Cash sales \$1,000
- " 15 Paid Zahoor Sons \$500; discount received \$15
- " 20 Purchased goods for cash \$300
- " 25 Received from Salman \$500; discount allowed \$15
- " 27 Paid Hussan & Sons \$300.
- " 28 Bought furniture for cash \$100
- " 31 Paid rent \$100

Solution:5

#### Cash Book

	Balance										
	b/d										

### **Three Column Cash**

#### **Book: Opening Balance:**

Put the opening balance (if any) on cash in hand and cash at bank on the debit side in the cash book and bank columns. If the opening balance is credit balance (overdraft) then it will be put in the credit side of the cash book in the bank column.

#### **Cheque/Check or Cash Received:**

If a cheque is received from any person and is paid into the bank on the same date it will appear on the debit side of the cash book as "To a Person". The amount will be shown in the bank column. If the cheque received is not deposited into the bank on the same date then the amount will appear in the cash column. Cash received will be recorded in the usual manner in the cash

#### **Payment by Cheque/Check or Cash:**

When we make payment by cheque, this will appear on the credit side "By a person" and the amount in the bank column. If the payment is made in cash it will be recorded in usual manner in the cash column.

#### **Contra Entries:**

If an amount is entered on the debit side of the cash book, and the exact amount is again entered on the credit side of the same account, it is called "contra entry". Similarly an amount entered on the credit side of an account also may have a contra entry on the debit side of the same account.

Contra entries are passed when:

1. **Cash is deposited into bank by office:** It is payment from cash and receipt in bank. Therefore, enter on credit side, cash column "By Bank" and on debit side bank column "To Cash". The reason for making two entries is to comply with the principle of double entry which in such transactions is completed and therefore, no posting of these items is necessary. Such entries are marked in the cash book with the letter "C" in the folio column
2. **Cheque/Check is drawn for office use:** It is payment by bank and receipt in cash. Therefore, enter on the debit side, cash column "To Bank" and on credit side, bank column "By Cash".

**Bank Charges and Bank Interest Allowed:** Bank charges appear on the credit side, bank column "Bank Charges." Bank interest allowed appears on the debit side, bank column "To Interest". **Posting:**

The method of posting three column cash book into the ledger is as follows:

1. The opening balance of cash in hand and cash at bank are not posted.
2. Contra Entries marked with "C" are not posted.
3. All other items on the debit side will be posted to the credit of respective accounts in the ledger and all other items on the credit side will be posted to the debit of the respective accounts.
4. As regards discounts the total of the discount allowed will be posted to the debit of the discount account in the ledger and total of the discount received to the credit side of the discount account.

**Format of the Three Column Cash Book:**

Debit Side							Credit Side						
Date	Particulars	V.N.	L.F.	Dis- count	Cash	Bank	Date	Particulars	V.N.	L.F.	Dis- count	Cash	Bank

Example: 6

On January 1, 1991 Noorani Stores cash book showed debit balance of cash \$1,550 and bank \$13,575. During the month of January following business was transacted.

1991

- Jan.1 Purchased office typewriter for cash \$750; cash sales \$315
- " Deposited cash \$500
- " 4 Received from A. Hussan a cheque for \$2,550 in part payment of his account
- " 6 Paid by cheque for merchandise purchased worth \$1,005
- " 8 Deposited into bank the cheque received from A. Hussan.
- " 10 Received from Hayat Khan a cheque for \$775 in full settlement of his account and allowed him discount \$15.
- " 12 Sold merchandise to Divan Bros. for \$1,500 who paid by cheque which was deposited in the bank.
- " 16 Paid Salman \$915 by cheque, discount received \$5
- " 27 Paid to Gulzar Ahmad by cheque \$650
- " 30 Paid salaries by cheque \$1,750
- " 31 Deposited into bank the cheque of Hayat Khan.
- " 31 Drew from bank for office use \$250.

You are required to enter the above transactions in three column cash book and balance it.

**PETTY CASH BOOK**

Petty means 'small'. The petty cash book is a book where small recurring payments like carriage, cartage, postage and telegram, printing and stationery etc., are recorded by the petty cashier, a person other than the main cashier.

**Imprest System**

Imprest means 'money advanced on loan'. Under this system the amount required to meet out various petty expenses is estimated and given to the petty cashier at the beginning of the specified period, usually a month. All the payments are supported by vouchers. At the end of the given period or earlier, when the petty cashier has spent the petty cash amount, he closes the petty cash

book for the period and balances it. Then he submits the accounts to the cashier. He verifies the petty cash book with the vouchers. After satisfying himself as to the correctness and genuineness of the payments an amount equal to the cash spent is given to the petty cashier. This amount together with the unspent amount will bring up the cash in hand to the amount with which he originally started i.e., **the imprest amount**. Thus the system of reimbursing the amount spent by the petty cashier at fixed period, is known as the **imprest system of petty cash**.

**For example**, On June 1, 2002, Rs.1,000 was given to the petty cashier. He had spent Rs.940 during the month. He will be paid Rs.940 on 30th June by the cashier so that he may again have Rs.1,000 for the next month i.e., July.

### **Analytical Petty Cash Book**

As in the case of any other cash book, petty cash book also has the debit side and the credit side. The debit side is smaller and has very infrequent entries because cash receipt by the petty cashier is mainly from the cashier at the beginning or close of a specified period. The credit side is bigger and thus has many columns. For each important petty expenses there is a separate column, and therefore columnar cash book is another name for this petty cash book. These analytical columns helps to know the actual amount spent on each and every type of petty expenses for the specified period. Each petty payment is first entered in the total payments column, and then recorded in the respective analytical column, so that:

- i. the total amount spent on each expenses for a particular period can be easily ascertained by adding up the respective column.
- ii. only the periodical total of each column is posted to the ledger.
- iii. the total petty payment for any period can be easily ascertained from the total payments column.

The analytical petty cash book may be designed according to the requirements of the business.

## **Errors and Classification**

Rectification of error in accounting is the process of correcting mistakes made in books of original entry or ledger accounts to ensure accurate financial reporting. It involves identifying, analyzing, and adjusting entries (often using a Suspense Account for one-sided errors) before or after the trial balance is finalized.

### **Key Types of Accounting Errors**

Errors of Omission: Completely or partially omitting a transaction.

Errors of Commission: Incorrect recording, posting, or casting (wrong amount/side).

Errors of Principle: Recording transactions in violation of accounting principles (e.g., treating capital expenditure as revenue).

Compensating Errors:

Two or more errors that cancel out each other's effect on the trial balance.

### **Methods of Rectification**

Before Trial Balance: Correct directly in the ledger accounts, often by making an adjusting entry or reversing the wrong entry.

After Trial Balance:

One-Sided Errors: Use a Suspense Account to balance the entry (debiting or crediting the affected account and placing the difference in the suspense account).

Two-Sided Errors: Rectify by passing a journal entry that reverses the incorrect entry and records the correct one.

### **Types of Errors and Treatment:**

One-Sided Errors: Affect only one account (e.g., wrong casting). They cause the trial balance to disagree and require a suspense account for correction.

Two-Sided Errors: Affect two or more accounts (e.g., posting to the wrong account). They do not affect the agreement of the trial balance, and a journal entry is used.

### **Importance**

Accuracy: Ensures financial statements show a true and fair view of the business's financial position.

Compliance: Meets statutory requirements for accurate reporting.

Correct Decision-Making: Prevents faulty decisions based on misleading financial data.

### **Rectification of Two Sided Errors**

Two-sided errors are accounting mistakes that affect both the debit and credit sides of accounts simultaneously, meaning they do not cause the trial balance to disagree. They are rectified by passing a rectifying journal entry that reverses the wrong entry and restores the correct debit and credit.

### **Key Methods to Rectify Two-Sided Errors**

Reversal and Correction: Analyze the incorrect entry, reverse its effect, and record the correct entry.

Suspense Account: Generally, two-sided errors are corrected *without* a suspense account, as they do not affect the agreement of the trial balance.

### **Steps for Rectification:**

1. Identify Correct Entry: What should have been recorded.
2. Identify Incorrect Entry: What was actually recorded.
3. Pass Rectifying Entry: Create a journal entry to fix the mistake.

### **Examples of Two-Sided Errors and Rectification:**

**Error of Principle (Wrong Head of Account):** Purchase of machinery (40000) recorded in the Purchases Account.

- *Rectification:* Debit Machinery A/c, Credit Purchases A/c (To remove from purchases and record in assets).

**Error of Commission (Wrong Person/Account):** Credit sale to Amit (15000) posted to Anil's account.

- *Rectification:* Debit Amit, Credit Anil (To reverse wrong debit and record correct debit).

**Posting to Wrong Side:** Payment of 200 to a creditor debited to Sales Account instead of the creditor's account.

- *Rectification:* Debit Creditor's A/c, Credit Sales A/c.

### **Common Types of Two-Sided Errors:**

1. Errors of Principle: Violating accounting principles (e.g., revenue item treated as capital).
2. Errors of Commission: Posting to the wrong account or recording wrong amounts.
3. Errors of Original Entry: Errors made while recording in subsidiary books.
4. Compensating Errors: One error is cancelled out by another error.

### **Rectification of one sided errors in accounting**

One-sided errors in accounting, which affect only one account and cause a Trial Balance disagreement, are rectified by passing a journal entry using a Suspense Account before finalization, or by adjusting the Profit & Loss account in subsequent periods. Key methods include directly adjusting the ledger account with a note, posting the missing amount, or correcting casting errors in subsidiary books.

### **Common One-Sided Errors and Rectification Methods:**

- **Undercasting/ Overcasting in Subsidiary Books:** If a book (e.g., Sales Book) is undercast, the amount is added to the same side of the account; if overcast, it is posted to the opposite side.
- **Partial Omission (Failure to Post):** If a transaction is recorded in the journal but not posted to one of the ledger accounts, the omitted side is posted with a note or via a Suspense Account.
- **Wrong Amount Posted:** If a transaction is posted with a wrong amount, the difference is corrected on the same side.
- **Posting on the Wrong Side:** If an entry is posted on the wrong side (e.g., debited instead of credited), the account is corrected by posting double the amount on the correct side.

### **Rectification Process Based on Timing**

**Before Trial Balance:** Corrected directly in the ledger by adding a descriptive note.

**After Trial Balance (Before Final Accounts):** A Suspense Account is used to temporarily hold the difference, which is removed once the error is rectified.

After Final Accounts: Corrected using a Profit and Loss Adjustment Account to avoid affecting the current year's profit.

**Bank Reconciliation Statement:**

A bank reconciliation statement is an internal report that matches a company's cash book records with its bank statement, ensuring accuracy and detecting discrepancies. It adjusts for timing differences like outstanding checks or deposits in transit and errors, ultimately verifying that the accounting records align with the actual bank balance.

**BANK RECONCILIATION STATEMENT**

The cash Book and Pass Book are prepared separately. The Businessman prepares the Cash Book and the Pass Book is prepared by the Bank (here by cash book we mean three column cash Book). But as both the books are related to one person and same transactions are recorded in both the books so the balance of both the books should match i.e. the balance as per Pass Book should match to balance at bank as per cash book. But many a times these two balances do not agree then, it becomes necessary to reconcile them by preparing a statement which is called Bank Reconciliation Statement.

A BANK RECONCILIATION STATEMENT may be defined as a statement showing the items of differences between the cash Brook balance and the pass book balance, prepared on any day for reconciling the two balances.

**CAUSES FOR DIFFERENCES**

A transaction relating to bank has to be recorded in both the books i.e. Cash Book and Pass Book but sometimes it happens that a bank transaction is recorded only in one book and not recorded simultaneously in other book this causes difference in the two balances. The causes for difference may be illustrated in detail as follows:

	<b>Causes</b>	<b>Cash Book</b>	<b>Pass Book</b>
1	Cheques issued but not yet presented for payment	Entry is made  Balance =Decreased	No entry is made till the cheques are presented for payment.  Balance= Same as before
2	Cheques paid into the bank but not yet cleared.	Entry is made  Balance = Increased	No entry is made till the cheques are cleared  Balance = same
3	Interest allowed by the Bank	No entry is made till the Pass Book is checked	Entry is made

		Balance = Same	Balance = Increased
4	Interest and Expenses Charged by the Bank	No entry is made till the Pass Book is checked Balance = Same	Entry is made  Balance = Decreased
5	Interest and dividends collected by Bank	No entry is made till the Pass Book is checked Balance = Same	Entry is made  Balance = Increased
6	Direct payments by the bank	No entry is made till the Pass Book is checked Balance = Same	Entry is made  Balance = decreased
7	Direct payments into the bank by a customer	No entry is made till the Pass Book is checked Balance = Same	Entry is made  Balance = Increased
8	Dishonor of a bill discounted with the bank	No entry is made till the pass Book is checked Balance = Same	Entry is made  Balance = decreased
9	Bills collected by the bank on behalf of the customer	No entry is made till the Pass Book is checked Balance = Same	Entry is made  Balance = Increased
10	Errors committed either in Cash

way both the balances will agree. The way the adjustments should be made may be illustrated as follows:

Note: If you start the question with balance as per pass book all the adjustments will be reversed.

Example:

From the following prepare a bank reconciliation statement on 31st March 2005.

1. Balance as per Cash Book 1,80,000
2. Cheques paid into Bank March 2005 but credited by the 7,900 bank in April 2005
3. Cheques issued in March 2005 but cashed in April 2005, 11,000
4. Cheques entered in the Cash Book in March 2005 but 1,000 paid into bank in April 2005
5. Interest allowed by the bank 2500
6. Interest charged by the bank 500

Solution

**Bank Reconciliation Statement as on March 31, 2005**

	Particulars	Amount	Amount
	Balance as per Cash Book		180000
Add	Cheques issued but not cashed	11000	
	Int. allowed by bank	2500	13500
Less	Cheques paid into bank but not yet cleared	7900	
	Cheques entered into Cash Book	1000	
	Interest charged by Bank	500	9400
			184100

### **Key Components and Purpose:**

- Purpose: Ensures financial accuracy, prevents fraud, and confirms the cash balance is correct.
- Key Items:
  - Typically includes deposits in transit, outstanding checks, bank service fees, interest earned, and errors.
- Frequency: Usually prepared monthly, though it can be done daily or weekly for high-volume accounts.

### **Steps to Prepare a Bank Reconciliation Statement:**

1. Compare Records: Match transactions in the cash book (general ledger) against the bank statement.
2. Adjust Bank Balance: Add deposits in transit and deduct outstanding checks.
3. Adjust Book Balance: Deduct bank service fees/charges and add interest income.
4. Identify Discrepancies: Note any errors in either the bank statement or the company's records.
5. Reconcile: Ensure the adjusted bank balance equals the adjusted book balance.
6. Record Entries: Make necessary journal entries in the company's books for adjustments (e.g., fees).

### **Methods of Preparation:**

- Adjusted Balance Method: Both the bank statement and cash book are adjusted to find the true, corrected balance.
- Bank Statement Method: Adjusts the bank statement balance to match the books.
- Book Balance Method: Adjusts the book balance to match the bank statement.

### **Suspense Account & Its Disposal:**

A suspense account is a temporary general ledger account used to hold unclassified, ambiguous, or unmatched transactions often due to trial balance discrepancies until they can be properly categorized. Disposal occurs by investigating, correcting, and transferring these amounts to their correct permanent accounts, reducing the suspense balance to zero.

### **Key Aspects of a Suspense Account:**

- Purpose: Temporarily holds discrepancies, such as transposition errors or omitted entries, ensuring the trial balance matches while investigations are ongoing.
- Common Causes: Partial customer payments, unidentifiable bank receipts, or errors in bookkeeping.
- Location: Found in the General Ledger and usually cleared monthly or quarterly.

**Disposal (Clearing) Process:**

1. Investigation: Analyze the transaction to determine its correct classification.
2. Correcting Entry: Post a journal entry to move the amount from the suspense account to the proper account.
3. Zero Balance: Once all entries are transferred, the suspense account balance must be zero.

**Example:** A 1,000 receipt is unidentifiable and placed in suspense. Upon discovering it is a customer payment, the disposal entry is: Debit Suspense Account (1,000), Credit Accounts Receivable (1,000).

**Objective Type Questions:**

1. Subsidiary books are used to:
  - a) Prepare balance sheet
  - b) Record similar types of transactions separately
  - c) Calculate profit
  - d) Record capital transactions

**Answer:** b) Record similar types of transactions separately

2. The cash book is a:
  - a) Journal only
  - b) Ledger only
  - c) Both journal and ledger
  - d) Subsidiary book only

**Answer:** c) Both journal and ledger

3. Which cash book records cash, bank, and discount columns?
  - a) Single column cash book
  - b) Double column cash book
  - c) Three column cash book

d) Petty cash book

**Answer:** c) Three column cash book

4. Bank reconciliation statement is prepared to:

a) Record bank transactions

b) Reconcile differences between cash book and pass book balances

c) Calculate profit

d) Record sales transactions

**Answer:** b) Reconcile differences between cash book and pass book balances

5. When the bank charges are recorded in the pass book but not in the cash book, the balance will be:

a) Added to cash book balance

b) Deducted from cash book balance

c) Ignored

d) Transferred to suspense account

**Answer:** b) Deducted from cash book balance

6. Rectification of errors means:

a) Ignoring errors

b) Correcting mistakes in accounting records

c) Closing accounts

d) Preparing final accounts

**Answer:** b) Correcting mistakes in accounting records

7. Which of the following errors affect the trial balance?

a) Error of omission

b) Error of commission

c) Error of principle

d) Compensating error

**Answer:** b) Error of commission

8. Suspense account is opened when:

a) Trial balance agrees

b) Trial balance does not agree

c) Cash book is balanced

d) Ledger is closed

**Answer:** b) Trial balance does not agree

9. Suspense account is:

- a) Permanent account
- b) Temporary account
- c) Personal account
- d) Real account

**Answer:** b) Temporary account

10. Petty cash book is mainly used to record:

- a) Large payments
- b) Credit purchases
- c) Small routine expenses
- d) Sales transactions

**Answer:** c) Small routine expenses

### Small Questions – LOCF Mapping Table

### **Unit –III** **FINAL ACCOUNT**

Financial accounting is a well-defined sequential activity which begins with Journal (Journalising), Ledger (Posting), and preparation of Trial Balance (Balancing and Summarisation at the first stage). The next step is the preparation of financial statement.

#### **Financial Statements:-**

It has been emphasised that various users have diverse informational requirements. Instead of generating particular information useful for specific users, the business prepares a set of financial statements, which in general satisfies the informational needs of the users.

The basic objectives of preparing financial statements are:

- (i). To present a true and fair view of the financial performance of the business;
- (ii). To present a true and fair view of the financial position of the business;

For this purpose, the firm usually prepares the following financial statements:

- Trading and Profit and Loss Account
  
- Balance Sheet

Trading and Profit and Loss account, also known as Income statement, shows the financial performance in the form of profit earned or loss sustained by the business. Balance Sheet shows financial position in the form of assets, liabilities and capital. These are prepared on the basis of trial balance and additional information, if any.

#### **Meaning of Final Accounts:**

**Final accounts** give an idea about the profitability and financial position of a business to its management, owners, and other interested parties. The term "**final accounts**" includes the trading account, the **profit and loss account**, and the balance sheet.

### **Objectives of Final Accounts:**

The following are the main **objectives of final accounts**: - To determine gross profit and net profit of the business during the year. To present true financial position of the business on a given date. To make effective control on financial activities of the business.

Financial managers make final accounts as well as corporate **balance** sheets in order to get a clear and summarizing picture of the current financial condition of the company. Final accounts, as well as **balance** sheets, assist shareholders to recognize an organization's financial viability

### **ITEMS TO KNOW BEFORE PREPARATION OF FINANCIAL STATEMENT:**

- i) **Expenditures:** Whenever payment and/or incurrence of an outlay are made for a purpose other than the settlement of an existing liability, it is called expenditure. The expenditures are incurred with a viewpoint they would give benefits to the business. The benefit of an expenditure may extend up to one accounting year or more than one year. If the benefit of expenditure extends up to one accounting period, it is termed as revenue expenditure. If the benefit of expenditure extends more than one accounting period, it is termed as capital expenditure.
- ii) **Receipts:** The similar treatment is given to the receipts of the business. If the receipts imply an obligation to return the money, these are capital receipts. If a receipt does not incur an obligation to return the money or is not in the form of a sale of fixed asset, it is termed as revenue receipt.
- iii) Usually Trading and Profit and Loss account includes revenue incomes and expenditures and Balance sheet includes capital incomes and expenditures.
- iv) **Closing Entries:** The preparation of trading and profit and loss account requires that the balances of accounts of all concerned items are transferred to it for its compilation. Opening stock account, Purchases account, Wages account, Carriage inwards account and direct expenses account are closed by transferring to the debit side of the trading and profit and loss account. This is done by recording the following entry:

Trading A/c Dr.

To Carriage inwards A/c  
 Opening stock A/c  
 To All other direct expenses A/c  
 To The purchases returns or return outwards are closed by transferring its balance to the purchases account. The following entry is recorded for this purpose:  
 Purchases A/c  
 To Wages A/c

Purchases return A/c Dr.

To Purchases A/c

To Sales return A/c

The sales account is closed by transferring its balance to the credit side of the trading and profit and loss account by recording the following entry:

Sales A/c Dr.

To Trading A/c

Items of expenses, losses, etc. are closed by recording the following entries:

Profit and Loss A/c Dr.

To Expenses (individually) A/c

To Losses (individually) A/c

Items of incomes, gains, etc. are closed by recording the following entry:

Incomes (individually) A/c Dr.

Gains (individually) A/c Dr.

To Profit and Loss A/c

## **TRADING AND PROFIT AND LOSS ACCOUNT**

Trading accounting is an account prepared to ascertain the trading results of a business i.e., the gross profit earned or gross loss incurred from buying and selling of goods during a particular period. The excess of net sales [total sales less returns] over cost of goods sold is termed as gross profit.

Trading and Profit and Loss account is prepared to determine the profit earned or loss sustained by the business enterprise during the accounting period. It is basically a summary of revenues and expenses of the business and calculates the net figure termed as profit or loss. The trading and profit and loss can be seen as combination of two accounts, viz. Trading account and Profit and Loss account. The trading account or the first part ascertains the gross profit and Profit and loss account or the second part ascertains net profit.

**1) Trading Account:-** The trading account ascertains the result from basic operational activities of the business. The basic operational activity involves the manufacturing, purchasing and selling of goods. It is prepared to ascertain whether the selling of goods and/or rendering of services to customers have proved profitable for the business or not. Purchases is one of the main constituents of expenses in business organisation. Besides

purchases, the remaining expenses are divided into two categories, viz. direct expenses and indirect expenses. Direct expenses means all expenses directly connected with the manufacture, purchase of goods and bringing them to the point of sale. Direct expenses include carriage inwards, freight inwards, wages, factory lighting, coal, water and fuel, royalty on production, etc. Similarly, sales constitute the main item of revenue for the business. The excess of sales over purchases and direct expenses is called **Gross Profit**. If the amount of purchases including direct expenses is more than the sales revenue, the resultant figure is **Gross Loss**. The computation of gross profit can be shown in the form of equation as:

$$\text{Gross Profit} = \text{Sales} - (\text{Purchases} + \text{Direct Expenses})$$

## 2) Profit and Loss account:-

Accounting to Prof. Carter “Profit and loss account is an account into which all gains and losses are calculated in order to ascertain the excess of gains over the losses or vice versa”. Profit and loss account is an account which prepared to calculate the final profit or loss of the business. All operating expenses and other non-operating income and expenditures and losses are charged to profit and loss account to find out the net profit.

The gross profit or the gross loss is transferred to profit and loss account. The indirect expenses are transferred to the debit side of the second part, viz. profit and loss account. All revenue/gains other than sales are transferred to the credit side of the profit and loss account. If the total of the credit side of the profit and loss account is more than the total of the debit side, the difference is the **Net Profit** for the period of which it is being prepared. On the other hand, if the total of the debit side is more than the total of the credit side, the difference is the **Net Loss** incurred by the business firm.

### Objectives of P/L Accounts

- To know the trading result
- To Identify Net Profit or Loss
- To know the relation between profits and turnover
- To Know components of Income & Expenditure
- To determining efficiency
- To Control over expenses
- To prepare future profit planning

## **Items on the debit side**

### **Debit Side**

#### **I. Operating expense**

- Office & Admn. Expense
- Selling, distb. Expense
- Financial expense
- Maintenance Expense

#### **II. Non Operating expense**

- Losses
- Written off of fictitious assets

### **Credit Side**

#### **I. Operating Income**

- Interest, commission, discount

#### **II. Non operating income**

- Profit sale of assets
- Refund tax
- Rent received

In an equation form, it is shown as follows:

$$\text{Net Profit} = \text{Gross Profit} + \text{Other Incomes} - \text{Indirect Expenses}$$

Net profit or net loss so computed is transferred to the capital account in the balance sheet by way of the following entry:

**i) For transfer of net profit**

Profit and Loss A/c Dr.

To Capital A/c

**ii) For transfer of net loss**

Capital A/c Dr.

To Profit and Loss A/c

## Relevant Items in Trading and Profit and Loss Account

The different items appearing in the trading and profit and loss account are explained hereunder:

- (i). **Opening stock:** It is the stock of goods in hand at the beginning of the accounting year. This is the stock of goods which has been carried forward from the previous year and remains unchanged during the year and appears in the trial balance. In the trading account it appears on the debit side because it forms the part of cost of goods sold for the current accounting year.
- (ii). **Purchases less returns:** Goods, which have been bought for resale appears as purchases on the debit side of the trading account. They include both cash as well as credit purchases. Goods which are returned to suppliers are termed as purchases return. It is shown by way of deduction from purchases and the computed amount is known as Net purchases.
- (iii). **Wages:** Wages refer to remuneration paid to workers who are directly engaged in factory for loading, unloading and production of goods and are debited to trading account.
- (iv). **Carriage inwards/Freight inwards:** These expenses are the items of transport expenses, which are incurred on bringing materials/goods purchased to the place of business. These items are paid in respect of purchases made during the year and are debited to the trading account.
- (v). **Fuel/Water/Power/Gas:** These items are used in the production process and hence are part of expenses.
- (vi). **Packaging material and Packing charges:** Cost of packaging material used in the product are direct expenses as it refers to small containers which form part of goods sold. However, the packing refers to the big containers that are used for transporting the goods and is regarded as an indirect expense debited to profit and loss account.
- (vii). **Salaries:** These include salaries paid to the administration, godown and warehouse staff for the services rendered by them for running the business. If salaries are paid in kind by providing certain facilities (called perks) to the employees such as rent free accommodation, meals, uniform, medical facilities should also be regarded as salaries and debited to the profit and loss account.

- (viii). **Rent paid:** These include office and godown rent, municipal rates and taxes, factory rent, rates and taxes. The amount of rent paid is shown on the debit side of the profit and loss account.
- (ix). **Interest paid:** Interest paid on loans, bank overdraft, renewal of bills of exchange, etc. is an expense and is debited to profit and loss account.
- (x). **Commission paid:** Commission paid or payable on business transactions undertaken through the agents is an item of expense and is debited to profit and loss account.
- (xi). **Repairs:** Repairs and small renewals/ replacements relating to plant and machinery, furniture, fixtures, fittings, etc. for keeping them in working condition are included under this head. Such expenditure is debited to profit and loss account.
- (xii). **Miscellaneous expenses:** Though expenses are classified and booked under different heads, but certain expenses being of small amount clubbed together and are called miscellaneous expenses. In normal usage these expenses are called Sundry expenses or Trade expenses.

#### **Items on the credit side**

- (i). **Sales less returns:** Sales account in trial balance shows gross total sales (cash as well as credit) made during the year. It is shown on the credit side of the trading account. Goods returned by customers are called return inwards and are shown as deduction from total sales and the computed amount is known as net sales.
- (ii). **Other incomes:** Besides salaries and other gains and incomes are also recorded in the profit and loss account. Examples of such incomes are rent received, dividend received, interest received, discount received, commission received, etc.
- (iii). **Closing stock:** It may be noted that closing stock does not normally form part of trial balance and is brought into books with the help of the following journal entry :

Closing stock A/c Dr.

To Trading A/c

This entry opens a new account of asset, which is transferred to the balance sheet. The closing stock shall be an opening stock for the next year and shall be sold during the year.

## **BALANCE SHEET**

The balance sheet is a statement prepared for showing the financial position of the business summarising its assets and liabilities at a given date. The assets reflect debit balances and liabilities (including capital) reflect credit balances. It is prepared at the end of the accounting period after the trading and profit and loss account have been prepared. It is called balance sheet because it is a statement of balances of ledger accounts that have not been transferred to trading and profit and loss account and are to be carried forward to the next year with the help of an opening entry made in the journal at the beginning of the next year.

According to Howard, a Balance sheet may be defined as – ‘a statement which reports the values owned by the enterprise and the claims of the creditors and owners against these properties’.

It is showing the financial position of the concern as on the last day of the accounting year. It comprises of a list of assets, liabilities and capital.

### **Balance Sheet Equation:**

- **Assets** = Liabilities + Capital
- **Capital** = Assets – Liabilities

### **Objectives and Functions of Balance Sheet**

- To identify the financial position of a company
- To know the liquidity picture of the concern
- To know the solvency position of the concern
- To identify nature and value of assets
- To get Nature and extent of liabilities and actual capital

### **Preparing Balance Sheet**

All the account of assets, liabilities and capital are shown in the balance sheet. Accounts of capital and liabilities are shown on the left hand side, known as Liabilities. Assets and other debit balances are shown on the right hand side, known as Assets. There is no prescribed form of Balance sheet, for a proprietary and partnership firms. (However, Schedule VI Part I of the Companies Act 1956 prescribes the format and the order in which the assets and liabilities of a company should be shown). The horizontal format in which the balance sheet is prepared is shown below.

### **Relevant Items in the Balance Sheet**

Items which are generally included in a balance sheet are explained below:

- 1) **Current Assets:** Current assets are those which are either in the form of cash or a can be converted into cash within a year. The examples of such assets are cash in hand/bank, bills receivable, stock of raw materials, semi-finished goods and finished goods, sundry debtors, short term investments, prepaid expenses, etc.
- 2) **Current Liabilities:** Current liabilities are those liabilities which are expected to be paid within a year and which are usually to be paid out of current assets. The examples of such liabilities are bank overdraft, bills payable, sundry creditors, short-term loans, outstanding expenses, etc.
- 3) **Fixed Assets:** Fixed assets are those assets, which are held on a long-term basis in the business. Such assets are not acquired for the purpose of resale, e.g. land, building, plant and machinery, furniture and fixtures, etc. Sometimes the term 'Fixed Block' or 'Block Capital' is also used for them.
- 4) **Intangible Assets:** These are such assets which cannot be seen or touched. Goodwill, Patents, Trademarks are some of the examples of intangible assets.
- 5) **Investments:** Investments represent the funds invested in government securities, shares of a company, etc. They are shown at cost price. If, on the date of preparation the balance sheet, the market price of investments is lower than the cost price, a footnote to that effect may be appended to the balance sheet.
- 6) **Long-term Liabilities:** All liabilities other than the current liabilities are known as long-term liabilities. Such liabilities are usually payable after one year of the date of the balance sheet. The important items of long term liabilities are long-term loans from bank and other financial institutions.
- 7) **Capital:** It is the excess of assets over liabilities due to outsiders. It represents the amount originally contributed by the proprietor/ partners as increased by profits and interest on capital and decreased by losses drawings and interest on drawings.
- 8) **Drawings:** Amount withdrawn by the proprietor is termed as drawings and has the effect of reducing the balance on his capital account. Therefore, the drawings account is closed by transferring its balance to his capital account. However it is shown by way of deduction from capital in the balance sheet.

### **OPENING ENTRY**

The balances of various accounts in balance sheet are carried forward from one accounting period to another accounting period. In fact, the balance sheet of an accounting

Example 1

Following are the balances extracted from the books of Manish Gupta on 31st March, 2018:

	₹		₹
Capital	1,90,000	Cash at Bank	26,000
Drawing	7,000	Salaries	8,000
Plant and Machinery	1,20,000	Repairs	1,900
Delivery Vehicle	26,000	Stock on 1st April, 2017	16,000
Sundry Debtors	36,000	Rent	4,500
Sundry Creditors	26,000	Manufacturing Expenses	1,500
Purchases	20,000	Bills Payable	23,500
Sales	42,000	Bad Debts	5,000
Wages	8,000	Carriage	1,600

Prepare Trading and Profit and Loss Account and balance Sheet as at 31st March, 2018 after following adjustments are made:

- (i) Closing Stock was ₹ 16,000.
- (ii) Depreciate Plant and Machinery @ 10% and Delivery Vehicle @ 15%.
- (iii) Unpaid Rent amounted to ₹ 500.

Solution 1

	<b>2,08,100</b>	Cash at Bank		26,000
				<b>2,08,100</b>

**Example 2**

Prepare Trading and Profit and Loss Account and Balance Sheet from the following balances relating to the year ended 31st March, 2018:

	₹		₹
Capital	1,00,000	Wages	50,000
Creditors	12,000	Bank	10,000

Returns Outward	5,000	Repairs	500
Sales	1,64,000	Stock on 1st April, 2017	20,000
Bills Payable	5,000	Rent	4,000
Plant and Machinery	40,000	Manufacturing Expenses	8,000
Sundry Debtors	24,000	Trade Expenses	7,000
Drawing	10,000	Bad Debts	2,000
Purchases	1,05,000	Carriage	1,500
Returns Inward	3,000	Fuel and Power	1,000

*Additional Information:*

(i) Closing Stock was valued at ₹ 14,500.

(ii) Depreciate Plant and Machinery by ₹ 4,000.

(iii) Write off Bad Debts ₹ 5,000.

(iv) A sum of ₹ 400 is due for repairs.

Solution 2

### Objective Type Questions:

1. Closing stock appears in:

- a) Trial balance only
- b) Trading account only
- c) Trading account and Balance sheet
- d) Profit and loss account

**Answer:** c) Trading account and Balance sheet

2. Outstanding expenses are:

- a) Expenses paid in advance
- b) Expenses due but not yet paid
- c) Expenses not recorded
- d) Capital expenses

**Answer:** b) Expenses due but not yet paid

3. Prepaid expenses are:

- a) Expenses paid in advance
- b) Expenses due
- c) Expenses unpaid
- d) Revenue expenses

**Answer:** a) Expenses paid in advance

4. Depreciation refers to:

- a) Increase in asset value
- b) Decrease in asset value
- c) Increase in capital
- d) Increase in profit

**Answer:** b) Decrease in asset value

5. Bad debts are:

- a) Amount received from debtors
- b) Amount not recoverable from debtors

c) Amount payable to creditors

d) Amount received in advance

**Answer:** b) Amount not recoverable from debtors

6. Provision for doubtful debts is created to:

a) Increase profit

b) Meet future possible bad debts

c) Reduce expenses

d) Increase capital

**Answer:** b) Meet future possible bad debts

7. Accrued income is:

a) Income received in advance

b) Income earned but not yet received

c) Income not recorded

d) Income paid in advance

**Answer:** b) Income earned but not yet received

8. Discount allowed is:

a) Expense for business

b) Income for business

c) Asset

d) Liability

**Answer:** a) Expense for business

9. Interest on drawings is:

a) Expense for the firm

b) Income for the firm

c) Liability

d) Asset

**Answer:** b) Income for the firm

10. Interest on capital is:

a) Expense for the business

b) Income for the business

c) Asset

d) Liability

**Answer:** a) Expense for the business

### Small Questions – LOCF Mapping Table

S.No	Small Question	CO	Bloom's Level	PO
1	What are Final Accounts in Accounting?	CO1	Remember	PO1
2	Define Closing Stock.	CO2	Remember	PO2

5	Explain the accounting of Interest on Drawings and Capital in Final Accounts.	CO2	Understand	PO2

## UNIT - IV

### HIRE PURCHASE AND INSTALMENT SYSTEM

#### Hire Purchase System

It is a system of purchase under which the buyers enters into agreement with the seller to pay the price in installments. The buyer gets the possession of goods immediately on paying the down payment but does not get ownership. He becomes the owner only after the last installment is paid. Under this system the buyer fails to pay any installment, the seller has the right to tack back the goods.

#### Difference between Hire Purchase and Sale

The main difference between hire purchase agreement and sale are given below:

1. Under the sales ownership is transferred at the time of purchase. But under hire purchase ownership is transferred only after payment of the last installment
2. In the case of sale payment of price is generally made in lump sum. In the case of hire purchase payment of price is always made installment
3. In the case of sales buyer can dispose of the goods in any way he likes. But a buyer under hire purchase agreement has no such right before he becomes the owner on payment of the installment.
4. In the case of sale on credit the seller can sue the buyer for the payment of the price outstanding. Bur a seller under hire purchase system can take back the goods in case of default by the buyer in payment of any installment
5. In case of sale, the buyer's position is like that of an owner. But the position of an under hire purchase is like that of a bailee in respect of the goods until he becomes the owner.
6. In case of sale on immediate cash, the price does not include any interest. But under hire purchase the installment includes interest.

#### Accounting for hire purchase transactions in the books of hire purchaser

There two methods for making entries of the hire purchase transactions in the books of hire purchaser.

- 1) When asset is recorded at full cash price and
- 2) When asset is recorded at the cash price actually paid

#### When asset is recorded at full cash price

Under this method the asset is recorded at the full price. Thus this method treats the hire purchaser as owner of the asset.

#### Accounting entries in the books hire purchaser as follows:

- 1) When the asset is acquired on hire purchase  
Asset account A/c      Dr.  
    To hire vendor a/c (cash price)

- 2) When down payment is made
  - Hire vendor a/c    Dr.
  - To cash a/c
- 3) When interest becomes due
  - Interest a/c        Dr.
  - To hire vendor a/c
- 4) When installment is paid
  - Hire vendor a/c    Dr.
  - To cash a/c
- 5) When depreciation is charged on asset
  - Depreciation a/c   Dr.
  - To asset a/c

### When seller takes possession of the total assets sold

In the case accounting entries are similar to those of complete repossession. The additional precautions to be taken are:

- 1) Both the buyer and seller do not close seller's account and buyer's account in their respective books. The entry for repossession is passed with the agreed value of assets taken by the vendor.
- 2) The buyer finds out the value of asset still left with him using the normal rate of depreciation. This account shows the balance of asset, which is left, to him
- 3) After crediting the asset account with the value of asset taken away by the seller and after keeping the balance of asset left, the difference by the asset account is transferred to P&L account

### **Illustration 3**

A Machinery is sold on hire purchase. The terms of payment is four annual installment of 6000 at the end of each year commencing from the date of agreement. Interest is charged @ 20% and is included in the annual payment of 6000

Show machinery account and hire vendors account in the books of the purchaser who defaulted in the payment of the third yearly payment where upon the vendors re-possessed the machinery. The purchaser provides depreciation on the machinery @ 10% p.a on written down value method. All workings should form part of your answer

### **Solution**

#### **Calculation of Cash Price**

No. of Instalment	Amount due after payment of instalment	Amount of instalment	Total amount	Interest 20/120	Opening Balance
1	-	6000	6000	1000	5000
2	5000	6000	11000	1833	9167
3	9167	6000	15167	2528	12639
4	12639	6000	18639	3106	15533

Cash price of the machinery is Rs. 15533

### Illustration 5

Roman transport co. purchased five trucks from Ramos Auto Ltd., on the January, 2016 on hire purchase system. The cash price of each truck is 120000. The mode of payments was as follows:

- (i) 15% of cash price down
- (ii) 25% of cash price at the end of each year for 4 year

Roman transport co. writes off 15% depreciation annually on diminishing balance. The payment due to 31st December 2016 could not be made. Ramos Auto Ltd. agree to leave three Trucks with the buyer on the conditions that the value of the other two Trucks would be adjusted against the amount due, the trucks being valued at cost less 25% depreciation on diminishing balance.

Show the necessary accounts in the books of Roman Transport co.

### Solution

**Illustration 6**

P purchased 4 cars of 4 cars was 60000 to be paid 15000 down and 3 instalment of 15000 each at the end of each year interest is charged @ 5% p.a, buyer depreciates cars @10% p.a on straight line method.

After having paid down payment and first instalment, buyer could not pay 2nd instalment and seller took possession of three cars at an agreed value to be calculated after depreciating cars at 20% p.a on written down value method one car was left with the buyer. Seller after spending 1200 on repairs sold away all the three cars to X for 35000 open ledger accounts in the books of both parties

**Solution**

**Calculation of value of asset taken by the seller**

Number of cars taken by the seller	3	
Cost Price	$3 \times 14000$	42,000
Less:		
Depreciation 1st Year	8400	15120
	6720	
Value of assets taken		26,880

Value of car left with buyer		
Number of car	1	
Cost Price		14000
Less:		
Depreciation 1st Year	1400	2800
value of asset left		11200

**In the books of P – Asset Account**

Year I	To Hire Vendor a/c	56000	Year I	By Depreciation	5600
				By Balance c/d	50400
		56000			56000
Year II	To Balance b/d	50400	Year II	By Depreciation	5600
				By Hire Vendor a/c	26880
				By Profit and Loss a/c (balancing figure)	6720
				By Balance c/d	11200
		50400			50400

**Hire Vendor Account**

	To Cash (Repairs)	1200			
	To P & L a/c	6920			
		35000			35000

### **INSTALMENT SYSTEM**

It is a system of a sale in which the price of the article is paid in instalments along with interest on unpaid balances. Under this system the buyer gets the possession and ownership of the goods at the time of signing agreements.

#### **Books of Buyer:**

Buyer debits asset account with full cash price, credits vendor's account with full instalment price and debits interest suspense account with the difference between full cash price and full instalment price. Interest is debited to interest suspense account (not interest account) because it includes interest in respect of a number of years. Every year interest account is debited and interest suspense account is credited with the interest of current year. Interest account, at the end of the year, is closed by transferring to profit and loss account. The balance of vendor account should be shown in the balance sheet after deducting amount in interest suspense account. Vendor is paid the instalment due to him and entry for the depreciation is passed in the usual way.

#### **Books of Seller:**

The seller debits the purchaser with the full amount (instalment price) payable by him and credits sales account by the full cash price and credits interest suspense account by the difference between the total instalment price and total cash price. Seller, like the buyer, also transfers the amount of interest due from the interest suspense account interest account every year. Interest account is closed by transferring to profit and loss account and the purchaser account should be shown in the balance sheet after deducting amount in interest suspense account. On receiving the instalment the vendor debits cash/bank account and credits purchaser's account.

**Objective Type Questions:**

1. Hire purchase system means:

- a) Immediate cash payment
- b) Payment in installments with ownership after final payment
- c) Credit sale without installments
- d) Cash purchase only

**Answer:** b) Payment in installments with ownership after final payment

2. Ownership of goods under hire purchase passes to the buyer:

- a) At the time of agreement
- b) After final installment payment
- c) After first installment
- d) At delivery of goods

**Answer:** b) After final installment payment

3. Default occurs when:

- a) Payment is made on time
- b) Buyer fails to pay installment
- c) Seller delivers goods
- d) Profit increases

**Answer:** b) Buyer fails to pay installment

4. Repossession means:

- a) Buyer returning goods voluntarily
- b) Seller taking back goods due to default
- c) Buyer selling goods
- d) Goods destroyed

**Answer:** b) Seller taking back goods due to default

5. Hire purchase price is:

- a) Cash price only

- b) Cash price plus interest
- c) Interest only
- d) Discount price

**Answer:** b) Cash price plus interest

6. Installment system differs from hire purchase because:

- a) Ownership transfers immediately
- b) Ownership transfers after final payment
- c) Goods are free
- d) No payment required

**Answer:** a) Ownership transfers immediately

7. Hire purchase trading account is prepared by:

- a) Buyer
- b) Seller
- c) Creditor
- d) Debtor

**Answer:** b) Seller

8. Interest in hire purchase is charged on:

- a) Total price
- b) Cash price balance
- c) Profit
- d) Discount

**Answer:** b) Cash price balance

9. When goods are repossessed, the buyer:

- a) Keeps goods
- b) Returns goods to seller
- c) Pays extra
- d) Gets profit

**Answer:** b) Returns goods to seller

10. Installment system is mainly used for:

- a) Small purchases
- b) Expensive goods purchase with installment payments
- c) Free goods
- d) Cash purchases

**Answer:** b) Expensive goods purchase with installment payments

### Small Questions – LOCF Mapping Table

S.No	Small Question	CO	Bloom's Level	PO
1	Define Hire Purchase System.	CO1	Remember	PO1
2	What is meant by Default in Hire Purchase?	CO2	Remember	PO2

3	Explain Repossession under Hire Purchase.	CO2	Understand	PO2
4	What is a Hire Purchase Trading Account?	CO2	Remember	PO2
5	Define the Installment System in Hire Purchase.	CO2	Remember	PO2

### Big Questions – LOCF Mapping Table

### SINGLE ENTRY SYSTEM

#### INTRODUCTION

Generally tiny organizations, do not have any knowledge of accounting. They do not want to follow any systematic or scientific methods of accounting. They prefer to maintain only few accounts. To ascertain profit or loss of their business, they prepare only the statement of profit or loss.

They record two transactions according to their desire. At the end of the year, with the help of the available data, the profit or loss of the business are ascertained through a system known as single entry system. In this chapter, an attempt is made to ascertain the profit or loss under single entry system.

#### SINGLE ENTRY SYSTEM – MEANING AND DEFINITION

Under this system, cash book and personal accounts are maintained. This system does not totally follow the principles of Double Entry System. According to R.N.Carter, Single Entry system cannot be termed as a system, as it is not based on any scientific system like Double Entry System. For this purpose, Single Entry System is now a days known as preparation of accounts from incomplete records. Particularly this system is followed by those firms whose transactions are limited and at the same time, who maintain only the essential records. There is no hard and fast rule for maintaining records under this system, i.e. it depends on the circumstances and the necessity of the firm.

#### FEATURES OF SINGLE ENTRY SYSTEM

- Books according to this system can be kept only in sole trader or partnership firm organizations. Limited companies, because of legal provisions, cannot keep books on Single Entry System.
- In this system it is very common to keep only personal accounts and to avoid real and nominal accounts. Therefore, this system is defined as a system where only personal accounts are kept.
- It is very common in this system to keep one cash book which mixes up business as well as private transactions.
- It is also quite often seen that for information, one has to depend on original vouchers. For example, in case of credit sales, proprietor may keep the invoice without recording

it anywhere and at the end of year the total of the invoices gives an idea of total credit sales of the business.

- This system lacks uniformity as it is a mere adjustment of double entry system according to the conveniences of the person.

### **MERITS OF SINGLE ENTRY SYSTEM**

1. Since this system is very simple, anyone can maintain it without any adequate knowledge of accounting.
2. Limited accounts are to be opened under this system since the transactions relating to only personal accounts are recorded.
3. Since the numbers of books are limited, expenses relating to the keeping of records are also nominal.
4. In the case of accounting for an event, i.e. household, social and festival, etc., it is very helpful.

### **LIMITATIONS OF SINGLE ENTRY SYSTEM**

- a. Arithmetical accuracy of the books of account is not found out since the Trail Balance cannot be prepared under this system.
- b. It is also not possible to ascertain the correct amount of profit or loss of the firm, (i.e. results from operation) since the nominal accounts are missing under this system,
- c. Similarly, Balance Sheet cannot be prepared since the real accounts are not recorded. Therefore, the real financial position cannot be known at the end of the accounting period.
- d. As the arithmetical accuracy is not possible, the possibility of committing fraud or manipulation is greater in comparison with Double Entry System.
- e. Any statistical information relating to the business or the comparison between the two firms or the interim accounts, etc. which help the management to take decision or to formulate policy in future is not possible under this system.
- f. Outsiders (e.g. Income-tax authorities, Bank, etc.) do not rely on this system.

## METHODS OF ASCERTAINMENT OF PROFIT OR LOSS UNDER SINGLE ENTRY SYSTEM

Under Single Entry System, the following two methods are followed to ascertain profit or loss

- (1) Statement of affairs method/Increase in Net worth Method and
- (2) Conversion method.

### STATEMENT OF AFFAIRS METHOD / INCREASE IN NET WORTH METHOD

Under this method, Profit or Loss made by the business is ascertained by comparing the capital at the end of the trading period with that at the beginning. If the Capital at the close is higher, the increase is the measure of Profits and if the Capital at the close is lower the decrease is the measure of loss. The Capital either at the beginning or at the close- can be ascertained by preparing a statement of affairs at the opening and also as at the closing date.

#### Statement of Affairs

A statement of affairs, like Balance Sheet, is a statement of all assets and liabilities. One should consider different adjustments, like depreciation on assets, outstanding and prepaid expenses, etc. at the time of preparing a statement of affairs. **Capital = Assets – Liabilities**

#### Statement of Affairs as on .....

Liabilities	Amount Rs.	Assets	Amount Rs.
Sundry creditors	***	Cash in hand	***
Bills payable	***	Sundry debtors	***
Outstanding expenses	***	Fixed assets	***
Bank overdraft	***	Bills Receivable	***
Capital (Opening / Closing)	***	Prepaid expenses	***
		Stock	***
	***		***

**Specimen Profit and Loss**  
**Profit and Loss for the year ended.....**

Particulars	Amount Rs.
Closing capital	***
<b>Add: Drawings</b>	***
	***
<b>Less: Additional Capital</b>	***
	***
<b>Less: Opening Capital</b>	***
<b>Profit / Loss</b>	***

**Difference between Double Entry System and Single Entry System**

No.	Basis of Distinction	Double Entry System	Single Entry System
1.	Principle	For every debit there is a corresponding credit and vice versa.	Debit and credits do not agree.
2.	Recording of transaction	Debit and credit aspects of all transactions are recorded	Debit and credit aspects of all transactions are not recorded.
3.	Nature of accounts maintained	Maintains complete record of personal, real and nominal accounts.	All incomplete record. Only personal and cash accounts are
4.	Trial balance	Arithmetical accuracy of the records can be checked by preparing a trial balance.	Trial balance cannot be prepared.
5.	Determination of profit or loss and financial position	A profit and loss account and balance sheet can be conveniently prepared since the book of accounts present a complete picture.	A profit & loss account and balance sheet cannot be conveniently prepared since the accounting records are incomplete.
6.	Suitability	It is suitable for all types of traders.	It is suitable for only small traders.
7.	Dependability	It is the only scientific system of keeping books of accounts.	It not a system. It is incomplete and unscientific.

8.	Acceptability	Records are acceptable for the purpose of tax, loans, etc.,	Records are not acceptable for the purpose of tax claims, loans, etc.,
9.	Internal check	Internal check is possible	Internal check is not possible.

### **Difference between Statement of Affairs and Balance Sheet**

Balance Sheet is also a statement of assets and liabilities just like that of statement of affairs. But there are some differences between these two. Let us now see that differences between Statement of affairs and Balance Sheet.

No.	Statement of Affairs	Balance sheet
1	It is drawn under the Single Entry System	It is drawn under the Double Entry System
2	It is drawn from the incomplete and unsystematic records.	It is compiled out of the ledger balances as disclosed in complete and systematic records.
3	It cannot be relied upon since the preparation of Trial Balance is not Possible	It is arithmetically proved since it is drawn after the Trial Balance has proved arithmetical accuracy.
4	It shows the financial position without any explanation.	It shows the financial position with some explanations.

### **Differences between Profit and Loss account and Statement of the profit or Loss**

No.	Profit and Loss account	Statement of Profit (Or) Loss
1	Gross Profit and Net profit can be found out	Only Net profit can be found out.
2	The performance of the business can be measured.	The performance of the business cannot be measured properly
3	It helps the users in taking important decisions.	The users cannot rely this system because the profit is ascertained from incomplete records.
4	It helps to ascertain the income from the business and income from other sources	No such allocation is possible under this system.
5	Expenses are divided into direct and indirect.	There is no such division of expenditure.

**Illustration:**

The capital at the beginning of the year is Rs.30,000 and that at the end is Rs.38000. Calculate the amount of profit earned during the period, assuming that there is no additional capital introduced or no drawings.

Solution:

**Statement of profit or Loss**

<b>Particulars</b>	<b>Amount Rs.</b>
Capital at the end	38,000
<b>Less:</b> Capital in the beginning	30,000
<b>Profit</b>	<b>8,000</b>

**Illustration:**

Calculate the missing information:

	<b>Rs.</b>
Closing Capital	32,000
Drawings	4,800
Additional Capital	8,000
Profit made during the year	9,600

**Solution:**

**Statement of Profit or Loss**

<b>Particulars</b>	<b>Amount Rs.</b>
Closing capital	32,000
<b>Add:</b> Drawings	4,800
	36,800
<b>Less:</b> Additional Capital	8,000
	28,800
<b>Less:</b> Opening Capital (Balancing figure)	19,200
<b>Profit</b>	<b>9,600</b>

**Illustration:**

Calculate the missing information:

**Rs.**

Closing capital	1,63,000
Additional Capital	42,300
Drawings	25,200
Loss	12,600

**Solution:****Statement of profit or loss**

<b>Particulars</b>	<b>Amount Rs.</b>
Closing capital	1,63,800
<b>Add:</b> Drawings	25,200
	1,89,000
<b>Less:</b> Additional Capital	42,300
	1,46,700
<b>Less: Opening Capital (Balancing figure)</b>	<b>1,59,300</b>
Loss	12,600

Calculate the missing information

**Rs.**

Capital in the beginning	24,000
Profits made during the year	9,000
Capital introduced during the year	12,000
Capital at the end	39,000

**Solution:****Statement of profit or loss**

<b>Particulars</b>	<b>Amount Rs.</b>
Closing capital	39,000
<b>Add: Drawings (Balancing figure)</b>	<b>6,000</b>
	45,000
<b>Less: Additional Capital</b>	12,000
	33,000
<b>Less: Opening Capital</b>	24,000
Profit	9,000

**Illustration:**

Mrs. Revathi Started business with Rs.1,20,000 as capital on 1.4.2013. During the year for his personal use, withdrawn at the rate of R.1,000 per month. He introduced Rs.20,000 as additional capital. His position on 31.3.2014 was as follows:

	<b>Rs.</b>
Bank balance	8,000
Stock	80,000
Sundry Debtors	50,000
Furniture	2,500
Cash in hand	2,000
Sundry Creditors	25,000
Expenses outstanding	1,000

She keeps her books under single entry system. Determine his profit or loss for the year 2013-14

**Solution:****Statement of affairs of Mrs. Ravathi as on 31.3.2013**

<b>Liabilities</b>	<b>Amount Rs.</b>	<b>Assets</b>	<b>Amount Rs.</b>
Sundry Creditors	25,000	Stock	80,000
Outstanding expenses	1,000	Sundry Debtors	50,000
Capital (Balancing figure)	1,16,500	Furniture	2,500
		Cash in hand	2,000
		Bank balance	8,000
	<b>1,42,500</b>		<b>1,42,500</b>

**Statement of profit of Mrs. Ravathi for the period ended 31.3.2014**

<b>Particulars</b>	<b>Amount Rs.</b>
Closing Capital	1,16,500
<b>Add:</b> Drawings (1000 X 12)	12,000
	1,28,500
<b>Less:</b> Additional Capital	20,000
	1,08,500
<b>Less:</b> Opening Capital	1,20,000
<b>Loss</b>	<b>11,500</b>

**Illustration:**

Mr. Gundurao keeps his books under single entry system, Assets and liabilities on 31.3.2009 and 31.3.2010 stood as follows:

	31.3.2009 (Rs.)	31.3.2010 (Rs.)
Sundry creditors	15,000	30,000
Furniture	15,000	15,000
Sundry Debtors	75,000	1,00,000
Stock	35,000	50,000
Cash Balance	5,000	60,000

He introduced an additional capital of Rs.15,000 during the year. He withdrew Rs.35,000 for domestic purpose. Find out the profit or loss for 2009-10

**Solution:**

**Statement of affairs of Mr. Gundurao as on 31.3.2009**

<b>Liabilities</b>	<b>Amount Rs.</b>	<b>Assets</b>	<b>Amount Rs.</b>
Sundry Creditors	15,000	Furniture	15,000
Capital (Balancing figure)	<b>1,15,000</b>	Sundry Debtors	75,000
		Stock	35,000
		Cash Balance	5,000
	<b>1,30,000</b>		<b>1,30,000</b>

**Statement of affairs of Mr. Gundurao as on 31.3.2010**

<b>Liabilities</b>	<b>Amount Rs.</b>	<b>Assets</b>	<b>Amount Rs.</b>
Sundry Creditors	30,000	Furniture	15,000
Capital (Balancing figure)	1,95,000	Sundry Debtors	1,00,000

		Cash Balance	60,000
	<b>2,25,000</b>		<b>2,25,000</b>

**Statement of profit & loss of Mr. Gundurao for the period ended 31.3.2010**

<b>Particulars</b>	<b>Amount Rs.</b>
Closing Capital	1,95,000
<b>Add:</b> Drawings	35,000
	2,30,000
<b>Less:</b> Additional Capital	15,000
	2,15,000
<b>Less:</b> Opening Capital	1,15,000
<b>Profit</b>	<b>1,00,000</b>

**Illustration:**

The balances appearing in Bharanidharan's books which are kept on single entry basis are as follows:

	<b>1st April, 2009</b>	<b>31st March 2010</b>
	<b>Rs.</b>	<b>Rs.</b>
Furniture	2,000	2,000
Stock	5,000	6,000
Sundry Debtors	6,000	4,000
Cash	10,000	20,000
Sundry Creditors	2,000	3,500
Bills Receivable	1,000	500
Loan (Dr.)	--	1,000
Investment	--	4,000

His drawings during the year were Rs.2,000. Depreciate furniture by 10% and provide a reserve for bad and doubtful debts at 5% on sundry debtors.

Prepare a statement showing profit for the year.

**Solution:**

**Statement of affairs of Mr. Bharanidharans as on 1st April, 2009**

<b>Liabilities</b>	<b>Amount Rs.</b>	<b>Assets</b>	<b>Amount Rs.</b>
Sundry Creditors	2,000	Furniture	2,000
Capital (Balance figure)	22,000	Stock	5,000
		Sundry Debtors	6,000
		Cash	10,000
		Bills Receivable	1,000
	<b>24,000</b>		<b>24,000</b>

**Statement of affairs of Mr. Bharanidharans as on 31<sup>st</sup> March, 2010**

<b>Liabilities</b>	<b>Amount Rs.</b>	<b>Assets</b>	<b>Amount Rs.</b>
Sundry Creditors	3,500	Cash	20,000
Capital	33,600	Stock	6,000
(Balance figure)		Sundry Debtors	4,000
		<b>Less:</b> Reserve for bad doubtful debts 5%	
		Bills Receivable	200
			<b>3,800 500</b>
		Investment	4,000
		Loan	1,000
