MANONMANIAM SUNDARANAR UNIVERSITY

(Reaccredited with 'A' Grade by NAAC)

ABISHEKAPATTI, TIRUNELVELI - 627 012
TAMILNADU, INDIA

CRITERION-IV

INFRASTRUCTURE
AND
LEARNING RESOURCES

4.4.2

4.4.2 There are established systems and procedures for maintaining and utilizing physical and academic support facilities – laboratory, library, sports complex, computers, classrooms etc.

The University has established well-defined systems and procedures to maintain and optimise its physical and academic support facilities, including laboratories, libraries, sports complexes, computers, and classrooms. These systems are governed by clear policies overseen by various institutions and offices.

The Public Relations and Estate Management (PR & EM) division maintains the University's physical infrastructure, including housekeeping services. A dedicated Campus Development Officer ensures that all enhancement projects are executed efficiently, while the Public Relations Office manages hospitality services. Skilled personnel, such as carpenters and cleaning staff, maintain furniture and restrooms, while a dedicated team tends to the gardens with allocated budgets for fertilisers and pesticides.

The Central Instrumentation Facility houses advanced equipment to support cutting-edge research. Technical aides and electrical supervisors manage routine maintenance, while major repairs are outsourced to specialised firms. Each Science Department maintains multiple laboratories with supporting infrastructure such as instrumentation rooms, gas supply, effluent treatment plants, and chemical storage rooms. The University's research initiatives are bolstered by specialised facilities such as the Incubation Centre, which helps translate research into practical products. In the Department of Biotechnology, a comprehensive genomic database for earthworms has been developed, enabling detailed research. Other notable projects include genomic sequencing of pathogens affecting goats and sheep, shrimp bacterial infection research, and molecular-level studies on diseases impacting dogs and economically significant fish species.

The University Library provides access to over 150,000 books and e-books, with remote access to e-resources available for all users. Significant funds are allocated annually to expand the collection to meet the needs of students and faculty. The Archaeology Department's museum also serves as a valuable resource, preserving India's cultural and historical artefacts.

The Sports Department maintains extensive indoor and outdoor facilities, including the Women's and Men's Hostels gyms. A clear maintenance policy ensures the regular upkeep of sports fields and stadiums, supporting the University's commitment to student fitness and recreational activities.

The Computing Centre manages the University's Internet and Wi-Fi services, ensuring reliable connectivity across campus. It also oversees the University's official website. Classrooms and laboratories are equipped with modern technology and maintained to high standards, providing an optimal learning environment.

The University Department (UDS), Board of Studies (BoS), and College Development Committee (CDC) collaboratively establish academic policies for both university departments and affiliated colleges. These bodies ensure that educational support systems are in place, including resources for scholarships and fellowships at the state and national levels. The purchasing department formulates strategic acquisition plans for equipment and supplies, with annual funds allocated for procurement and maintenance.

The University's systematic approach to maintaining and utilising its physical, academic, and support facilities reflects its commitment to providing a conducive learning environment and supporting cutting-edge research and development. Through clear policies and regular enhancements, the University ensures that all facilities remain in excellent condition and are effectively utilised to meet the needs of its students, faculty, and staff.
